

# Table of Contents

## Preface, Committee and Acknowledgements

## Chapter 1: Keynote

<b>Optical 3D Metrology for Optimization of Sheet Metal Forming Processes</b>	
K. Galanulis, S. Adolf and H. Friebel	3
<b>Use of FE Simulation and Servo Press Capabilities in Forming of AHSS and Aluminum Alloys</b>	
A. Fallahiarezoodar, L. Ju and T. Altan	13
<b>Stamping Plant 4.0 – Basics for the Application of Data Mining Methods in Manufacturing Car Body Parts</b>	
S. Purr, J. Meinhardt, A. Lipp, A. Werner, M. Ostermair and B. Glück	21

## Chapter 2: Forming

<b>Evaluation of Drawing Force and Thickness Distribution in the Deep-Drawing Process with Variable Blank-Holding</b>	
L. Lazarescu, I. Nicodim and D. Banabic	33
<b>Flexible Manufacturing of Double-Curved Sheet Metal Panels for the Realization of Self-Supporting Freeform Structures</b>	
D. Bailly, M. Bambach, G. Hirt, T. Pofahl, G. Della Puppa and M. Trautz	41
<b>Formability of AA6060 Tubes in Hot Metal Gas Forming at High Temperatures</b>	
F. Michieletto, A. Ghiotti and S. Bruschi	49
<b>Friction Adjustment within Dry Deep Drawing by Locally Laser Textured Tool Surfaces</b>	
T. Häfner, J. Heberle, M. Dobler, M. Gränitz, I. Alexeev and M. Schmidt	57
<b>Internal Flow-Turning - An Innovative Technology for the Manufacture of Tailored Tubes</b>	
W. Homberg, T. Rostek and E. Wiens	65
<b>Laser Forming of Steel Dome-Shaped Parts Using a Flower Pattern</b>	
M. Loh-Mousavi, M. Rostami and M. Farzin	71
<b>Lightweight Design in Architecture – Forming of Stainless Steel Composites for Modern Facades</b>	
M. Tulke, J. Watzke, A. Brosius and M. Schomäcker	77
<b>On the Friction Effect on the Characteristics of Hydroformed Tube in a Square Section Die: Analytical, Numerical and Experimental Approaches</b>	
A. Abdelkefi, N. Boudeau, P. Malecot, G. Michel and N. Guermazi	83
<b>Study of Earing Defect during Deep Drawing Process with Finite Element Simulation</b>	
R. Patel, H.K. Dave and H. Raval	91
<b>Embossing of Metal Inserts for Subsequent Assembly Injection Moulding of Media Tight Electronic Systems</b>	
P. Frey, M. Heinle, C. Leisen, D. Drummer and M. Merklein	99
<b>The Influence of Strain Rate on the Springback of Commercially Pure Titanium in a Stretch Forming Operation</b>	
A.G. Leacock, S. Quinn, G. Volk, D. McCracken and D. Brown	107
<b>Goal Driven Optimization of Process Parameters for Maximum Efficiency in Laser Bending of Advanced High Strength Steels</b>	
J. Griffiths, M.J.W. Riley, G. Sheikholeslami, S.P. Edwardson and G. Dearden	115
<b>Investigation of the Portevin-Le Chatelier Effect in AlMgSi-Tailored Heat Treated Blanks</b>	
A. Kahrimanidis, D. Wortberg and M. Merklein	123
<b>Development of a New Method for Producing Plane Expanded Metal by Laser Cutting and Forming of Metal Plates under Uniaxial Tension</b>	
M. Merklein, D. Junker, A. Schaub, A. Kretschmer and M. Lechner	131

## **Chapter 3: Bending**

<b>The Effect of Punch Radius on the Deformation of Ultra-High Strength Steel in Bending</b>	139
A.M. Arola, V. Kesti and R. Ruoppa	
<b>Experimental and Numerical Determination of the Required Initial Sheet Width in Die Bending</b>	147
T. Traub and P. Groche	
<b>On the Identification of a Loading Scheme in Large Radius Air Bending</b>	155
V. Vorkov, R. Aerens, D. Vandepitte and J.R. Duflou	
<b>Simulative Winding of Roll Formed Profile in Carcass Production for Flexible Pipes</b>	163
P.S. Nielsen, C.A. Ormstrup, B.A.K. Hartz, M.S. Nielsen and N. Bay	

## **Chapter 4: Incremental Forming**

<b>Negative Bulge Formation in High Speed Incremental Forming</b>	173
H. Vanhove and J.R. Duflou	
<b>Accuracy and Material Properties in Incremental Forming for a Multi-Step Expanding Approach</b>	179
J. Brüninghaus, A. Oster and B. Kuhlenkötter	
<b>Experimental Testing of an Analytical Model for Membrane Strains in Single Point Incremental Forming</b>	187
D. Adams, T. McAnulty and M. Doolan	
<b>Formability Enhancement in Incremental Forming for an Automotive Aluminium Alloy Using Laser Assisted Incremental Forming</b>	195
A. Mohammadi, H. Vanhove, A. Van Bael, D. Weise and J.R. Duflou	

## **Chapter 5: Hot Stamping**

<b>Local Prevention of Hardening for Punching of Hot-Stamped Parts</b>	205
K. Mori, T. Maeno and T. Suganami	
<b>Numerical Analysis and Experimental Validation of the Thermo-Mechanical Flow Behaviour of the Hot Stamping Steel MBW® 1500</b>	213
B. Potdar, S. Graff and B. Kiefer	
<b>Tribological Behaviour of Lubricants in Hot Stamping of AA6016</b>	221
F. Medea, A. Ghiotti and S. Bruschi	
<b>Design of Press Tools to Investigate the Hot Stamping Behaviour of Alternative Coatings for Press-Hardened Steel Parts</b>	227
D. Close, P. Feuser and R. Lallement	
<b>Investigation of Weld Seam Structures of Tailor Welded Blanks for Hot Stamping</b>	235
R. Kolleck, R. Vollmer, C. Both and A. Breuer	
<b>Improvement of the Ductility of Press-Hardened Plane Sheets through a Modified Heat Treatment</b>	243
T. Konrad and P. Feuser	

## **Chapter 6: Sheet-Bulk Metal Forming**

<b>Experimental Verification of a Benchmark Forming Simulation</b>	251
P. Landkammer, A. Loderer, E. Krebs, B. Söhngen, P. Steinmann, T. Hausotte, P. Kersting, D. Biermann and K. Willner	
<b>Flexible Rolling of Process Adapted Semi-Finished Parts and its Application in a Sheet-Bulk Metal Forming Process</b>	259
P. Hildenbrand, T. Schneider and M. Merklein	
<b>Locally Adapted Tribological Conditions as a Method for Influencing the Material Flow in Sheet-Bulk Metal Forming Processes</b>	267
M. Loeffler, T. Schneider, U. Vierzigmann, U. Engel and M. Merklein	

<b>Influence of Surface Modifications on Friction, Using High-Feed Milling and Wear Resistant PVD-Coating for Sheet-Metal Forming Tools</b>	275
D. Biermann, D. Freiburg, R. Hense, W. Tillmann and D. Stangier	
<b>Experimental and Simulative Investigations of Tribology in Sheet-Bulk Metal Forming</b>	283
F. Beyer, H. Blum, D. Kumor, A. Rademacher, K. Willner and T. Schneider	
<b>Measuring Systems for Sheet-Bulk Metal Forming</b>	291
A. Loderer, M. Timmermann, S. Matthias, M. Kästner, T. Schneider, T. Hausotte and E. Reithmeier	

## Chapter 7: Materials Testing

<b>Formability Characteristics of Hot Stamped Ti6Al4V Sheets Electro-Chemically Modified on Surface for Biomedical Applications</b>	301
B. Valoppi, S. Bruschi and A. Ghiotti	
<b>Modeling of the Plastic Characteristics of AA6082 for the Friction Stir Welding Process</b>	309
S. Pellegrino, L. Fratini, M. Merklein, W. Böhm and H. Nguyen	
<b>Novel Punch Design for Nonlinear Strain Path Generation and Evaluation Methods</b>	317
M. Liewald and K. Drotleff	
<b>Structural and Frictional Performance of Fused Deposition Modelled Acrylonitrile Butadiene Styrene (P430) with a View to Use as Rapid Tooling Material in Sheet Metal Forming</b>	325
A.G. Leacock, G. Cowan, M. Cosby, G. Volk, D. McCracken and D. Brown	
<b>A New Approach to the Evaluation of Forming Limits in Sheet Metal Forming</b>	333
M. Merklein, A. Maier, D. Kinnstätter, C. Jaremenko and E. Affronti	
<b>Analysis of Tensile Test of Titanium EBW Sheet</b>	339
J. Adamus and M. Motyka	
<b>Effect of Pre-Compressive Strain on Work-Hardening Behavior upon Two-Step Loading in a Magnesium Alloy Sheet</b>	347
T. Hama, Y. Tanaka, M. Uratani, T. Tanaka, H. Fujimoto and H. Takuda	
<b>Cold Formability of Automotive Sheet Metals: Anisotropy, Localization, Damage and Ductile Fracture</b>	353
J.H. Lian, D.C. Ahn, D.C. Chae, S. Münstermann and W. Bleck	
<b>Investigation on the Strain Behaviour of a Precipitation-Hardenable Aluminium Alloy through a Temperature Gradient Based Heat Treatment</b>	361
G. di Michele, P. Guglielmi, G. Palumbo and D. Sorgente	
<b>Identification of Plasticity Model Parameters of the Heat-Affected Zone in Resistance Spot Welded Martensitic Boron Steel</b>	369
T. Eller, L. Greve, M. Andres, M. Medricky, T. Meinders and T. van den Boogaard	
<b>Influence of Stress Relaxation after Uniaxial Pre-Straining on Subsequent Plastic Yielding in the Uniaxial Tensile Test of Sheet Metal</b>	377
S. Suttner and M. Merklein	
<b>Validation of Kinematic Hardening Parameters from Different Stress States and Levels of Plastic Strain with the Use of the Cyclic Bending Test</b>	385
M. Rosenschon, S. Suttner and M. Merklein	

## Chapter 8: Modelling

<b>Analysis and Optimization for the Production Process of an Automotive Alternator Using FEM and Experiments</b>	395
A. D'Annibale, A. di Ilio, M. Trozzi and L. Bonaventura	
<b>Experimental and Numerical Investigation on a Pressure Dependent Friction Model</b>	403
F. Zöller, V. Sturm and M. Merklein	
<b>A Constitutive Model for the Simulation of the Deformation Behavior of TWIP Steels</b>	411
A. Haufe, A. Erhart and A. Butz	
<b>Numerical Prediction of Failure within Small Curvature Bending of Advanced High Strength Steels</b>	419
I. Tsoupis and M. Merklein	

## **Enhancement of Lemaitre Model to Predict Cracks at Low and Negative Triaxialities in Sheet Metal Forming**

K. Isik, M. Doig, H. Richter, T. Clausmeyer and A.E. Tekkaya

427

## **A Modified Shell Element Model Combined with Yld91 Yield Function in Simulating Aluminum Alloy Applied Hydroforming**

F.F. Zhang, J. Chen, J.S. Chen, X.H. Zhu and S.J. Yuan

435

## **Creep Behaviour of AA6016 during Automotive Paint Drying Processes**

J. Regensburger, L. Mendes de Lima, C. Albiez, P. Weigel and W.G. Drossel

443

## **Design of Numerical Simulations of Linear Friction Welding Processes: Issues and Difficulties**

A. Ducato, D. Campanella, G. Buffa and L. Fratini

451

## **New Approach for Wrinkle Prediction in Deep Drawing Process**

F. Han and R. Radonjic

459

## **Chapter 9: Cutting and Joining**

### **Development of a Testing Method for the Identification of Friction Coefficients for Numerical Modeling of the Shear-Clinching Process**

M. Müller, U. Vierzigmann, R. Hörrhold, G. Meschut and M. Merklein

469

### **Notch Shear Cutting of Press Hardened Steels**

M. Feistel, M. Krinninger, R. Golle and W. Volk

477

### **On the Solid Bonding Phenomena in Linear Friction Welding and Accumulative Roll Bonding Processes: Numerical Simulation Insights**

D. Campanella, G. Buffa, L. Fratini and M. Merklein

485

### **Solid State Recycling of Aluminium Sheet Scrap by Means of Spark Plasma Sintering**

D. Paraskevas, K. Vanmeensel, J. Vleugels, W. Dewulf and J.R. Duflou

493

## **Chapter 10: Planning**

### **Selection, Modeling and Prediction of Life of Stripper of Compound Die**

S. Kashid, S. Kumar and H.M. Hussein

501

### **New Diagnostic Techniques for an Automated Hemming Validation of Hang-On Parts**

C. Kaiser, M. Zubeil, K. Roll and W. Volk

509

### **Sheet Metal Laser Cutting Tool Path Generation: Dealing with Overlooked Problem Aspects**

R. Dewil, P. Vansteenveld and D. Catrysse

517

### **Minimization of Energy Consumptions by Means of an Intelligent Production Scheduling**

E. Mariano, F. Nucci, A. Del Prete and A. Grieco

525

## **Chapter 11: MatProFuture**

### **Cranial Reconstruction Using Double Side Incremental Forming**

B. Lu, D.K. Xu, R.Z. Liu, H.A. Ou, H. Long and J. Chen

535

### **Fracture Prediction in Sheet Metal Stamping Based on a Modified Ductile Fracture Criterion**

R. Zeng, L. Huang and J.J. Li

543

### **Finite Element Analysis on Plastic Deformation Behaviors of Ti-3Al-2.5V Tubes under Axial Compression**

T. Huang, M. Zhan, J.Q. Tan, J. Guo and H. Yang

551

### **Numerical Study on the Comparison of Deformation Characteristics during the Fine Blanking Process of Spur Gears and Helical Gear**

W.T. Xia, H.J. Mao, L. Hua and Y.X. Liu

559
