

Table of Contents

Preface and Organizing Committee

Chapter 1: Thermodynamics

Thermodynamic Behaviour of the Solar Updraft Tower: A Parametric Model for System Sizing P. Cottam, P. Duffour and P. Fromme	3
The Impact Analysis of Air Compressibility in Solar Chimney Power Station Y.S. Chen, W.H. Chen and Y.J. Pang	9
A Compressible Transient Model of the Solar Chimney and Heat Collector G. Li, H.L. Huang, H. Zhang, J.B. Liu and X. Chen	15

Chapter 2: Structural Aspects

Optimization of Solar Updraft Chimneys by Nonlinear Response Analysis R. Harte, M. Graffmann and W.B. Krätzig	25
Design of Solar Towers for Extreme Storm Conditions and for Vortex Excitation F. Lupi, H.J. Niemann, C. Borri and U. Peil	35
Construction Analysis of the Chimney of Solar Thermal Power Station S.W. Fang and X.F. Yuan	41
Time-Varying Pressure Distribution on Solar Updraft Tower (an Axisymmetric Structure) Induced by a Translating Downburst X.P. Zhou, P. Qin, C. Liu and G.Y. Zhao	47

Chapter 3: Review

A Realistic Growth Path for Solar Wind Power W. Francke, R. de Richter, O. Petersen and J. Petersen	57
---	----

Chapter 4: Hybrid or Alternative Energy Concepts

Urban Solar Updraft Tower Integrated with Hi-Rise Building – Case Study of Wuhan New Energy Institute Headquarter X.H. Liu, Q.Y. Chen, H. Liu, H. Yu and F.Y. Bie	67
Energy from Convective Vortices L. Michaud and B. Monrad	73
Effects of Non-Uniform Hot Junction Temperature Distribution on the Outputs of Thermoelectric Power Generation System B.T. Admasu, X.B. Luo, J.W. Yao and T.Z. Ming	87
The Studies of Optimal Arranging of the Solar Photovoltaic Battery Array and Optimal Matching of Power System for a Parking Garage J.L. Xu, Q.R. Yang, M. Du and Z.Q. Chang	99
