

Table of Contents

Preface, Organising Committee, Scientific Committee

Chapter 1: Building Structures and Materials

Reduction in the Critical Moment for Lateral Torsional Buckling of Coped Beams K. Brzezińska and R. Bijak	3
The Comparison of Methods of Assessing the Reliability of the Steel Frame A. Dudzik and U. Radoń	11
Application of FEM Mesh Generation Algorithm for Digital Processing of Handmade Sketches M. Gryniewicz and J.K. Szlendak	19
Monte Carlo Simulation of the Torsional Strength due to Concrete Compression of Reinforced Concrete Element R. Jaskulski and P. Wiliński	27
Probabilistic Analysis of Shear Resistance due to Concrete Tension R. Jaskulski and P. Wiliński	35
Computational Analysis of Biaxial Bending in Reinforced Concrete Columns K. Kamiński and K. Budek	45
Research on the Phenomenon of Relaxation of Compressed Concrete Elements K. Kamiński and B. Ciarkowski	53
Generating Interaction Curve Graph Based on the Rotation Angle of Strain Diagram, According to EN 1992 J. Lechniak and K. Kamiński	61
Designing Compressed Reinforcement Cross-Sections by Curvature and Nominal Stiffness Methods K. Kamiński and P. Nowicki	69
Research on Compressive Strength and Strain of Expansive Concrete K. Kamiński and A. Plis	79
Calculation of Reinforced Concrete Beam Cross Sections According to General Method Included in EC2 K. Kamiński and M. Wydra	88
Degradation Analysis of Notched Foam Concrete Beam M. Kadela, A. Cincio and M. Kozłowski	96
Application of TOPSIS Method in Formwork Selection Problem A. Krawczyńska-Piechna	101
Comparison of Steel Trusses Analysed with Different Types of Fire Curves K. Kubicka and U. Radoń	108
Conception of FEM Analysis Using Special Multi-Area Plane State of Stress Elements M. Mackiewicz, T. Chyży and S. Matulewicz	115
Analysis of the High Buildings Structure C. Miedziakowski, S. Matulewicz and M. Mackiewicz	125
Simplified Numerical Modelling of a Blast Load Impact M. Lidner and Z. Szcześniak	131
Neural Approximation of the Buckling Coefficient of Compression Flange of Box Girder Evenly Loaded Transversely B. Potrzeszcz-Sut and A. Szychowski	137
Adhesion Assessment between Concrete Layers Using the Ultrasonic Pulse Velocity Method J. Szymanowski and Ł. Sadowski	145
Recycling of Concrete as the Direction of a Modern and Efficient Building K. Kalinowska-Wichrowska	151
The Effect of Adding Selected Nanoparticles on the Mechanical Properties of the Cement Matrix of Self-Compacting Concrete P. Niewiadomski and D. Stefaniuk	158

Modified Protective Concrete N. Stankiewicz	166
Optimized Thermal Performance Design of Filled Ceramic Masonry Blocks B. Nagy and M. Orosz	174

Chapter 2: Energy Saving and Energy Efficiency in Civil Engineering

Analysis of Domestic Hot Water Production Efficiency for Detached Houses A. Guźda and N. Szmolke	185
A Neural Network Assisted On-Line Cleaning of Heat Exchanger Network M. Markowski and M. Trafczyński	192
Influence of Solar Radiation and Ambient Temperature on the Unit Yield of a Photovoltaic System M. Sarniak	202
Theoretic Assessment of Possibility of Leg Ventilation Duct in Thermal Insulation System of a Renovated Apartment Building P. Vojtkůvková, L. Horka and J. Weyr	210

Chapter 3: Geotechnics

Design of the Pressurized Tepula Channel A.A. Lamri	219
Numerical Simulation of Subsoil Freezing Risk under the Freezer Room L. Horka, O. Sikula and J. Weyr	225
Comparison of Methods Determining Particle Sphericity S. Szerakowska, M.J. Sulewska, J. Trzciński and B. Woronko	231
Application of Fractal Geometry in the Evaluation of Surface Microtexture of Soil Particles S. Szerakowska, M.J. Sulewska, E.S. Oczeretko, J. Trzciński and B. Woronko	238
Comparison of Methods Determining the Angularity of Aggregate Particles S. Szerakowska, M.J. Sulewska, J. Trzciński and B. Woronko	246

Chapter 4: Engineering Mechanics and Mechanical Engineering

Numerical Analysis of Shell-Side Fluid Flow in Shell-and-Tube Heat Exchanger S. Alabrudziński	255
Experimental Data Acquisition System for Flow Boiling in Mini Channels M. Grabowski, M. Poniewski, S. Alabrudziński and K. Płaczkowski	263
Comparison of Selected Meshless Methods for Analysis of Steady, Fully-Developed, Laminar Flow of an Incompressible Newtonian Fluid in Internally Finned Tubes J.K. Grabski and J.A. Kołodziej	274
Vibration Transmission Loss of Auxetic Lattices E. Idczak and T. Strek	282
Comparative Analysis of Forms of Lateral Baffles for Road Tanks M.G. Kuzniatsova and A. Shimanovsky	290
Photographic Technique Application to the Determination of Void Fraction in Two-Phase Flow Boiling in Mini Channels K. Płaczkowski, M. Poniewski, M. Grabowski and S. Alabrudziński	299
Finite Element Modelling of Contact Interaction between Spherical Indenter and Elastic-Plastic Body A. Shimanovsky, M.H. Abdulkader and M.G. Kuzniatsova	307
The Behaviour of the Bed in Rotating Drum for Five Different Drum Diameters K. Skoczowska, K. Malek and R. Ulbrich	314
Study of Heat Transfer in Pneumatic Pulsator J. Wernik and K.J. Wołosz	320

Air Evacuation from the Pressure Accumulator during Work Cycle of the Pneumatic Pulsator K.J. Wołosz and J. Wernik	327
New Environmentally Friendly Solutions to Prevent Oil Pipelines Disasters M. Bardadyn, M. Paredes, M. Wrobel, K. Paradowski, A. Zagórski and K.J. Kurzydłowski	334

Chapter 5: Chemical Engineering

The Role of the Additive in the Form of Na_2SO_4 in the Epoxidation of Dialllyl Ether E. Drewnowska, A. Wróblewska and A. Gawarecka	347
Influence of Equivolumetric Mixture of Ethyl Levulinate and Fatty Acid Methyl Esters on Chosen Properties of Diesel Fuel A. Frankiewicz, M. Przedlacki and K. Janecka	352
Synthesis of Ethyl Levulinate, a Perspective Biocomponent of Motor Fuels A. Frankiewicz, M. Przedlacki and K. Janecka	357
Epoxidation of Natural Limonene over the Ti-MCM-41 Catalyst with 60 Wt.% Hydrogen Peroxide A. Gawarecka, A. Wróblewska and E. Drewnowska	363
The Application of Coagulation and Advanced Oxidation Processes Combined in the Treatment of Tar Water from Biomass Gasification Ł. Gościński	369
The Impact of the Structure of the Sampler on the Representativeness of LPG Samples K. Kurpiel	377
The Influence of Stretch Rod Speed on the Relationship between Preblown Bottle Aesthetic Quality and Final Blown Bottle Thickness Profile in Stretch Blow Molding from Preform Process P. Wawrzyniak	383
Synthesis and Characterization of Nickel Aluminate Spinel (NiAl_2O_4) Prepared from the Equilibrium Mixture of Al_2O_3 and NiO J. Zygmuntowicz, A. Miazga, Ł. Kamiński and K. Konopka	391
The Size and Shape Analysis of Titanium Particles in Composites from ZrO_2 – Ti System P. Łada, M. Bartnik, A. Miazga and K. Konopka	400
The Effect of Leachant pH on the Level of Heavy Metals Release from Industrial Waste K. Mizerna and A. Król	408
Minimum Compressor Shaftwork in the Refrigeration System Thermally Coupled with a Rectification Column Network M. Markowski and S. Storczyk	415
