

# Table of Contents

## Preface and Committees

## Chapter 1: Adaptive/Active Textiles

<b>Smart Textiles: A Strategic Perspective of Textile Industry</b>	
L. Affatato and C. Carfagna	1
<b>Development of Piezoresistive Fiber Sensors, Based on Carbon Black Filled Thermoplastic Elastomer Compounds, for Textile Application</b>	
F.J. Clemens, B. Koll, T. Graule, T. Watras, M. Binkowski, C. Mattmann and I. Silveira	7
<b>Integration of OLEDs in Textiles</b>	
S. Janietz, B. Gruber, S. Schattauer and K. Schulze	14
<b>The Concept of Mood Changing Garments Made from Luminescent Woven Fabrics and Flexible Photovoltaics “MoodWear”</b>	
G.K. Stylios and D.Y. Yang	22
<b>Shape Memory Polymers in Textiles</b>	
J.L. Hu and J. Lu	30
<b>Cosmeto-Textiles: State of the Art and Future Perspectives</b>	
P. Persico and C. Carfagna	39
<b>Halochromic Textile Materials as Innovative pH-Sensors</b>	
L. Van der Schueren and K. de Clerck	47
<b>Integration of Small Diameter Wire Form SMA for the Creation of Dynamic Shape Memory Textiles</b>	
P. Dyer	53
<b>Development of Paper Transistor Using Carbon-Nanotube-Composite Paper</b>	
Y. Kawamura, S. Hayashi, Y. Shinde and T. Oya	59

## Chapter 2: E-Textiles

<b>Textile Sensor Applications with Composite Monofilaments of Polymer / Carbon Nanotubes</b>	
A. Ferreira, F.B.N. Ferreira and M.C. Paiva	65
<b>The Power Conversion Characteristics of Woven Organic Photovoltaic Wire Fabrics</b>	
A. Agrawal, Y.K. Kim, P.D. Calvert and M. Lee	71
<b>Feasibility of Printing Woven Humidity and Temperature Sensors for the Integration into Electronic Textiles</b>	
T. Kinkeldei, G. Mattana, D. Leuenberger, C. Ataman, F.M. Lopez, A.V. Quintero, D. Briand, G. Nisato, N.F. de Rooij and G. Tröster	77
<b>Essential Building Blocks of Fibrous Transistors, Part I: Gate Layer</b>	
L. Rambausek, B. Van Genabet, A. Schwarz, E. Bruneel, I. Van Driessche and L. Van Langenhove	83
<b>Improvements of Smart Garment Electronic Contact System</b>	
I. Parkova, A. Vališevskis, I. Ziemele, U. Briedis and A. Vilumsone	90

## Chapter 3: Manufacturing and Applications

<b>Design and Optimization of an Injection-Moldable Force-Fit Interconnection Module for Smart Textile Applications</b>	
E.P. Simon, M. Fröhlich, C. Kallmayer and K.D. Lang	96
<b>Thigmo-Morphogenetic Fiber Composites Embedded with Shape Memory Alloys</b>	
M. Mingallon and S. Ramaswamy	102
<b>Research through Design: A Way to Drive Innovative Solutions in the Field of Smart Textiles</b>	
M. Toeters, M. ten Bhömer, E. Bottemberg, O. Tomico and G. Brinks	112
<b>Washable Screen Printed Textile Antennas</b>	
I. Kazani, M.L. Scarpello, C. Hertleer, H. Rogier, G. de Mey, G. Guxho and L. Van Langenhove	118
<b>Two Novel Techniques of Fabric Sensing Using Carbon Nanofibers</b>	
A. Santos, P. Arquer, M. Prado, M.P. Merino and B. Ruiz	123

<b>Smart Textiles with Biosensing Capabilities</b>	
S. Pasche, B. Schyrr, B. Wenger, E. Scolan, R. Ischer and G. Voirin	129
<b>Respiratory Volume Estimation by a Stretchable Textile Sensor</b>	
Y. Enokibori, Y. Ito, K. Ikeda, A. Suzuki, Y. Shimakami, T. Kawabe and K. Mase	136
<b>Classified Catalogue for Textile Based Sensors</b>	
P. Bosowski, C. Husemann, T. Quadflieg, S. Jockenhövel and T. Gries	142
<b>Durable Self-Healing Super-Liquid-Repellent Fabrics</b>	
H.X. Wang, H. Zhou and T. Lin	152
<b>Prosys-Laser: Smart Laser Protective Textile Systems</b>	
G. Dammacco, D. Wenzel and C. Hennigs	156
<b>Structural Conformability and Fluid Uptake Properties of Smart Wound Dressings</b>	
M. Uzun, S. Anand and T. Shah	163
