

Table of Contents

Preface

Organizers

I. Material Science

Spin and Orbital Magnetic Moment of Pd₃Co Evaluated by X-Ray Magnetic Diffraction Experiment	
M. Ito, Y. Oba, A. Sato, K. Suzuki, T. Tadenuma, R. Nagayasu, H. Sakurai and H. Adachi	3
Spin Density Distribution of YTiO₃ Observed by X-Ray Magnetic Diffraction	
K. Suzuki, M. Ito, N. Tsuji, H. Adachi, H. Nakao, Y. Murakami, Y. Taguchi, Y. Tokura, E. Nishibori and M. Sakata	7
Magnetic Compton Profile Measurement of Thin Films	
H. Nishino, R. Yamaki, M. Itou, Y. Sakurai, H. Sakurai and M. Ito	11
Ferromagnetic Resonance Frequency of Single-Layer Magnetic Metal Films with Lattice Distortion	
N. Shigeno, S. Negishi, K. Hoshi, T. Fukunaga, S. Furusawa and H. Sakurai	15
Effect of Annealing on Sub-Gap Absorption in Amorphous InGaZnO₄ Films	
T. Gotoh, K. Kawarai, H. Wakabayashi and K. Kaneda	19
Improvement of Crystallization Rate in Post-Annealed Ge₂Sb₂Te₅ Films	
K. Kawarai and T. Gotoh	23
Ionic Conductivity of Polycrystalline Li₂Ge_xSi_{1-x}O₃ (x = 0.0~1.0)	
S. Furusawa and S. Enokida	27
Structural Analysis of Rf Sputtered Er Doped Ta₂O₅ Films	
J.P. Bange, M.K. Singh, K. Kano, K. Miura and O. Hanaizumi	32
Preparation of CaTiO₃:Pr Phosphor by Using CaB₂O₄ as a Flux	
T. Kyômen, K. Hirozumi and M. Hanaya	38

II. Chemical Science and Technology

Solvent-Free Synthesis of Siloxanes and their Usage as Potential Cross-Coupling Reagents	
M. Unno, R. Tanaka, D. Obinata, M. Endo, T. Sakurai, S. Ojima, T. Katayama and K. Fugami	43
Preparation of Anisotropic Chitosan Hydrogel with Birefringence and Analysis of Gel Formation Process	
N. Tomita, Y. Maki, T. Yamamoto and T. Dobashi	48
Thermosensitive Micelles Composed of Poly(lactide)-g-Poly(NIPAM-co-HEMA) Graft Copolymers	
T.M. Quynh, M. Yoneyama, Y. Maki, N. Nagasawa and T. Dobashi	51
Nano-Platelet Structure of Clay Materials Observed by Atomic Force Microscope	
M. Kakiage, R. Takamatsu, H. Uehara, T. Yamanobe and K. Suzuki	57
Synthesis and Properties of Fluorescent Biological Molecules Labeled with Novel Silylated Perylene Derivative	
Y. Sato, A. Ozaki, M. Hosaka, T. Moriguchi and K. Shinozuka	63
Effect of Organometallic Compounds on the Formation of Carbon Nanostructures by Pulsed Electric Discharge of Fluorine-Containing Organic Liquid between Metal Electrodes	
K. Hosoi and S. Kuroda	67
Control of Methanol Crossover Using a Perforated Metal Sheet for DMFC Application	
T. Tsujiguchi, N. Masumi, A. Kawakubo and N. Nakagawa	71
A Key Factor for the Actual Application of a Vapor Feed Passive DMFC Operated with High Concentration of Methanol	
M.A. Abdelkareem and N. Nakagawa	78
Relationship between Dielectric Characteristic by DEP Levitation and Differentiation Activity for Stem Cells	
Y. Hirota and M. Hakoda	84

Application of Micro-Metal Textile for Flexible Dye-Sensitized Solar Cell K. Kakiage, E. Fujimura, M. Abe, H. Shinoda, T. Kyômen and M. Hanaya	92
The Hydrophobicity of Micro Water Pool and the Interfacial Fluidity of PC-Based W/O Microemulsion Droplet Involved with Reactivity of Phospholipase A₂ K. Yamazaki and M. Imai	100

III. Nano-Science and Technology

Simple Nanoimprint Lithography with 50 nm Resolution Using Vacuum Packing K. Itoh, H. Hirai, T. Ando, K. Takagi and K. Noguchi	111
Fabrication of Nanometer Sized Si Dot Arrays Using Ar Ion Milling with Calixarene Resist Dot Arrays T. Tamura, Y. Tanaka, T. Akahane, Y. Yin and S. Hosaka	116
Self-Assembled Nanodot Fabrication by Using Diblock Copolymer M. Huda, Y. Yin and S. Hosaka	120
Guide Pattern for Long-Range-Order Nanofabrication of Self-Assembled Block Copolymers T. Akahane, M. Huda, Y. Yin and S. Hosaka	124
Prototype of Illumination-Collection Mode Scanning Near-Field Optical Microscopy and Raman Spectroscopy with Gold Inner-Coated Aperture-Less Pyramidal Probe S. Hosaka, H. Koyabu, Y. Aramomi, H. Sone, Y. Yin, E. Sato and K. Tochigi	129
Prototype of Frame-Type Cantilever for Biosensor and Femtogram Detection H. Sone, S. Ichikawa, Y. Matsubara, M. Suzuki, H. Okano, T. Izumi and S. Hosaka	134
Large Resistance Ratio for High Reliability of Multi-Level Storage in Phase-Change Memory Y. Yin, T. Noguchi, H. Ohno and S. Hosaka	140
Proposed Phase-Change Memory with a Step-Like Channel for High-Performance Multi-State Storage Y. Yin and S. Hosaka	145

IV. Photonics Device and Technology

Mach-Zehnder Type Thermo-Optic Switch with Antenna-Coupled Y-Junction Fabricated by Selective Photobleaching of Polysilane Films O. Hanaizumi, K. Miura, Y. Hiratani, Y. Machida and M. Uehara	153
Polarization Control of SOA-Fiber Ring Laser Y. Takahashi and R. Niida	157
Theoretical Analysis of Photonic Band Gaps and Defect Modes of Novel Photonic Crystal Waveguides Consisting of Si-Ion Implanted SiO₂ Using the Finite-Difference Time-Domain Method A.V. Umenyi, S. Kawashiri, K. Miura and O. Hanaizumi	162
Design and Fabrication of Novel Photonic Crystal Waveguide Consisting of Si-Ion Implanted SiO₂ Layers A.V. Umenyi, M. Honmi, S. Kawashiri, T. Shinagawa, K. Miura, O. Hanaizumi, S. Yamamoto, A. Inouye and M. Yoshikawa	168
Demonstration of Light-Emitting Two-Dimensional Photonic Crystals Composed of Silicon-Rich Silicon-Dioxide Thin Films K. Miura and O. Hanaizumi	173

V. Novel Measurement and System Technology

Tilt Mechanism for Precision Control of Down-Slope Component of Gravitational Force for Micro Force Generation K. Maru, W. Khunnam, L. Hu, R.S. Lu, P.P. Yupapin and Y. Fujii	179
Microforce Material Tester Using Small Pendulum J. Ozawa, K. Maru, K. Kobayashi and Y. Fujii	183

Interdigital Ring Coupler Sensor for Parameter Estimation of Moving Objects T. Miwa and Y. Yamakoshi	190
A Design Method for Two-Degree-of-Freedom Multi-Period Repetitive Control Systems K. Yamada, N. Nakazawa, I. Murakami, Y. Ando, T. Hagiwara, S. Yamamoto, N.L.T. Nguyen and T. Sakanushi	194
A Design Method for Modified PID Control Systems to Attenuate Unknown Disturbances T. Hagiwara, K. Yamada, I. Murakami, Y. Ando and S. Matsuura	211
A Design Method for Stabilizing Modified Smith Predictors for Multiple-Input/Multiple- Output Time-Delay Plants K. Yamada, N.T. Mai, Y. Ando, T. Hagiwara, I. Murakami and T. Hoshikawa	221
A Novel Thermoelectric System with Conductive Metal Rods and its Effective Seebeck Coefficients T. Sasaki, Y. Kondoh, O. Hanaizumi and M. Goto	235

VI. Information and Communication Engineering

Architecture of Wideband High-Efficiency Envelope Tracking Power Amplifier for Base Station M. Kaneta, A. Kanbe, H. Hirata, T. Shimura, K. Yamagishi and H. Kobayashi	241
High-Speed Data Transmission Techniques Using Raised Cosine Signaling Y. Yuminaka	252
High-Speed Multiple-Valued Data Transmission Based on Time-Domain Pre-Emphasis Techniques Y. Yuminaka and K. Henmi	260
Dynamics Simulation of Microbubbles in Ultrasonic Wave Field Considering the Secondary Bjerknes Force T. Miwa and Y. Yamakoshi	271
