

# Table of Contents

## Committees, Sponsors and Preface

## Keynotes

<b>Size Effects in Micro Forming</b>	
F. Vollertsen	3
<b>Adaptive Control in CNC Sheet Metal Processing</b>	
W. Serruys	13
<b>Environmental Performance of Sheet Metal Working Processes</b>	
J.R. Duflou, K. Kellens, Renaldi and W. Dewulf	21
<b>Application of Servo Presses to Sheet Metal Forming</b>	
K. Mori	27
<b>Innovative Machine Concepts for 3D Bending of Tubes and Profiles</b>	
M. Hermes, D. Staupendahl, C. Becker and A.E. Tekkaya	37

## Processes

<b>On the Development of Novel Light Weight Profiles for Automotive Industries by Roll Forming of Tailor Rolled Blanks</b>	
P. Beiter and P. Groche	45
<b>Incremental Bending of Ultra-High-Strength Steels</b>	
A. Määttä, K. Mäntyjärvi and J.A. Karjalainen	53
<b>Material Hybrid Joining of Sheet Metals by Electromagnetic Pulse Technology</b>	
R. Schäfer, P. Pasquale and A. Elsen	61
<b>Optimisation of Condition in Hot Gas Bulging of Aluminium Alloy Tube Using Resistance Heating Set into Dies</b>	
T. Maeno, K. Mori and C. Unou	69
<b>A Methodology for Optimization of the Direct Laser Metal Deposition Process</b>	
A. Angelastro, S.L. Campanelli, G. Casalino, A.D. Ludovico and S. Ferrara	75
<b>Sheet-Bulk Metal Forming of Preformed Sheet Metal Parts</b>	
T. Schneider and M. Merklein	83
<b>Machines and Tools for Sheet-Bulk Metal Forming</b>	
M. Merklein, A.E. Tekkaya, A. Brosius, S. Opel, L. Kwiatkowski, B. Plugge and S. Schunk	91
<b>Process Design for Hydroformed Tailored Blanks Technology through CAE Techniques</b>	
A. Del Prete, G. Papadia and B. Manisi	99
<b>Backward Drawing of Necks Using Incremental Approach</b>	
A. Petek, K. Kuzman and R. Fijavž	105
<b>Numerical and Experimental Investigation of Process Parameters Effect of Low Carbon Steel Wire Produced with Roll Drawing Process</b>	
F. Lambiase and A. di Ilio	113
<b>Flow Behaviour of Magnetorheological Fluids, Considering the Challenge of Sealing in Blank Hydroforming in the Flange Area with Rectangular Leakage Area Cross-Sections</b>	
S. Rösel and M. Merklein	121
<b>Assessment of Electrical Resistance Heating for Hot Formability of Ti-6Al-4V Alloy Sheet</b>	
F. Ozturk, R.E. Ece, N. Polat and A. Koksal	130
<b>Measurement of Material Flow in Series Production</b>	
A. Neumann, D. Hortig and M. Merklein	137
<b>Analysis of Continuous Bending of Thin Plates in Rubber Pad Bending</b>	
M. Mehrara and M.J. Nategh	145
<b>Wrinkling Study in Tube Hydroforming Process</b>	
K. Khalili, S.E. Eftekhari Shahri, P. Kahhal and M.S. Khalili	151
<b>Optimisation of Tubular Hydroforming Processes for Wrinkling and Thinning Control</b>	
J.F.M. Caseiro, R.A.F. Valente, A. Andrade-Campos and R. Natal Jorge	159

<b>Improved Roller Hemming System for High Volume Part Production</b>	168
M. Zubeil, K. Roll and M. Merklein	
<b>The Effect of Process Parameters on Thickness Distribution in Hydroforming of Conical-Cylindrical Cups</b>	176
A. Gorji, M. Bakhshi-Jooybari, S. Norouzi, S.J. Hosseiniipour and G. Mohammad-Alinejad	
<b>Combination of Finite-Element and Semi-Analytical Models for Sheet Metal Leveling Simulation</b>	182
A. Amor, M. Rachik and H. Sfar	
<b>Analytical-Numerical Solution of Bending Problem of Thin Plates in Rubber Pad Bending</b>	190
M. Mehrara and M.J. Nategh	

## Presses and Press Tools

<b>Influence of Die Materials on the Microstructural Evolution of HSS Sheets in Hot Stamping</b>	201
A. Ghiootti, S. Bruschi and D. Pellegrini	
<b>Development of Bionic Design Concepts for Structure Optimisation of Forming Tools According to Production and Stress Constraints</b>	209
E. Oswald, M. Liewald and O. Stephan	
<b>Development of a Hydraulic Actuator to Superimpose Oscillation in Metal-Forming Presses</b>	217
B.A. Behrens, S. Hübner, R. Krimm, C. Wager, M. Vucetic and T. Cahyono	
<b>Characterization of Horizontal Loads in the Production of Asymmetrical Parts</b>	223
B.A. Behrens, A. Bouguecha, R. Krimm, T. Matthias and V. Salfeld	
<b>High Performance Active Elements for Agricultural Machines Made of Ultra High-Strength Steels</b>	229
W. Homberg and T. Rostek	

## Cutting and Joining

<b>On the Performance of Welded, Riveted and Adhesive Bonded Al/Mg Sheet Metal Joints</b>	237
M. Alfano, G. Ambrogio, L. Filice, F. Furguele, E. Gallus and D. D'Antuoni	
<b>Process Design for the Manufacturing of Magnetic Pulse Welded Joints</b>	243
V. Psyk, G. Gershteyn, B. Barlage, C. Weddeling, B. Albuja, A. Brosius, A.E. Tekkaya and F.W. Bach	
<b>Identification of Post-Necking Hardening Behaviour of Sheet Metal: a Practical Application to Clinch Forming</b>	251
S. Coppieeters, P. Lava, H. Sol, P. van Houtte and D. Debruyne	
<b>Light Metal in High-Speed Stamping Tools</b>	259
M. Hirsch, P. Demmel, R. Golle and H. Hoffmann	
<b>Small Batch Laser Welding Using Light Fasteners and Laser Tack Welding</b>	267
M. Rasmus, K. Mäntyjärvi and J.A. Karjalainen	
<b>Application of the Finite Element Methods on the Staking Process of Staking Fasteners</b>	273
M. Tofall, M. Merklein and R. Plettke	
<b>The Low-Cycle Fatigue Strength of Laser-Welded Ultra-High-Strength Steel</b>	281
M. Keskitalo, K. Mäntyjärvi and T. Kiuru	
<b>Modelling of Fine Blanking Process of the Aluminium Sheets</b>	290
W. Wieckowski, P. Lacki and J. Adamus	
<b>The Effect of Residual Stresses on the Strain Evolution during Welding of Thin-Walled Tubes</b>	298
M. De Strycker, W. van Paepegem, L. Schueremans and D. Debruyne	
<b>Computer Aided Design of an Effective Fixture for FSW Processes of Titanium Alloys</b>	304
G. Buffa and L. Fratini	

## Materials and Testing

<b>Thickness Effect on the Formability of AZ31 Magnesium Alloy Sheets</b>	313
A. Forcellese, F. Gabrielli, M. Simoncini and M. El Mehtedi	

<b>The Importance of Governing Metal Thickness for Resistance Spot Welding of Aluminium</b>	319
L. Han, M. Thornton, D. Boomer and M. Shergold	
<b>A Theoretical Study on Forming Limit Diagram Predictions Using Viscoplastic Polycrystalline Plasticity Models</b>	
M. Serenelli, M. Bertinetti, P. Turner and J. Signorelli	327
<b>Influence of the Processing of Magnesium Alloys AZ31 and ZE10 on the Sheet Formability at Elevated Temperature</b>	
L. Stutz, J. Bohlen, G. Kurz, D. Letzig and K.U. Kainer	335
<b>Optical Measuring Technique for the Investigation of Built-Up Cold-Formed Steel Structural Members</b>	
I. Georgieva, L. Schueremans, G. De Roeck and L. Pyl	343
<b>Analytical and Experimental Evaluation of the Stress-Strain Curves of Sheet Metals by Hydraulic Bulge Tests</b>	
L. Lazarescu, D.S. Comsa and D. Banabic	352
<b>Comparison of the Identifiability of Flow Curves from the Hydraulic Bulge Test by Membrane Theory and Inverse Analysis</b>	
M. Bambach	360
<b>Methods for Determination of Residual Stress of a Formed Plate Using Laser Ablation, Wire EDM and Milling</b>	
J. Lämsä, K. Mäntyjärvi, A. Järvenpää, M. Grüner, M. Merklein and J.A. Karjalainen	368
<b>Study on Impact Crushing Properties of High Strength Steel Sheets</b>	
K. Natori, K. Watanabe, T. Tanaka and Y. Imaida	376
<b>Investigation of Influence Parameters on Forming Limit Diagrams of Aluminum Alloy-AA2024</b>	
G. Celik, B. Kaftanoğlu and C. Karadogan	382
<b>Theoretical and Experimental Evaluation of the Formability of Anisotropic Zinc Sheets</b>	
Y. Jansen, R.E. Logé, M. Milesi, S. Manov and E. Massoni	390
<b>Fracture Characterization of ST37-2 Thin Metal Sheet with Experimental and Numerical Methods</b>	
M. Aberkane and O.O. Mohand	396
<b>Experimental Characterisation of Structured Sheet Metal</b>	
S. Fritzsche, R. Ossenbrink and V. Michailov	404
<b>The Effects of Notch Manufacturing Method and Tolerance on Impact Test Results of UHS Steels</b>	
J. Kantola, K. Mäntyjärvi, R. Toppila and J.A. Karjalainen	412
<b>Adjusting Optimized Material Properties for Tailored Heat Treated Blanks</b>	
M. Merklein and H. Nguyen	420
<b>Intermediate Heat Treatment – A New Proceeding for Aluminum Alloys Using Forming Limit Diagrams</b>	
K. Siefert, M. Merklein, A. Töpperwien, W. Nester and M. Grünbaum	428
<b>The Influence of Through-Thickness Material Property Variation on Stretch Forming Springback</b>	
R.J. McMurray, A.G. Leacock and D. Brown	436
<b>Transformation in Austenitic Stainless Steel Sheet under Different Loading Directions</b>	
T. van den Boogaard, J. Krauer and P. Hora	444
<b>On the Study of Constitutive Parameter Identification of Advanced Yield Criteria</b>	
M.S. Aydin, A. Canpolat, J. Gerlach, L. Kessler and A.E. Tekkaya	452
<b>Development of a Microscopic Damage Model for Low Stress Triaxiality</b>	
M. Achouri, G. Germain, P. dal Santo, S. Boude, J.L. Lebrun and D. Saidane	460
<b>Numerical Simulation of Forming Limit Test for AZ31 at 200°C</b>	
M. Nebebe, J. Bohlen, D. Steglich and J. Mosler	468
<b>Experimental Methods for Characterizing of Sheet Metals at High Strain Rates</b>	
L.W. Meyer, S. Abdel-Malek and N. Herzog	474
<b>Assessment of Damage Models in Sheet Metal Forming for Industrial Applications</b>	
M. Doig and K. Roll	482
<b>Modification of the Mechanical Anisotropy in Extruded AZ31 Sheets</b>	
N. Grittner, M. Engelhardt, M. Hepke, D. Bormann, B.A. Behrens and F.W. Bach	490

## **Modelling Techniques**

<b>Modeling Laser Heating for Roller Hemming Applications</b> T. Kleeh, M. Merklein and K. Roll	501
<b>Geometrical Modeling of the Sheet Metal Parts in the Incremental Shrinking Process</b> Z.R. Yang, D. Scherer, M. Golle and H. Hoffmann	509
<b>A Predictive Model for Tolerance Verification of Bent Sheet Metal Parts</b> T.H.M. Nguyen, J.R. Duflou and J.P. Kruth	516
<b>The Simulation of Metal Foams Forming Processes</b> G. D'Urso, M. Longo, G. Maccarini and C. Giardini	524
<b>Effect of Friction and Back Pressure on the Formability of Superplastically Formed Aluminium Alloy Sheet</b> P. Wood, M.J. Qarni and A. Rosochowski	532
<b>Numerical Simulation of Electron Beam Welding Process of Inconel 706 Sheets</b> P. Lacki, K. Adamus, K. Wojsyk and M. Zawadzki	540
<b>Numerical Inverse Method for Friction Coefficient Estimation in Tube Hydroforming</b> A. Fiorentino, R. Marzi, E. Ceretti and C. Giardini	548
<b>Simulation of Hot Sheet Metal Forming Processes Based on a Micro-Structural Constitutive Model</b> M. Farzin, R. Jafari Nedoushan and M. Mashayekhi	556
<b>Continuous Roll Forming Simulation Using Arbitrary Lagrangian Eulerian Formalism</b> R. Boman and J.P. Ponthot	564
<b>Prediction of Surface Quality due to Chatter Vibration in Rolling of Thin Steel Strip Using ALE Finite Element Method</b> M.R. Niroomand, M.R. Forouzan and M. Salimi	572
<b>Numerical and Experimental Study of the Effect Pressure Path in Tube Hydroforming Process</b> M. Elyasi, H. Khanlari and M. Bakhshi-Jooybari	579
<b>Modeling and Optimization of Pressure Profile in Hydroforming of St12 Conic Part with RSM and Genetic Algorithm</b> H. Shahrajabian, K. Khalili and M.S. Khalili	587
<b>Parametric Investigation of Circular and Elliptical Bulge Tests in Warm Hydroforming Process for AA5754-O Sheet</b> H. Gedikli, Ö.N. Cora and M. Koç	594
<b>Analytical and Numerical Calculation of the Force and Power Requirements for Air Bending of Structured Sheet Metals</b> V. Malikov, R. Ossenbrink, B. Viehweger and V. Michailov	602
<b>Simulation of Super-Plastic Forming Based on a Micro-Structural Constitutive Model and Considering Grain Growth</b> M. Farzin, R. Jafari Nedoushan and M. Mashayekhi	610
<b>Investigation on the Effect of Pulsating Pressure on Tube-Hydroforming Process</b> K. Khalili, S.Y. Ahmadi-Brooghani and A. Ashrafi	618
<b>Modeling Uniaxial, Temperature, and Strain Rate Dependent Behavior of AZ31 Alloy by Softening Model</b> S. Toros, F. Ozturk and M. Kaya	624
<b>Constitutive Modelling of Anisotropy, Hardening and Failure of Sheet Metals</b> I.N. Vladimirov, Y. Kiliclar, V. Tini and S. Reese	631
<b>Computer Aided Modelling of Rubber Pad Forming Process</b> A. Del Prete, G. Papadia and B. Manisi	637
<b>Experimental and Numerical Investigation of the Effect of Anisotropy on Springback in U-Bending Process</b> V. Daiezadeh, M. Elyasi, B. Rahmani and M. Bakhshi-Jooybari	645
<b>Numerical Prediction of Damage Evolution in Sheet Metal Forming Processes with Nonlinear and Complex Strain Paths</b> B. Jamshidi, F. Haji Aboutalebi, M. Farzin and M.R. Forouzan	653
<b>FEM Analysis of Sandwich Shells with Metallic Foam Cores</b> H. Mata, R. Natal Jorge, A.A. Fernandes, R.A.F. Valente and M.P.L. Parente	659

<b>A Simulation Approach for Chaining the Forming-Welding-Crash Behaviour of Sheet Metal Structures</b>	
L. Papadakis, A. Schober, M.F. Zaeh and G. Demosthenous	667
<b>Simulation of Heat Assisted Forming of Commercial Aluminium Alloy AA5182</b>	
R. Govindarajan, M. Zubeil, K. Siefert, C. Ageorges and K. Roll	675
<b>Blank Optimization in Elliptical-Shape Sheet Metal Forming Using Response Surface Model Coupled with Reduced Basis Technique and Finite Element Analysis</b>	
K. Khalili, P. Kahhal, E.E. Shari and M.S. Khalili	683
<b>Influence of the Adaptive Remeshing during Simulations of Sheet Metal Forming Processes</b>	
L. Giraud-Moreau, A. Cherouat and H. Borouchaki	691
<b>FE-Simulation of the Heat Transfer by Defined Cooling Conditions during the Hot Stamping Process</b>	
T. Svec, M. Grüner and M. Merklein	699
<b>Consideration of Elastic Tool Deformation in Numerical Simulation of Hydroforming with Granular Material Used as a Medium</b>	
M. Grüner and M. Merklein	707
<b>Advanced Friction Modeling in Sheet Metal Forming</b>	
J. Hol, M.V. Cid Alfaro, T. Meinders and J. Huétink	715
<b>Identification of the Characteristics of Hydroformed Structures Using Optimization Methods</b>	
B. Radi, A. Ayadi, A. Cherouat, L. Giraud-Moreau and A. El Hami	723

## Process and Production Planning

<b>DOE Analysis of the Effects of Geometrical Parameters on the Self-Piercing Riveting of Aluminium Alloy AA6060T4</b>	
G. Casalino	733
<b>Cutting Path Optimization Using Tabu Search</b>	
R. Dewil, P. Vansteenvwegen and D. Cattrysse	739
<b>A Knowledge-Based System for Manufacturability Assessment of Deep Drawn Sheet Metal Parts</b>	
V. Naranje and S. Kumar	749
<b>A Holistic Modeling Approach for the Design of Tension Leveling and Scale Breaking Processes and Equipment</b>	
L. Steinwender, C. Salzmann, A. Kainz, K. Krimpelstätter and K. Zeman	757
<b>Sheet Metal Forming Process Design Rules Development</b>	
A. Del Prete, G. Papadia and T. Primo	765

## Manufacturing Systems

<b>Employment of Finite Element Modelling and Design of Experiments to Investigate the Geometrical Factors in T-Type Bi-Layered Tube Hydroforming</b>	
A. Alaswad, A.G. Olabi and K.Y. Benyounis	775
<b>Continuous Improvement of Manufacturing Systems with the Concept of Functional Periodicity</b>	
D.T. Matt and E. Rauch	783
<b>Experimental Investigation of Parameters Effect on Laser Forming Productiveness</b>	
F. Lambiase, A. Paoletti and A. di Ilio	791
<b>Design for Manufacture Based on an Integrated Product Process Design Model</b>	
H. Voswinckel, H. Schleifenzbaum, M. Bambach and G. Hirt	799

## Energy and Resource Efficiency

<b>Impact of Laser-Based Technologies in the Energy-Consumption of Metal Cutters: Comparison between Commercially Available Systems</b>	
M. Oliveira, J.P. Santos, F.G. Almeida, A. Reis, J.P. Pereira and A. Barata da Rocha	809

<b>Heuristic-Based Evaluation of Energy Flows in Press Hardening Process Chains</b> R. Neugebauer, F. Schieck, A. Göschel and J. Schönherr	816
<b>On the Sustainability Evaluation in Sheet Metal Forming Processes</b> G. Ingara, G. Ambrogio, R. Di Lorenzo and F. Micari	824

## Single Point Incremental Forming (SPIF)

<b>Force Modeling in Single Point Incremental Forming of Variable Wall Angle Components</b> R. Pérez-Santiago, I. Bagudanch and M.L. García-Romeu	833
<b>Multivariate Adaptive Regression Splines as a Tool to Improve the Accuracy of Parts Produced by FSPIF</b> J. Verbert, A.K. Behera, B. Lauwers and J.R. Duflou	841
<b>Enhancing Incremental Sheet Forming Performance Using High Speed</b> G. Ambrogio, L. Filice and F. Gagliardi	847
<b>Robot-Based Incremental Sheet Metal Forming – Increasing the Geometrical Accuracy of Complex Parts</b> D. Kreimeier, B. Buff, C. Magnus, V. Smukala and J. Zhu	853
<b>Finding the Best Machine for SPIF Operations - a Brief Discussion</b> S.R. Marabuto, D. Afonso, J.A.F. Ferreira, F.Q. Melo, M.A.B.E. Martins and R.J.A. de Sousa	861
<b>On the Formability and Microstructural Characteristics of AISI 301 Parts Formed by Single-Point Incremental Forming</b> I. Lonardelli, P. Bosetti, S. Bruschi and A. Molinari	869
<b>The Simulation of Robot Based Incremental Sheet Metal Forming by Means of a New Solid-Shell Finite Element Technology and a Finite Elastoplastic Model with Combined Hardening</b> Y. Kiliçlar, R. Laurischkat, S. Reese and H. Meier	875
<b>Accuracy Improvement in Single Point Incremental Forming through Systematic Study of Feature Interactions</b> A.K. Behera, H. Vanhove, B. Lauwers and J.R. Duflou	881
<b>CAM-Solution for Two Robots Based Incremental Sheet Metal Forming</b> D. Kreimeier, J. Zhu, V. Smukala, B. Buff and C. Magnus	889
<b>Tool Directionality in Contour-Based Incremental Sheet Forming: an Experimental Study on Product Properties and Formability</b> P. Eyckens, H. Vanhove, A. Van Bael, J.R. Duflou and P. van Houtte	897
<b>Tool Path Strategies for Single Point Incremental Forming</b> I. Bagudanch, R. Pérez-Santiago and M.L. García-Romeu	905
<b>Shape Distortion and Thickness Distribution during SPIF Processes: Experimental and Numerical Analysis</b> G. Buffa, G. Ingara, L. Fratini and F. Micari	913
<b>Investigation on Incremental Sheet Forming Combined with Laser Heating and Stretch Forming for the Production of Lightweight Structures</b> B. Taleb Araghi, A. Göttmann, G. Bergweiler, A. Saeed-Akbari, J. Bültmann, J. Zettler, M. Bambach and G. Hirt	919
<b>Comparison between SPIF with Robot and CNC Machine</b> A. Attanasio, E. Ceretti, C. Giardini and S. Antonioni	929
<b>Deviations between FE Simulation and Experiments in the SPIF Process</b> I. Vasilakos, J. Gu, H. Vanhove, H. Sol and J.R. Duflou	937

## Quality and Reliability

<b>Measurement of Critical Dimensions of Cold Roll Formed Sections Using Digital Image Processing</b> I. Williams, B. Shirvani and J.M. Mourier	949
<b>Enhanced Requirements for Surface Quality of Outer Car Body Shells According to Thermal Manufacturing Processes</b> C. Albiez, M. Liewald, A. Görres and J. Regensburger	957

<b>Pressure Field Stabilization in High-Voltage Underwater Pulsed Metal Forming Using Wire-Initiated Discharges</b>	
I. Eguia, J. San José, M. Knyazyev and Y. Zhovnovatyuk	965
<b>Predicting Dimensional Accuracy of Mechanically Joined Car Body Assemblies</b>	
R. Neugebauer, M. Rössinger, M. Wahl, F. Schulz, A. Eckert and W. Schützle	973
<b>Counter Laser Treatment for Recovering Deformation of Slender Workpiece</b>	
L. Giorleo, E. Ceretti, C. Giardini and B. Previtali	981

## Micro Technologies

<b>Micro Warm Coining of Stainless Steel Sheets Using Electric Conductive Heating</b>	
K.N. Zhao, B. Wietbrock and G. Hirt	991
<b>Investigation of the Hole Shape in Pulsed Fiber Laser Microdrilling of Nanostructured Titanium</b>	
C.A. Biffi and B. Previtali	999
<b>Forming Behavior of Thin Foils</b>	
Z.Y. Hu, H. Wielage and F. Vollertsen	1008
