

# Table of Contents

## Committees

## Keynote

### An Overview on Cast Iron Research at CMRDI

A. Nofal 3

### The Mechanism of Formation of Casting Skin in CG Iron and its Effect on Tensile Properties

S. Boonmee and D.M. Ţăfănescu 11

## Part I: Graphite Nucleation and Morphology

### Role of Lanthanum in Graphite Nucleation in Grey Cast Iron

I. Riposan, M. Chisamera, S. Stan, E. Stefan and C. Hartung 19

### Influence of Ti on Graphite Morphological Transition in Flake Graphite Cast Iron

H. Nakae and K. Fujimoto 25

### Graphite Morphology Evolution during Melt Holding of Ductile Iron

X.G. Diao, Z.L. Ning, F.Y. Cao, S.Z. Ren and J.F. Sun 31

### Influence of Melting Conditions on Graphite Morphology in Spheroidal Graphite Cast Iron Using Ni-C Alloys

Y. Kato, Y. Zou and H. Nakae 37

### Oxygen State Forms in Cast Iron and their Effect on Graphite Crystallization

E.B. Ten 43

### On the Theories of Graphite Formation in Iron

V.L. Naydek, V.P. Gavrilyuk and I.G. Neizhko 48

### Microstructure Investigation of Small-Section Nodular Iron Castings with Chunky Graphite

I. Asenjo, J. Lacaze, P. Larrañaga, S. Méndez, J. Sertucha and R. Suárez 52

## Part II: Solidification and Structure Formation of Cast Iron

### Influence of Primary Austenite on the Nucleation of Eutectic Cells

L. Elmquist, A. Diószegi and P. Svidró 61

### Growth of Eutectic Austenite in Free Graphite Cast Irons

G.L. Rivera, R.E. Boeri and J.A. Sikora 67

### Effect of Yttrium-Containing Nodulizer on the Microstructure Formation and Mechanical Properties of Heavy Section Ductile Iron Castings

Q.X. Ren, M. You, Y.B. Yao, G.M. Wen and Q.Z. Cai 73

### Microstructure and Properties of Cast Iron with Semi-Solid Process Using Cooling Plate Technique

M. Takita 79

### The Effect of Semi-Solid Parameters on the Microstructure and Hardness of High Chromium Cast Irons

A. Inanlou, S.H. Seyedein and M.R. Aboutalebi 84

### Effects of Iron Powder Addition on the Solidification Behaviour of Hypereutectic Grey Cast Iron

M. Chisamera, I. Riposan, S. Stan, I. Anton and M. Barstow 90

### Influence of Iron Powder Addition on the Structure Characteristics of Hypereutectic Grey Cast Iron

M. Chisamera, I. Riposan, S. Stan, C. Militaru and M. Barstow 96

### The Effect of Vanadium and Chromium on the Precipitation of Carbide in Si-Mo Ferritic Ductile Cast Iron

K.H. Choe, K.M. Lim, S.M. Lee and K.W. Lee 102

<b>Solidification Study of Gray Cast Iron in a Resistance Furnace</b> R. Lora, A. Diószegi and L. Elmquist	108
<b>The Effect of Nitrogen and Inoculation on the Tensile Properties and Microstructure of Cast Iron with Lamellar Graphite</b> F. Wilberfors and I.L. Svensson	114
<b>New Aspects Regarding the Structure of Spheroidal Cast Iron Carbon Inclusions Revealed by WAXD Investigations</b> I. Pencea, D.M. Ștefănescu, R. Ruxanda and F.V. Anghelina	120
<b>The Influence of Alloying Elements on Chill Formation in CGI</b> M. König, I.L. Svensson and M. Wessen	126
<b>Development of Hypereutectoid Steel with Nodular Graphite</b> D.S. Kozak	132
<b>Mechanism of Dissolved Sulfur Influence on the Transition from Graphite to Cementite Eutectic in Cast Iron</b> E. Fraš and M. Górný	137

## Part III: Solid-State Transformation in Cast Iron

<b>Characteristics of the Transformations Occurring within the Intercritical Interval of Ductile Iron</b> A.D. Basso, R. Martinez and J.A. Sikora	145
<b>Pearlite Stabilisation by Copper on Ductile Cast Iron</b> M. Tsujikawa, N. Matsumoto, K. Nakamoto and Y. Michiura	151
<b>Study of the Eutectoid Transformation in Grey Cast Irons and its Effect on Mechanical Properties</b> T. Sjögren and H. Svensson	157
<b>Influence of Cooling Rate and Alloying Elements on Kinetics of Eutectoid Transformation in Spheroidal Graphite Cast Iron</b> P. Mrvar, M. Petrič and J. Medved	163
<b>The Effect of Cooling Rate, Section Size and Alloying on Matrix Structure Formation in Pearlitic Grey Cast Iron</b> H. Svensson and T. Sjögren	169
<b>Influence of Alloying Elements on the Bainitic Transformation of Ductile Iron</b> B. Karbakhsh Ravari and M. Nili Ahmadabadi	175
<b>Notch Fatigue and Fracture Mechanics of Austempered Ductile Irons</b> B. Atzori, F. Bonollo and G. Meneghetti	181
<b>Advances in the Development of Carbidic ADI</b> L. Sebastián, J.A. Sikora and R.C. Dommarco	187
<b>The Effect of Partial Melting Homogenization on the Mechanical Properties of Thick Section Austempered Ductile Iron Containing 2% Mn</b> A. Sheikholeslam, M. Nili-Ahmabadi and J. Rassizadehghani	193
<b>Thermo-Mechanically Processed Multi-Phase Ductile Iron: Microstructure Development</b> M. Soliman, H. Palkowski and A. Nofal	199

## Part IV: White and Alloyed Cast Irons

<b>Microstructure and Properties of Isothermally Quenched High Boron White Cast Iron</b> J.J. Zhang, Y.M. Gao, J.D. Xing, S.Q. Ma, W.Q. Yan and J.B. Yan	207
<b>Effect of Rare Earth-Al Additions on the Structural Variations of Medium Carbon Fe-B Cast Alloy</b> D.W. Yi, J.D. Xing, H.G. Fu, S.Q. Ma and Z.X. Liu	213
<b>Influence of Boron Concentration on the Corrosion Resistance of High Boron White Cast Iron to Liquid Zinc Bath</b> S.Q. Ma, J.D. Xing, D.W. Yi, J.J. Zhang, S.C. Ma and G.F. Liu	219
<b>Effects of Forging and Heat Treatment on Microstructure and Properties of High Boron White Cast Iron</b> J.J. Zhang, Y.M. Gao, J.D. Xing, S.Q. Ma, Y.F. Li and L. Liu	225

<b>Structural Refinement of 15%Cr-2%Mo White Irons</b>	231
A. Nofal, R. Reda, K.M. Ibrahim and A. Hussein	
<b>Effect of Chromium and Vanadium Contents on Continuous Cooling Transformation Behavior of Multi-Component White Cast Iron</b>	237
Y. Yokomizo, K. Yamamoto, N. Sasaguri and Y. Matsubara	
<b>Abrasion Behavior of High Cr-V-Nb Cast Iron</b>	243
M. Hirose, K. Yamamoto, H. Miyahara, K. Sakata and K. Ogi	
<b>Wear Characteristics of Spheroidal Carbides Cast Irons in Uniaxial Rotary Glass Shredder</b>	249
N. Yoneta, K. Shimizu, H. Hara, M. Tanaka and Y. Nawa	
<b>High Temperature Erosion Behaviors of High V-Cr-Ni Spheroidal Carbides Cast Iron</b>	255
K. Shimizu, T. Naruse, Y. Xinba, H. Teramachi, S. Araya and M. Ishida	
<b>Study of Feeding Parameters for the Production of Sound High-Alloyed Ductile Iron Castings with Aluminum</b>	261
V.D. Belov, E.B. Ten and A.S. Drokin	
<b>New Wear-Resistant Metastable Strain Hardenable Alloyed Cast Irons</b>	267
O.P. Cheiliakh and I.V. Kolodyazhna	
<b>Interface Property and Two-Body Wear Behavior of High-Cr WCI Matrix Composite Reinforced with CC Particles</b>	273
Y.F. Li, Y.M. Gao, J.J. Zhang and J.B. Yan	
<b>Fatigue Characteristic of Spheroidal Vanadium Carbides Cast Iron</b>	279
M. Tanaka, K. Shimizu, D. Ito and T. Noguchi	

## Part V: Computational Modeling of Cast Iron Transform

<b>The Role of Alloy Design in Semi-Solid Casting of Ductile Iron Processed by Inclined Cooling Plate</b>	287
B. Heidarian, M. Nili-Ahmabadi and M. Moradi	
<b>Prediction of Hypoeutectic Gray Iron Microstructure during Solidification and Solid Transformation Using Simple Fourier Model</b>	293
M.A. Taha, N.A. El Mahallawy, A.M. El-Sabbagh, T. El-Benawy and H.F. Hadla	
<b>Computer Simulation of Lost Foam Process of Cast Iron</b>	299
I. Ohnaka, A. Sugiyama, K. Konishi, Y. Obana, J.D. Zhu and N. Sako	
<b>Study on Data Base of Modeling Concerning Casting Phenomena in Cast-Iron-Mould Simulation Systems</b>	305
Z. Ignaszak	
<b>Researches about the Determination of the Thermal Conductivity Coefficient for Silica Sand Moulds Used in Romanian Foundries</b>	312
I. Ciobanu, M. Chisamera, S.I. Munteanu, A. Crișan, I. Rîposan, T. Bedő and C.I. Lupinca	
<b>Modelling the Thermal Conductivity of Various Cast Irons</b>	318
D. Holmgren	
<b>Modeling of the Divorced Eutectic Solidification of Spheroidal Graphite Cast Iron</b>	324
H.L. Zhao, M.F. Zhu and D.M. Ștefănescu	
<b>Simulation of the Ductile Iron Solidification Using a Cellular Automaton</b>	330
A.A. Burbelko, E. Fraś, D. Gurgul, W. Kapturkiewicz and J.A. Sikora	
<b>Using Regression Analysis to Optimize the Combination of Thermal Conductivity and Hardness in Compacted Graphite Iron</b>	337
M. Selin	
<b>Development of Ductile Iron Material, Simulation and Production Technology to Locally Strengthen Castings</b>	343
W. Menk, S. Tunzini, T. Rieck, C. Honsel and K. Weiss	
<b>Prediction of Microstructure and Porosity Formation of Practical Spheroidal Graphite Iron Castings</b>	349
H.D. Zhao and B.C. Liu	

## Part VI: Quality and Properties

<b>Some Key Points on High Strength Grey Iron Cylinder Block Production</b> F.J. Li, A.K. Cai, D.X. Tang, F.Z. Ren and H.L. Dong	357
<b>Effect of Selected Alloying Elements on Mechanical Properties of Pearlitic Nodular Cast Irons</b> J. Serrallach, J. Lacaze, J. Sertucha, R. Suárez and A. Monzón	361
<b>Plate Fracture of Nodular Cast Iron</b> C.J. Heckmann, W. Stets and G. Wolf	367
<b>Lubricated Friction and Wear Properties of P-B Bearing Flaky Graphite Cast Iron</b> T. Itoh and K. Ogi	374
<b>Mechanical Properties and Thermal Expansion Characteristics of Low Thermal Expansion Ductile Cast Iron with same Nickel Equivalent (NiE)</b> M. Hatate, T. Nobuki, S. Kiguchi and K. Shimizu	380
<b>Effect of Copper Addition on Mechanical Properties of Nodular Indefinite Chilled Iron (NICI)</b> Y. Prasetyo, S.K. Lee and E.R. Baek	386
<b>Notch Effects on Impact and Bending Characteristics of Spheroidal Graphite and Compacted Vermicular Graphite Cast Irons with Various Matrices</b> T. Nobuki, M. Hatate and T. Shiota	392
<b>Effects of Graphite Shape on Thermal Fatigue Property of Thin Wall Graphitic Cast Irons</b> Y.N. Pan, C.C. Fan and C.H. Chang	398
<b>Bending Strength of Cast Materials Reinforced with Hard Particles</b> S. Aso, H. Ike, K. Ohguchi, Y. Komastu and N. Konishi	404
<b>Literature Survey on Porosity and Microporosity in Cast Irons Related to Expansion and Gas Entrapment Phenomena</b> V. Anjos, C.A. Silva Ribeiro, F. Dias, W. Baumgart and J. Cunha	410
<b>On the Formation of Shrinkage Porosity in Gray Iron Castings</b> L. Elmquist, A. Diószegi and T. Björklind	416
<b>Surface Turbulence at Flow of Gray Cast Iron</b> A. Diószegi, T. Björklind and Z. Diószegi	422
<b>Suppression of Elevated Temperature Brittleness in Spheroidal Graphite Cast Iron by Increasing Phosphorus Content</b> Y. Iwabuchi and I. Kobayashi	428

## Part VII: Processing and Applications

<b>Selection of Cast Iron Grade for Stub-Anode Fixation in Aluminum Electrolytic Cells</b> A. Nofal, M. Waly, A. Ahmed and M. Agour	435
<b>Wear Property of Ductile Iron Locally Reinforced with Cr-Containing Steel Inserts</b> C. Mayerling Martinez, N. Valle, J. Lacaze, I. Thorbjornsson, B. Johannesson, J.T. Thorgrimsson, B. Podgornik and J. Vižintin	441
<b>New Application of High Niobium Cast Iron as a Grain Refiner for Stainless Steels</b> H. Sakaki, M. Mizumoto, T. Ohgai and A. Kagawa	447
<b>Optimum Pressure Control of Molten Metals for Casting Production Using a Novel Greensand Mold Press Casting Method</b> K. Terashima, R. Tasaki, Y. Noda, K. Hashimoto, J. Iwasaki and T. Atsumi	453
<b>Technology and Effectiveness of Cast Iron Treatment by Gas Injection</b> E.B. Ten	459
<b>Fundamentally New Effective Process of Casting of Hollow Cylindrical Billets of Cast Iron by the Method of Directional Solidification</b> Y. Ignatievich Marukovich and U. Fiodaravich Beuza	465
<b>Analysing the Deformation Behaviour of Compacted Graphite Cast Irons Using Digital Image Correlation Techniques</b> T. Sjögren, P.E. Persson and P. Vomacka	470
<b>Mg7-FeSi Alloy Dissolution Kinetics in the In-Mould Process</b> V.B. Bublikov, Y.D. Bachinskyi, D.N. Berchuk, A.A. Yasinskyi and E.P. Nesteruk	476
<b>Magnetodynamic Mixer-Batcher for Overheating and Pouring of Cast Iron</b> V.I. Dubodelov, V.K. Pogorsky and M.S. Goryuk	481

<b>Improvement of the Metallurgical Quality of Ductile Iron by Conditioning</b>	
E. Ochoa de Zabalegui, J. Arriaran, J.C. Bicandi and D. Ferrer	487
<b>Effect of Austempering Temperature on High Cycle Fatigue Behavior of an Austempered Ductile Iron (ADI)</b>	
S. Yazdani, A. Sadighzadeh Benam and B. Avishan	493
<b>A Study on Ductile Iron Production without the Use of Feeders</b>	
V. Fourlakidis	499
