

Table of Contents

Preface

Phase Transformations

I.

Study of Phase Transitions by Transient Methods

L. Kubičár, V. Vretenár and V. Boháč

3

Solid-State Transformations in Metal Iodides

S.C. Hansen and D. Kobertz

29

The Development of “Macroscopic Composition Gradient Method” and its Application to the Precipitate-Nucleation Near the Edge of Miscibility Gap

T. Miyazaki

43

Identification and Characterization of Phase Transformations by the Resistivity Measurements in Mg-RE-Mn Alloys

I. Stulíková and B. Smola

57

Hydrogen-Induced Phase Transformations in Mg-Ni Alloys

P. Novák, D. Vojtech, V. Knotek, J. Šerák and T. Fabián

63

Diffusion Processes Controlling the Solid State Transformations, Processes at Interphase Boundaries

II.

Kinetics of Phase Transformations in Mg₂Ni-H System

J. Čermák, L. Král, B. David and I. Stloukal

71

On Specific Phase Transitions to the Compound-Like Impurity Nanosegregation Structures at Dislocations and Grain Boundaries in Metals and their Influence on Diffusion-Assisted Processes

Y.S. Nechaev

91

Diffusion of Light Elements in BCC, FCC and HCP Metals

V.B. Vykhodets, T.E. Kurenniykh, A.S. Lakhtin and A.Y. Fishman

119

Analysis of Possibilities of Fisher’s Model Development

V.V. Popov

133

Structural Evolution of Al-Cr Alloy during Processing

D. Vojtech, A. Michalcová and P. Novák

145

Effect of Dissolution on the Ni₃Sn₄ Growth Kinetics at the Interface of Ni and Liquid Sn-Base Solders

V.I. Dybkov

153

On the Physicochemical Mechanism of the Influence of Preliminary Mechanical Activation on Self-Propagating High-Temperature Synthesis

B.B. Khina and B. Formanek

159

Solid State Transformations in Cu/In-48Sn/Cu Diffusion Soldered Interconnections

J. Wojewoda

165

Solid Phase’s Transformations in Boron Carbide Based Composites during Heat Treatment

L.A. Kommel and E. Kimmari

175

Diffusional Growth Kinetics of Boride Layers on Iron-Chromium Alloys

V.I. Dybkov, L.V. Goncharuk, V.G. Khoruzha, K.A. Meleshevich, A.V. Samelyuk and V.R. Sidorko

181

Passive State Degradation of Stainless Steel Welds

V. Číhal, M. Blahetová, Z. Krhutová, S. Lasek and E. Kalabisová

189

Assessment of Heterogeneity of Welded Joint of Two Different Metals by Modeling of Diffusion of Substitution Elements

L. Řeháčková, J. Kalousek, J. Dobrovská, Z. Dostál and K. Stránský

193

Effect of Cooling Rate on Structural and Chemical Microheterogeneity of IN 738LC Nickel Based Superalloy

J. Dobrovská, S. Dočekalová, V. Dobrovská and K. Stránský

201

Thermodynamics of Phase Transformations

III.

Application of Statistical Moment Method to Thermodynamic Properties and Phase Transformations of Metals and Alloys

K. Masuda-Jindo, V. Van Hung and P.E.A. Turchi

209

The Analytical and Computational Thermodynamics of Closed Binary Systems

A.L. Udovsky

241

Statistical Thermodynamics and Ordering Kinetics of D0₁₉-Type Phase: Application of the Models for H.C.P.-Ti–Al Alloy

T.M. Radchenko, V.A. Tatarenko and H. Zapolsky

283

A Semi-Empirical Parameterization of Interatomic Interactions Based on the Statistical-Thermodynamic Analysis of the Data on Radiation Dif-fraction and Phase Equilibria in F.C.C.-Ni–Fe Alloys

S.M. Bokoch and V.A. Tatarenko

303

Vaporization and Thermochemical Study of SrCeO₃(s) and SrCe_{0.95}Yb_{0.05}O₃(s) by Knudsen Effusion Mass Spectrometry

M. Miller and A. Matraszek

319

Calculation of Some Thermodynamic Parameters of Non-Ideal Solutions

M.M. Asadov and K.M. Akhmedly

331

Is the Compensation Effect a Phase Transition?

P. Lejček

339

Manifestations of Short-Range and Long-Range Parts of Interatomic Potentials In Rearrangement Processes of Multicomponent Condensed Systems

A.Y. Zakharov

347

Stress- or Deformation-Induced Transformations, Displacive Transformations

IV.

A Short Review of Shape Memory Alloys Thermomechanical Models

C. Lexcellent and E. Gibeau

355

Stress Impact on Reactive Diffusion in Nano-Structures of Spherical Symmetry

C.B. Ene, C. Nowak and G. Schmitz

367

Formation of NiAl Shape Memory Alloy Thin Films by a Solid-State Reaction

V.G. Myagkov, L.E. Bykova, S.M. Zharkov and G.N. Bondarenko

377

Effects of Temperature and Strain Rate on the Evolution of Thickness of Transformed Adiabatic Shear Band

X.B. Wang

385

Effects of Omega Phase on Elastic Modulus of Ti-Nb Alloys as a Function of Composition and Cooling Rate

G.T. Aleixo, C.R.M. Afonso, A.A. Coelho and R. Caram

393

Martensitic Transformation Behavior and Shape Memory Effect of an Aged Ni-rich Ti-Ni-Hf High Temperature Shape Memory Alloy

X.L. Meng, Y.D. Fu, W. Cai, J.X. Zhang, Q.F. Li and L.C. Zhao

399

Atomic Structures Close to Possible Phase Boundary: By Surface, within a Thin Slab

V.

Those Properties of CMAs We Know Something About

V. Fournée, M.G. Barthés-Labrousse and J.M. Dubois

407

Computer Simulation of Polymer Chains in Confinement

A. Sikorski

451
