

Table of Contents

Adaptive Optimal Multiple Object Tracking Based on Global Cameras for a Decentralized Autonomous Transport System X. Zhang, M. Scholz, Paryanto and J. Franke	1
Energy Efficiency Potentials of Different Robot Design Concepts E. Permin, J. Kurilova-Palisaitiene, T. Mannheim, K. Buhse, R.H. Schmitt, B. Corves and M. Björkman	8
Analysis and Reduction of Errors in an Automated Robot-Based Repair Process Chain C. Schwienbacher, T. Domaschke, M.A. Otto, T. Kötter and T. Schüppstuhl	16
Identification of Assembly System Configuration for Cyber-Physical Assembly System Planning R. Müller, M. Vette, L. Hörauf and C. Speicher	24
Simplified Path Programming for Industrial Robots on the Basis of Path Point Projection by a Laser Source R. Müller, M. Vette and O. Mailahn	33
Towards a Domain Specific Language for Sensor-Based Actions M. Spangenberg and D. Henrich	42
Controlling and Assisting Manual Assembly Processes by Automated Progress and Gesture Recognition S. Hogreve, S. Kaczmarek, J. Adam, L. Franz, T. Döllen, H. Paulus, V. Reinkemeyer and K. Tracht	50
Investigation of the Applicability of an iGPS Metrology System to Automate the Assembly in Motion of a Truck Cabin R.H. Schmitt, W. Kimmelmann, S. Quindlers, C. Storm and F. Oberhansberg	58
Joining Parameters and Handling System for Automated Subpreform Assembly J. Fleischer, F. Ballier and M. Dietrich	66
Simulation-Based Control and Simulation-Based Support in eRobotics Applications T. Cichon, M. Priggemeyer and J. Rossmann	74
Application of Customizable Robot Assistance Systems to Compensate Age-Related Restrictions of the Musculoskeletal System for Assembly Workplaces L. Stankiewicz, C. Thomas, J. Deuse and B. Kuhlenkötter	82
Combining Planning and Simulation to Create Human Robot Cooperative Processes with Industrial Service Robots F. Heinze, M. Klöckner, N. Wantia, J. Rossmann, B. Kuhlenkötter and J. Deuse	91
System for the Estimation of Robot Cycle Times in Early Production Planning Phase C. Zwicker and G. Reinhart	99
Sensitivity Analysis of the Dynamic Behavior of Transported Material in Vibratory Bowl Feeders Using Physics Simulation C. Stocker and G. Reinhart	107
Integrated Parameter Management Concept for Simplified Implementation of Control, Motion Planning and Process Optimization Methods J. Öltjen, D. Beckmann, C. Hansen, I. Maurer, J. Kotlarski and T. Ortmaier	114
Towards a Modular and Wearable Support System for Industrial Production R. Weidner, T. Meyer, A. Argubi-Wollesen and J.P. Wulfsberg	123
A Human Centered Multi-Agent-System for Production Planning and Control C. Block, F. Morlock, T. Dorka and B. Kuhlenkötter	132
