

Table of Contents

Tube and Sheet Hydroforming-Advances in Material Modeling, Tooling and Process Simulation	
T. Altan, H. Palaniswamy, G. Ambrogio and Y. Aue-u-Ian	1
FE Simulation of Sheet Metal Forming – State of the Art in Automotive Industry	
H.J. Haepf and M. Rohleder	13
Optical Measuring Technologies in Sheet Metal Processing	
K. Galanulis	19
Asymmetric Incremental Sheet Forming	
J. Jeswiet	35
Developments and Trends in Laser Welding of Sheet Metal	
F. Vollertsen	59
Do Advanced Material Models Contribute to Accuracy in Industrial Sheet Forming Simulations?	
T. van den Boogaard, H.H. Wisselink and J. Huétink	71
Flexibly Rolled Sheet Metal and Its Use in Sheet Metal Forming	
R. Kopp, C. Wiedner and A. Meyer	81
Tribology in Sheet Metal Forming with Regard to Challenges in Lightweight Construction	
P. Groche and T. Callies	93
Comparison of Material Behavior and Economic Effects of Cold and High Temperature Forming Technologies Applied to High-Strength Steels	
R. Neugebauer, A. Göschel, A. Sterzing, P. Kurka and M. Seifert	101
Manufacturing of High Strength Steel and Aluminum for a Mixed Material Body in White	
M. Pfestorf	109
Use of Zinc-Alloys for Low Temperature Soldering of Zinc Coated Steels	
J. Wilden, J. Bergmann, M. Dolles and S. Reich	127
Process Characteristics of Laser Brazing Aluminium Alloys	
F. Klocke, A. Castell-Codesal and D. Donst	135
Joining of Steel-Aluminium Hybrid Structures with Electron Beam on Atmosphere	
F.W. Bach, A. Beniyash, K. Lau and R. Versemann	143
Non-Vacuum Electron Beam Welding	
U. Dilthey, A. Gumenyuk and H. Masny	151
The Effect of Pre-Straining on the Mechanical Behaviour of Self-Piercing Riveted Aluminium Alloy Sheets	
L. Han, K.W. Young, R. Hewitt, A. Chrysanthou and J.M. O'Sullivan	157
Flux-Less Joining Technique of Aluminium with Zinc-Coated Steel Sheets by a Dual-Spot-Laser Beam	
H. Laukant, C. Wallmann, M. Korte and U. Glatzel	163
High-Power Fibre Lasers – Application Potentials for Welding of Steel and Aluminium Sheet Material	
C. Thomy, T. Seefeld and F. Vollertsen	171
Influence of Magnetic Fields on Dilution during Laser Welding of Aluminium	
C. Thomy and F. Vollertsen	179
Investigations on Seam Quality in Laser Beam Welding of Contaminated, Zinc Coated Sheets	
A. Blankl and M. Geiger	187
Computing Welding Distortion: Comparison of Different Industrially Applicable Methods	
D. Tikhomirov, B. Rietman, K. Kose and M. Makkink	195
Chances and Challenges in Joining by Forming with a Flat Counter Tool	
R. Neugebauer, R. Mauermann and S. Dietrich	203
Use of Shell Elements for the FEM-Simulation of the Welding Process of Sheet Metal Parts	
M.F. Zaeh, L. Papadakis, S. Roeren and T. Hornfeck	209
Distortion Minimization in Remote Welding of Steel	
C. Thomy, M. Schilf, T. Seefeld, G. Sepold and F. Vollertsen	217

Mechanised Plasma-Powder-Arc-Welding (PPAW) of Aluminium Sheets J. Wilden and J. Bergmann	225
Rapid Parametric Process Design Using FEM Analysis M. Tisza and Z. Lukács	235
Trends and Developments in Intelligent Computer Aided Design of Progressive Dies S. Kumar and R. Singh	241
Tolerance Analysis of Sheet Metal Assemblies with Focus on Non-Rigid Geometry R. Lustig, R. Hochmuth and H. Meerkamm	249
A New Approach for Optimization of Sheet Metal Components A. Albers, H. Weiler, D. Emmrich and B. Lauber	255
The Integration of CAPP and Production Planning for Bent Sheet Metal Parts D. Cattrysse, P. Collin, J.R. Duflou, T.H.M. Nguyen and D. Van Oudheusden	263
Problem Specific Design of Actuators for Micro Adjustment H. Hagenah and T. Wurm	271
System for Design and Computation of Lightweight Structures Made of Bent Profiles S. Chatti, U. Dirksen, M. Schikorra and M. Kleiner	279
A Framework for Automatic Tool Selection in Integrated CAPP for Sheet Metal Bending T.H.M. Nguyen, J.R. Duflou and J.P. Kruth	287
Intelligent Manufacturing by Enhanced Product Models H. Bley, C. Zenner and M. Bossmann	295
Rapid Tooling by Laminated Object Manufacturing of Metal Foil M. Prechtl, A. Otto and M. Geiger	303
Determination of Friction Coefficients for the FE-Analysis of Sheet Forming of Tailored Welded Blanks M. Tolazzi and M. Merklein	313
Closed-Loop-Control of the Material Flow in the Deep Drawing Process B.A. Behrens, J.W. Yun and M. Milch	321
Numerical-Stochastic Modeling and Simulation of Deep Drawing Tinplate Rings B. Barisic, T. Pepelnjak and K. Kuzman	329
The Development of Cold Forging Progressive Die Technology for the Case of Slim Type Spindle Motor C.W. Tai, H.-. Tsai and S.C. Tsai	337
Finite Element Analysis for Deep Drawing of Tailored Heat Treated Blanks M. Kerausch, M. Merklein and D. Staud	343
Hydromechanical Deep Drawing Simulations: Model Development and Process Parameters Investigation E. Ceretti, C. Giardini, C. Contri and P. Bortot	353
Deformation Behaviour of Sheet Metals in Laser Assisted Hydroforming Processes H.K. Tönshoff, J. Bunte, O. Meier and L. Engelbrecht	361
Improvement of Formability in Tube Hydroforming by Reduction of Friction with a High Viscous Fluid Flow M. Geiger, P. Dal Bó and J. Hecht	369
Active Material Flow Control during High-Pressure Sheet Metal Forming P. Groche and C. Metz	377
Die Surface Structures and Hydrostatic Pressure System for the Material Flow Control in High-Pressure Sheet Metal Forming R. Krux, W. Homberg, M. Kalveram, M. Trompeter, M. Kleiner and K. Weinert	385
Integrated Manufacturing by Hydroforming, Laser Welding and Cutting O. Kreis, M. Celeghini and M. Merklein	393
3D Ultrasonic Imaging for Sheet Metal Hydroforming H. Meier, H. Ermert, P. Knoll and O. Keitmann-Curdes	401
Non-Traditional Forming Limit Diagrams for Incremental Forming J. Jeswiet, D.J. Young and M. Ham	409
Influence of an Incremental Deformation on Material Behaviour and Forming Limit of Aluminium Al99,5 and QT-Steel 42CrMo4 L.W. Meyer, C. Gahlert and F. Hahn	417
Laserforming of 3D Features J.R. Duflou, B. Callebaut and J.P. Kruth	425

Non-Thermal Laser Stretch-Forming H. Schulze Niehoff and F. Vollertsen	433
Force Measurements for Single Point Incremental Forming: An Experimental Study J.R. Duflou, A. Szekeres and P. Vanherck	441
Forces in Single Point and Two Point Incremental Forming J. Jeswiet, J.R. Duflou and A. Szekeres	449
Incremental Sheet Forming with an Industrial Robot – Forming Limits and Their Effect on Component Design L. Lamminen	457
A New Robot-Based Sheet Metal Forming Process H. Meier, O. Dewald and J. Zhang	465
The Design of an Incremental Sheet Forming Machine J.M. Allwood, N.E. Houghton and K.P. Jackson	471
Sheet Thinning Prediction in Single Point Incremental Forming G. Ambrogio, L. Filice, F. Gagliardi and F. Micari	479
Custom Manufacture of a Solar Cooker – A Case Study J. Jeswiet, J.R. Duflou, A. Szekeres and P. Lefebvre	487
New Approach for Process Planning and Optimization in Sheet Metal Spinning R. Göbel, M. Kleiner and N. Henkenjohann	493
Further Experimental Investigations and FEM Model Development in Sheet Incremental Forming C. Giardini, E. Ceretti and A. Aldo	501
Quantitative Validation of FEM Simulations for Incremental Sheet Forming Using Optical Deformation Measurement M. Bambach, G. Hirt and J. Ames	509
Studies for the Development of a Simulation Basis for Numerically Controlled Driving of Sheet Metal H. Hoffmann, R. Hautmann and R. Petry	517
Finite Element Modeling of Incremental Forming of Aluminum Sheets S. He, A. Van Bael, P. van Houtte, J.R. Duflou, A. Szekeres, C. Henrard and A.M. Habraken	525
Comparison of FEM Simulations for the Incremental Forming Process C. Henrard, A.M. Habraken, A. Szekeres, J.R. Duflou, S. He, A. Van Bael and P. van Houtte	533
3D-Characterisation of Sheet Metal and Roller Surfaces by Means of Confocal Microscopy J. Valentin, M.A. Weber, R. Brodmann and A. Sharp	543
Lubrication of Aluminium Sheet Metal within the Automotive Industry M. Meiler and H. Jaschke	551
Surface Inspection System for Large Sheet Metal Parts B. Denkena, F. Berg and W. Acker	559
Tribological Investigations on Coated Steel Sheets Using the Dry Film Lubricant Drylube E1 M. Tolazzi, M. Meiler and M. Merklein	565
Measuring and Quantifying the Surface-Roughness Anisotropy of Modeled and Industrially Produced Surfaces C.M. Wichern and W. Rasp	573
Thermal Characterization of Friction Stir Welded Butt Joints S. Beccari, L. D'Acquisto, L. Fratini and C. Salamone	583
Microstructural Changes Determining Joint Strength in Friction Stir Welding of Aluminium Alloys A. Barcellona, G. Buffa, D. Contorno, L. Fratini and D. Palmeri	591
Statistical Investigations on Friction Stir Welded Aluminum Tailored Blanks for a Robust Process Window A. Giera, M. Merklein and M. Geiger	599
Friction Stir Welding of Light Weight Sandwich Materials S. Dörfler and A. Otto	607
The Significance of Experiment in the Finite Element Analysis of a Pulley Forming Process X.H. Liu, M. Daniels and B. Shirvani	615

Buckling Texturing Technology for Increase in Stability of Thin Sheet Metal Structures – Simulation and Application A.W. Behrens and J. Ellert	623
Metal Flow and Die Filling in Coining of Micro Structures with and without Flash M. Thome, G. Hirt and B. Rattay	631
Transient Simulation of Electromagnetic Forming of Aluminium Tubes C. Karch and K. Roll	639
A Study of the Effect of Process Variables on the Stamp Forming of Rectangular Cups Using Fibre-Metal Laminate Systems L. Mosse, W.J. Cantwell, M.J. Cardew-Hall, P. Compston and S. Kalyanasundaram	649
Novel Concept of Experimental Setup for Characterisation of Plastic Yielding of Sheet Metal at Elevated Temperatures M. Geiger, G. van der Heyd, M. Merklein and W. Hussnätter	657
High Quality Magnesium Sheets for Automotive Applications F.W. Bach, M. Rodman and A. Rossberg	665
Solution Heat Treatment and Cold Die Quenching in Forming AA 6xxx Sheet Components: Feasibility Study R.P. Garrett, J. Lin and T.A. Dean	673
Thermal Imaging Analysis of Stimulated Heat Diffusion in Sheet Metal for Non-Destructive Metrology and Testing B. Spellenberg, J. Zettner, T. Hierl, M. Haller and T. Lenzi	681
Experimental and Numerical Investigation of the Formability of Laser Welded Patchwork Blanks K. Lamprecht and M. Geiger	689
Analyses of the Forming Limit Diagram in Digital Environment T. Pepelnjak, A. Petek and K. Kuzman	697
Size-Effects in Micro-Metal Sheet Forming of Unalloyed Copper and Brass M.C. Tsai, Y.A. Chen, C.F. Wu and F.K. Chen	705
Finite Element Analysis of Plate Bending Problems Using Transition Plate Elements B. Kanber and O.Y. Bozkurt	713
Springback Analysis of Sheet Metals Regarding Material Hardening M. Schikorra, R. Govindarajan, A. Brosius and M. Kleiner	721
Enhanced Semi-Analytical Process Simulation of Air Bending N. Ridane, D. Jaksic, M. Kleiner and B. Heller	729
Experimental and Numerical Study of Intense Shear Banding for Al-Alloy under Uniaxial Tension X.J. Duan, M.K. Jain, M. Bruhis and D.S. Wilkinson	737
FE Simulation of Laser Assisted Bending M. Pitz and M. Merklein	745
Optimisation of Springback Predicted by Experimental and Numerical Approach by Using Response Surface Methodology R. Bahloul, P. dal Santo, A. Mkaddem and A. Potiron	753
A Global Approach of the Finite Element Simulation of Hot Stamping P. Hein	763
Magnesium Sheet Metal Forming Considering its Specific Yield Behavior M. Redecker, K. Roll and S. Häussinger	771
Determination of Mechanical Properties for the Hydroforming of Magnesium Sheets at Elevated Temperature J. Hecht, S. Pinto and M. Geiger	779
Modelling and Analysis of Integrated Hotforming and Quenching Processes D. Lorenz and K. Roll	787
Basic Investigations on the Hot Stamping Steel 22MnB5 M. Geiger, M. Merklein and C. Hoff	795
Effective Stripper-Holding on High Speed Precision Blanking of Electronic Machine Parts F. Sekine	805
Methods for Monitoring of Laser Cutting by Means of Acoustic and Photodiode Sensors J. De Keuster, J.R. Duflo and J.P. Kruth	809

Advanced Cutting Technology in Process Chains for High Strength Steels R. Neugebauer, V. Kräusel and H. Bräunlich	817
An Automatic Cost Calculation System for 3-D Laser Cutting Based on Characteristic Numbers M. Masur, F. Liébana and U. Stute	825
