

Table of Contents

Preface, Committees and Acknowledgements

Chapter 1: Keynotes

A Novel Process for the Manufacture of Extended Laminar Flow Lipskins A.G. Leacock	3
Systematic Process Improvement of Stamping Processes D. Ling, D. Williams, B. Carleer and M. Stippak	13
Evolution of Yield Loci for Aluminum Alloy AA6016 and Deep Drawing Steel DC06 under the Influence of Non-Linear Strain Paths M. Merklein and S. Suttner	21

Chapter 2: Processes

Possibility of the Increase in Titanium Sheets' Drawability J. Adamus and P. Lacki	31
Comprehensive Material Characterization for an Intermediate Heat Treatment M. Lechner, A. Kuppert and M. Merklein	39
Process Limits of Stretch and Shrink Flanging by Incremental Sheet Metal Forming H. Voswinckel, M. Bambach and G. Hirt	45
Experimental Investigations of Different Tool Concepts for Rotary Peen Forming C. Russig, M. Bambach and G. Hirt	53
Tool Concepts and Materials for Incremental Sheet Metal Forming with Direct Resistance Heating H. Meier, C. Magnus, B. Buff and J.H. Zhu	61
Laser Forming of ERW Steel Square Tubes within Metallurgical Constraints G. Sheikholeslami, J. Griffiths, S.P. Edwardson, K. Watkins and G. Dearden	68
State of the Art: Prototyping of the Roll Bending Machine J. Mäkilängas, K. Kutuniva and K. Mäntyjärvi	76
Surface Topography from Single Point Incremental Forming Using an Acetal Tool M. Ham, B.M. Powers and J. Loisel	84
Effects of Draw-Bending Characteristics on Concave Wall Feature in Rectangular Deep-Drawn Parts W. Phanitwong and S. Thipprakmas	92
Effects of Part Geometry on Spring-Back/Spring-Go Feature in U-Bending Process W. Phanitwong, A. Sontamino and S. Thipprakmas	100
Modelling Kinetics of Phase Transformation for the Indirect Hot Stamping Process P. Hippchen, M. Merklein, A. Lipp, M. Fleischer, H. Grass and C. Philipp	108
Size Effects in Winding Roll Formed Profiles: A Study of Carcass Production for Flexible Pipes in Offshore Industry P.S. Nielsen, M.S. Nielsen and N. Bay	117
Method to Emboss Holograms into the Surface of Sheet Metals B.A. Behrens, R. Krimm, J. Jocker, E. Reithmeier, B. Roth and M. Rahlves	125
Thermo-Mechanical Hardening of Ultra High-Strength Steels W. Homberg and T. Rostek	133
Tube Hydroforming (THF): Process Optimization of an Automotive Component A. Attanasio, E. Ceretti and G. Maccarini	141
Robot-Based Incremental Sheet Metal Forming – Increasing the Geometrical Complexity and Accuracy B. Buff, C. Magnus, J.H. Zhu and H. Meier	149
Improving Formability in SPIF Processes through High Speed Rotating Tool: Experimental and Numerical Analysis G. Buffa, D. Campanella, R. Mirabile and L. Fratini	156

Enhanced Formability of Age-Hardenable Aluminium Alloys by Incremental Forming of Solution-Treated Blanks	
A. Mohammadi, H. Vanhove, A. van Bael and J.R. Duflou	164
Numerical Modeling of Tube Hydropiercing Using Phenomenological and Micro-Mechanical Damage Criteria	
A. Hassannejadasl and D.E. Green	172
Numerical Simulation of a Pyramid Steel Sheet Formed by Single Point Incremental Forming Using Solid-Shell Finite Elements	
L. Duchêne, C.F. Guzmán, A.K. Behera, J.R. Duflou and A.M. Habraken	180
Optimization of Superplastic Forming Processes for High Volume Production in Aeronautics	
A. Nick, J. Zettler and G. Hirt	189
Blank Shape Optimization in Sheet Hydroforming Process	
A. Del Prete, G. Papadia, T. Primo and S. Schipa	197
Development of Accurate Numerical Models for Bending of Aluminum Tailored Blanks	
A. Del Prete, G. Papadia, T. Primo and E. Mariano	205
Profile Correction of a Stretch Formed Aluminium Alloy during Artificial Ageing	
G. Volk, A.G. Leacock and D. Brown	213

Chapter 3: Process and Production Planning

Manufacture of Accurate Titanium Cranio-Facial Implants with High Forming Angle Using Single Point Incremental Forming	
J.R. Duflou, A.K. Behera, H. Vanhove and L.S. Bertol	223
Springback Simulation of the Process Chain Press Line Forming and Roller Hemming Processes	
C. Kästle, M. Liewald and K. Roll	231
A Knowledge Based System for Process Planning of Axisymmetric Deep Drawn Parts	
V. Naranje and S. Kumar	239
Optimization of the Blank Holder Force Using Genetic Algorithm Method in Case of a U - Shaped Part	
A. Albut and V. Ciubotariu	247

Chapter 4: Presses and Press Tools

Economic Drive Concept for Flexible Forming Presses	
B.A. Behrens, R. Krimm and T. Nitschke	255
Dynamic Strength Behaviour of Punch Connections in Shear Cutting Processes	
J. Mair, R. Canti, R. Golle, W. Volk and H. Hoffmann	262
Adjustable Tooling System for Air Bending	
J.R. Duflou, H. Vanhove and W. de Coninck	270
New Methods to Reduce the Vibrations of the Ram and the Press Body while Blanking of Sheet Metal	
B.A. Behrens, R. Krimm and V. Salfeld	277
A Low Cost Knowledge Based System Framework for Design of Bending Die	
D. Panghal and S. Kumar	284

Chapter 5: Materials and Testing

Study of a Formability Process Chain for a Copper-Free Al-Zn-Mg-Alloy by a Retrogression and Re-Aging Treatment (RRA)	
N. Jaburek and M. Merklein	295
Study on Formability Characteristics of the Weld Seam of Aluminum Steel Tailored Hybrid Blanks	
O. Singar and M. Merklein	302
Mechanical Response of Ti-6Al-4V Alloy on Deformation at Moderate Temperatures	
M. Merklein, H. Hagenah, M. Kaupper and A. Schaub	311

Numerical Optimisation of a Shear Specimen Geometry According to ASTM M. Merklein, M. Johannes, M. Biasutti and M. Lechner	317
Effectiveness of Stamping Lubricants in Erichsen Test B. Sener and E.S. Kayali	325
FEM - Modeling of Bendability of Ultra-High Strength Steel A.M. Arola, K. Mäntyjärvi and J.A. Karjalainen	333
Integration of High Strength Steel (HSS) Elements in Automotive Industry E. Cañibano Álvarez, J.C.M. Senovilla, J.R. García, C.M. Martín and J.S. López	340
Experimental Study of the Formability of H240LA Steel Sheets under Stretch-Bending Conditions L.H. Martínez-Palmeth, A.J. Martínez-Donaire, C. Vallengano, G. Centeno and F.J. García-Lomas	349
Formability Characteristics of AA5083 Sheets under Hot Forming Conditions S. Bruschi, A. Ghiotti and F. Michieletto	356
A Microstructural Investigation of Roll Formed Austenitic Stainless Steel K. Yvell, M. Lindgren and U. Bexell	364
Deformation Mechanisms of Ti6Al4V Sheet Material during the Incremental Sheet Forming with Laser Heating L. Mosecker, A. Göttmann, A. Saeed-Akbari, W. Bleck, M. Bambach and G. Hirt	372
Effects of Surface Roughness on Frictional Behaviour of Solid Organic Lubricants for Sheet Metal Forming Processes F. Sgarabotto, A. Ghiotti and S. Bruschi	381
Optimized Yield Curve Determination Using Bulge Test Combined with Optical Measurement and Material Thickness Compensation H. Friebe, M. Klein, I. Heinle and A. Lipp	389
Time Dependent FLC Determination Comparison of Different Algorithms to Detect the Onset of Unstable Necking before Fracture W. Hotz, M. Merklein, A. Kuppert, H. Friebe and M. Klein	397

Chapter 6: Modelling Techniques

Numerical Simulation of Welding Thin Titanium Sheets P. Lacki and K. Adamus	407
Determination of Friction in Sheet Metal Forming by Means of Simulative Tribo-Tests E. Ceron and N. Bay	415
The THF Compression Test for Friction Estimation: Study on the Influence of the Tube Material A. Fiorentino, E. Ceretti and C. Giardini	423
Numerical Modeling of Electromagnetic Tube Expansion and Formability Assessment I. Oliveira, P. Teixeira, G. Lobo and A. Reis	429
Simulation of a Thick Plate Forming Benchmark Using a Multi Scale Texture Evolution and Anisotropic Plasticity Model D. Shore, J. Gawad, S. Cooreman, P. Lava, D. Debruyne, D. Roose, J. Antonissen, A. van Bael and P. van Houtte	436
FEM Analysis of Mecano-Welding Process for Manufacturing Cylinders Z.K. Feng and H. Champlaud	444
Modelling Aspects in Accumulative Roll Bonding Process by Explicit Finite Element Analysis L. Fratini, M. Merklein, W. Böhm and D. Campanella	452

Chapter 7: Cutting and Joining

Predicting Dimensional Accuracy of Laser Welded Aluminum Add-On Body Parts R. Neugebauer, O.E. Bernhardt, M. Wahl, F. Schulz, R. Mauermann, W. Schützle and S. Werner	463
The Influence of the Shielding Gas to the Static and Dynamic Strength Properties of Laser Welded Workhardened Nitrogen Alloyed Austenitic Stainless Steel M. Keskitalo and K. Mäntyjärvi	471

Friction Stir Spot Welding (FSSW) of Aluminum Sheets: Experimental and Simulative Analysis	
G. D'Urso, M. Longo and C. Giardini	477
On the Field Variables Influence on Bonding Phenomena during FSW Processes: Experimental and Numerical Study	
G. Buffa, L. Fratini, S. Pellegrino and F. Micari	484
Friction Stir Welding of Tailored Blanks of Aluminum and Magnesium Alloys	
J.P. Bergmann, R. Schürer and K. Ritter	492

Chapter 8: Micro Technologies

The Downsizing Effects in EDM Drilling of Micro Holes	
G. D'Urso, G. Maccarini and C. Merla	503
Wear Behavior of a DLC-Coated Blanking and Deep Drawing Tool Combination	
H. Flosky and F. Vollertsen	511

Chapter 9: Quality and Reliability

Characterizing Influence Parameters in Pulsed Phase Thermography for Defect Detection in Sheet Metal Parts	
Q. Braun, D. Hortig and M. Merklein	521
Quality Assurance of Laser Welded Axisymmetric Sandwich Structure	
K. Illikainen, K. Holappa and K. Mäntyjärvi	529

Chapter 10: Manufacturing Systems

Extension of the Value Stream Mapping Approach to the Comprehensive Design of a Lean Sheet Metal Manufacturing System: An Industrial Case Study	
D.T. Matt	537

Chapter 11: Energy and Resource Efficiency

Electric Energy Consumption Analysis of SPIF Processes	
G. Ingarao, K. Kellens, A.K. Behera, H. Vanhove, G. Ambrogio and J.R. Duflou	547

Chapter 12: Condition Monitoring and Diagnostics

Advances in Monitoring Die Condition during Superplastic Forming	
R.C. Zante and C. Knowles	557
