

# Table of Contents

## Preface

## Chapter 1: Joining by Forming

<b>New Approach for Versatile Self Piercing Riveting: Joining System and Auxiliary Part</b>	3
F. Kappe, M. Bobbert and G. Meschut	
<b>Influence of the Rivet Coating on the Friction during Self-Piercing Riveting</b>	11
B. Uhe, C.M. Kuball, M. Merklein and G. Meschut	
<b>Investigation of Different Joining by Forming Strategies when Connecting Different Metals without Auxiliary Elements</b>	19
D. Römisich, M. Kraus and M. Merklein	
<b>Friction Characterisation for a Tumbling Self-Piercing Riveting Process</b>	27
S. Wituscheck and M. Lechner	
<b>Modeling of Stiffness Anisotropy in Simulation of Self-Piercing Riveted Components</b>	35
M. Otroshi, G. Meschut, C.R. Bielak, L. Masendorf and A. Esderts	
<b>Determination of the Interface Structural Resolution of an Industrial X-Ray Computed Tomograph Using a Spherical Specimen and a Gap Specimen Consisting of Gauge Blocks</b>	41
M. Busch and T. Hausotte	
<b>Temperature Dependent Modelling of Fibre-Reinforced Thermoplastic Organo-Sheet Material for Forming and Joining Process Simulations</b>	49
B. Gröger, A. Hornig, A. Hoog and M. Gude	
<b>A Finite Plasticity Gradient-Damage Model for Sheet Metals during Forming and Clinching</b>	57
J. Friedlein, J. Mergheim and P. Steinmann	
<b>Effect of Different Tool Geometries on the Mechanical Properties of Al-Al Clinch Joints</b>	65
L. Ewenz, J. Kalich, M. Zimmermann and U. Füssel	
<b>Load Path Transmission in Joining Elements</b>	73
C. Steinfelder, S. Martin, A. Brosius and T. Tröster	
<b>Development of a Method for the Identification of Friction Coefficients in Sheet Metal Materials for the Numerical Simulation of Clinching Processes</b>	81
M. Rossel, M. Böhnke, C.R. Bielak, M. Bobbert and G. Meschut	
<b>A Method for Characterization of Geometric Deviations in Clinch Points with Computed Tomography and Transient Dynamic Analysis</b>	89
D. Köhler, B. Sadeghian, R. Kupfer, J. Troschitz, M. Gude and A. Brosius	
<b>A First Approach for the Treatment of Galvanic Corrosion and of Load-Bearing Capacity of Clinched Joints</b>	97
S. Harzheim, C. Steinfelder, T. Wallmersperger and A. Brosius	
<b>Approach for the Automated Analysis of Geometrical Clinch Joint Characteristics</b>	105
C. Zirngibl and B. Schleich	
<b>Surface Treatment to Promote Joining of Glass Fiber Reinforced Plastic and AZ31 Magnesium Alloy for Fiber Metal Laminates via Hot Metal Pressing</b>	111
L. Lizzul, M. Sorgato, A. Ghiotti and S. Bruschi	
<b>New Joining Concepts for Self-Pierce Riveting</b>	119
L.M. Alves, R.M. Afonso and P.A.F. Martins	
<b>Numerical and Experimental Fracture Mechanical Investigations of Clinchable Sheet Metals Made of HCT590X</b>	127
D. Weiß, B. Schramm and G. Kullmer	

## Chapter 2: Forming

<b>Stretch Forming of Ti-6Al-4V Hybrid Parts at Elevated Temperatures</b>	135
J. Hafenecker, R. Rothfelder, M. Schmidt and M. Merklein	

<b>Introducing Residual Stresses on Sheet Metals by Slide Hardening under Stress Superposition</b>	
J. Lehmann, H. Chen, M. Kruse and N. Ben Khalifa	143
<b>Assessment of Springback Behaviour of 800-1200 MPa Dual-Phase Steel Grades</b>	
U. Durmaz, S. Heibel, T. Schweiker and M. Merklein	151
<b>Functional Gradation in Precipitation Hardenable AA7075 Alloy by Differential Cooling Strategies</b>	
E. Scharifi, M. Roscher, S. Lotz, U. Weidig, E. Jägle and K. Steinhoff	159
<b>Towards Automatic Part Identification in Sheet Metal Workshops</b>	
A.T. Garcia, N. Levichev, V. Vorkov, D. Cattrysse and J.R. Duflou	167
<b>Effect of Stretching on Springback in Rotary Stretch Bending of Aluminium Alloy Profiles</b>	
J. Ma, T. Welo, J. Blindheim and T. Ha	175
<b>Investigation of the Influence of a Superimposed Oscillated Forming Process on Forming Characteristics</b>	
P. Müller, S. Hübner, D. Rosenbusch, H. Vogt and B.A. Behrens	181

## Chapter 3: Incremental Forming

<b>Development of Magnetic Field-Assisted Single-Point Incremental Forming</b>	
M. Gucciardi, D. Benson, L. Fratini, G. Buffa and H. Yamaguchi	189
<b>Multistep Incremental Forming beyond 100°</b>	
H. Vanhove and J.R. Duflou	195
<b>On the Effectiveness of SPIF Process to Re-Form End-of-Life Components as Compared to Conventional Forming Approach</b>	
O. Zaheer, G. Ingara, R. Di Lorenzo and L. Fratini	201
<b>Incremental Roller-Flanging of Thick Metal Sheets</b>	
A. Ghiootti, B.M. del Tito, E. Simonetto, S. Bruschi and S. Filippi	209
<b>Geometry Compensation Methods for Increasing the Accuracy of the SPIF Process</b>	
Y. Carette, M. Vanhulst and J.R. Duflou	217

## Chapter 4: Welding and Bonding

<b>Influence of Roughness and Curing Temperature on the Strength of Aluminum Adhesively Bonded Joints</b>	
G. Rotella, M.R. Saffioti, M. Sanguedolce and L. Filice	227
<b>Laser Welding of Laser Powder Bed Fusion Manufactured Inconel 718: Microstructure and Mechanical Properties</b>	
T. Rautio, J. Mäkkikangas, J. Kumpula, A. Järvenpää and A. Hamada	234
<b>Laser Welding of Laser Powder Bed Fusion (LPBF) Manufactured 316L Stainless Steel Lap Joint</b>	
J. Mäkkikangas, T. Rautio, J. Jalava-Kanervio, A. Mustakangas and A. Järvenpää	242
<b>Microstructural Evolution and Tensile Strength of Laser-Welded Butt Joints of Ultra-High Strength Steels: Low and High Alloy Steels</b>	
M. Hietala, A. Hamada, M. Keskitalo, M. Jaskari, J. Kumpula and A. Järvenpää	250
<b>Microstructure and Formability of Laser Welded Dissimilar Butt Joints of Austenitic-Ferritic Stainless Steels</b>	
M. Keskitalo, A. Hamada, M. Hietala, M. Jaskari and A. Järvenpää	258

## Chapter 5: Characterisation

<b>Investigation of the Micro Hardness at the Cut Surface of Fine Blanked Parts with Variation of Sheet Material and Cutting Temperature</b>	
I.F. Weiser, A. Feuerhake and T. Bergs	269
<b>Material Model for the Production of Steel Fibers by Notch Rolling and Fulling</b>	
A. Biallas and M. Merklein	277
<b>The Frictional Force between Slug and Die in Shear Cutting after Material Separation</b>	
J. Stahl, I. Pätzold, L. van den Bosch, A. Kindsmüller, R. Golle and W. Volk	285

<b>Fracture Characterisation by Butterfly-Tests and Damage Modelling of Advanced High Strength Steels</b>	
B.A. Behrens, K. Brunotte, H. Wester and M. Dykier	294
<b>Determination of the Biaxial Anisotropy Coefficient Using a Single Layer Sheet Metal Compression Test</b>	
P. Hetz, M. Lenzen, M. Kraus and M. Merklein	303
<b>Local Strain Measurement in Tensile Test for an Optimized Characterization of Packaging Steel for Finite Element Analysis</b>	
F. Knieps, M. Köhl and M. Merklein	309
