

Table of Contents

Preface

I. Theory and Modeling of Martensitic Transformation and Functional Properties

Possible Wave Processes Controlling the Growth of Martensite Crystals at B2-B19, B2-B19' and B2-R Transformations M. Kashchenko and V. Chashchina	3
Modeling of Deformation and Functional Properties of Shape Memory Alloys Based on a Microstructural Approach A.E. Volkov, M.E. Evard and F.S. Belyaev	20
Novel Achievements in the Research Field of Multifunctional Shape Memory Ni-Mn-In and Ni-Mn-In-Z Heusler Alloys V.V. Sokolovskiy, M.A. Zagrebin and V.D. Buchelnikov	38
Modeling of Thermomechanical Behavior of Shape Memory Alloys S. Pryakhin and V. Rubanik	77

II. Martensitic Transformations and Shape Memory Effects

Physics of Thermoelastic Martensitic Transformation in High-Strength Single Crystals Y. Chumlyakov, I.V. Kireeva, E. Panchenko, E. Timofeeva, I.V. Kretinina and O.A. Kuts	107
Thermoelastic Martensitic Transitions and Shape Memory Effects: Classification, Crystal and Structural Mechanisms of Transformations, Properties, Production and Application of Promising Alloys V.G. Pushin, N.N. Kuranova, E.B. Marchenkova, E.S. Belosludtseva, N.I. Kourov, T.E. Kuntsevich, A.V. Pushin and A.N. Uksusnikov	174
Some Physical Principles of High Temperature Shape Memory Alloys Design G. Firstov, Y. Koval, J. van Humbeeck, A. Timoshevskii, T. Kosorukova and P. Verhovlyuk	207
Structural and Magnetic Properties of Ni-Mn-Al Heusler Alloys: A Review M.V. Lyange, E.S. Barmina and V.V. Khovaylo	232

III. Controlling the Functional Properties of Shape Memory Alloys

Mechanisms of Microstructure Evolution in TiNi-Based Alloys under Warm Deformation and its Effect on Martensite Transformations A.I. Lotkov, V. Grishkov, O. Kashin, A. Baturin, D. Zhapova and V. Timkin	245
Thermomechanical Treatment of TiNi Intermetallic-Based Shape Memory Alloys S. Prokoshkin, V. Brailovski, K. Inaekyan, A. Korotitskiy and A. Kreitsberg	260
Thermomechanical Treatment of Ti-Nb Solid Solution Based SMA V. Brailovski, S. Prokoshkin, K. Inaekyan, M. Petrzhhik, M. Filonov, Y. Pustov, S. Dubinskiy, Y.S. Zhukova, A. Korotitskiy and V. Sheremetyev	342
Influence of Ultrasonic Vibrations on Shape Memory Effect V. Rubanik, V. Klubovich and V. Rubanik	406
Martensitic Transformation and Shape Memory Effect in TiNi-Based Alloys during Neutron Irradiation S. Belyaev, V. Chekanov, G. Kolobanov, R. Konopleva, A. Nakin, I. Nazarkin, A. Razov, N. Resnina and A.E. Volkov	429
Thermo-Mechanical and Functional Properties of NiTi Shape Memory Alloy at High Strain Rate Loading A. Danilov and A. Razov	457
Features of Deformation Behavior, Structure and Properties of TiNi Alloys Processed by Severe Rolling with Pulse Current V. Stolyarov and A. Potapova	480

IV. Shape Memory Alloys with Complex Structure

TiNi Shape Memory Foams, Produced by Self-Propagating High-Temperature Synthesis N. Resnina, S. Belyaev and A. Voronkov	499
Development of Two-Way Shape Memory Material on the Basis of Amorphous-Crystalline TiNiCu Melt-Spun Ribbons for Micromechanical Applications A. Shelyakov, N. Sitnikov, D. Sheyfer, K. Borodako, A. Menushenkov, V. Fominski, V.V. Koledov and R. Rizakhanov	532
Crystal-Chemical Aspects of the Stability of the Ordered Phase B2 in Volume Alloying of TiNi L. Meisner	554
High-Strength Precipitation-Hardening Austenitic Steels with Shape Memory Effect V.V. Sagaradze and S.V. Afanas'ev	575

V. Application of Shape Memory Alloys

Application of Thermomechanically Treated Ti-Ni SMA I. Khmelevskaya, E. Ryklina and A. Korotitskiy	603
