

Table of Contents

Preface

In Memoriam Professor J.A. Verö

F. Tranta, B. Verö and M. Káldor 1

Local-Nonequilibrium Effects in Rapid Solidification

S.L. Sobolev 5

On the Morphological Transition from Cellular to Planar Growth at High Solidification Velocity

A. Ludwig and W. Kurz 13

Influence of Melt Undercooling on the Microstructure of Fe-Ni Droplets Produced in the Cambridge 6.5 m Drop-Tube

A.F. Norman, F. Gärtner and A.L. Greer 21

Use of Texture Analysis for the Characterisation of Cu - 30 at.% Ni Droplets Solidified at Selected Undercoolings

F. Gärtner, A.F. Norman, K. Eckler, A.L. Greer and D.M. Herlach 29

Microstructural Development in Undercooled and Quenched Ni₃Al Droplets

H. Assadi, M. Barth, A.L. Greer and D.M. Herlach 37

Grain Refinement in Solidification of Undercooled Ni-Cu Melts

K. Eckler, M. Schwarz, A. Karma and D.M. Herlach 45

Microstructures of Rapidly Solidified Cu-Hf Alloys

B. Kuznicka, K. Haimann and W. Dudzinski 51

Microgravity Solidification of Immiscible Alloys

J.B. Andrews, L.J. Hayes, Y. Arikawa, J.S. O'Dell and A.B. Cheney 59

Eutectic Growth and the Influence of Gravity

R.W. Smith 67

Chill Casting of Al-Pb- and Al-Bi-Alloys in Aerogel Crucibles during a Parabolic Flight

G. Korekt and L. Ratke 81

Liquid Metal Processing Using the Drop Tower at ZARM, Bremen, Germany

M.C. Tunnicliffe, M. Kaya, W.M. Gallerneault, R.W. Smith and G. Campbell 89

A New Type of Drop Tube

M. Meier, O. Hinrichs and H.J. Rath 95

Polyurethane Foams Formed in a Microgravity Environment

K. Kück, S. Lutz and M. Meier 101

Influence of Gravitation on Growth Rate and Quality of Aqueous Soluble Crystals

V.A. Brailovskaya, V.V. Zilberberg and L.V. Feoktistova 109

Diffusion in Liquid Pb-Au Binary System

V.M. Holovey, N.N. Tkachenko, M.I. Holovey, P.P. Puga and D.B. Goer 113

Paratellurite Single Crystal Growth at Low Gradient Conditions

V.M. Holovey, N.N. Tkachenko, M.I. Holovey, P.P. Puga and D.B. Goer 119

The Numerical Modelling of Microsegregation in Alloy Steel Systems

D.H. Kirkwood 123

Morphology and Segregation Behaviour in Directionally Solidified Copper-Manganese Alloys with Compositions near the Melting Point Minimum

G. Zimmermann and A. Schievenbusch 133

Calculation of Phase Diagram and Solidification Paths of Ternary Alloys: Al-Mg-Cu

Y. Zuo and Y.A. Chang 141

The Effect of Temperature Gradient Zone Melting on Solute Profile during Solidification of 0.8 % C Steel

A. Turkeli and D.H. Kirkwood 149

Experimental Study and Simulation of Solidification in Composite-Added Microalloyed Steel Ingots

A. Stovpchenko 157

Crystal Growth Simulation: From Fractals to Compact Growth

L. Török 163

Calculation of Dendrite Tip Temperature during Constrained Growth

I. Kuti and A. Roósz 169

The Isothermal Dendritic Growth Experiment	179
M.E. Glicksman, M.B. Koss, L.T. Bushnell, J.C. LaCombe and E. Winsa	
Simulation of Side Branch Development in Thermal Dendritic Grains	191
R. Sasikumar and E. Jacob	
Instability of Coarse Microstructures during Equiaxed Growth	201
M. Rettenmayr and O. Pompe	
Dendritic Growth in Undercooled Melt with Forced Convection	209
Y. Miyata and T. Umemura	
Directional Solidification of Succinonitrile within the Porous Network of an Aerogel	215
K. Grosse and L. Ratke	
Microstructural Evolution during Directional Solidification of Superalloy CMSX-6	223
D. Ma and P.R. Sahm	
Three Dimensional Observation of Directional Solidification Front by Forced Decanting	229
D. Ma and P.R. Sahm	
Experimental Study of the Development of Sidearms in Dendrites	235
J. Dahlström and H. Fredriksson	
An Influence of the Mg Content on the Structural Composition of the Al-Zn-Cu-Mg Alloys	243
M. Warmuzek	
Evolution of the Microstructure during Solidification of Immiscible Alloys	251
L. Ratke	
Numerical Modelling of Microstructure Evolution in Castings of Immiscible Alloys	265
S. Drees and L. Ratke	
New Insight on the Solidification of Al-In Monotectic Alloy	271
B. Vinet and J.J. Favier	
Experimental Results to the Displacement of Droplets by the Solidification Front in Near Monotectic Alloys	277
H. Neumann and C. Kühtz	
The Effect of Convective Instability on Coupled Growth of Hypermonotectic Alloys	283
L.J. Hayes and J.B. Andrews	
Directional Solidification of Al-Al₃Ni Eutectic Alloys in an Aerogel Furnace	291
T. Buchholz, J. Alkemper, K. Murakami and L. Ratke	
Viscosity Investigations in Eutectics	297
F. Herwig and W. Hoyer	
Thermodynamics of Irregular Eutectic Growth	303
W. Wolczyński	
Influence of Control and Material Parameters on Regular Eutectic Growth and Interlamellar Spacing Selection	313
W. Wolczyński and B. Billia	
Interlamellar Spacing in Al-Si Eutectic Growth Controlled by Temperature Gradient	323
W. Wolczyński, B. Billia and K. Rabczak	
Gravity Influenced Convection in Al-Ni Melt	331
V. Mertinger, G. Szabó, P. Bárczy, Á. Kovács and G. Czél	
Influence of Release and Transport of Latent Heat on Solidification Behavior in Faceted Crystal	339
K. Kuribayashi, Y. Inatomi, S. Endoh and H. Sakuta	
Single Crystal Growth Mechanism of YBCO Superconductive Oxide	347
Y. Shiohara	
Evidence for a Coupled Growth of the Properitectic α-Ti and the Peritectic γ-TiAl in Binary Titanium Aluminides	355
J. Laakmann, P. Busse, S. Rüllenrath and F. Meissen	
The Effects of Vertical Magnetic Fields on Segregation in HgCdTe	363
D.A. Watring	
Permeabilities for Interdendritic Melt Flow through Equiaxed Aluminium Castings	369
C.J. Paradies, L. Arnberg, H.J. Thevik and A. Mo	
Deformation Behavior during Solidification of Steels and Aluminium Alloys	377
T. Nakagawa, P. Suvanchai, T. Okane and T. Umeda	
Formation of the Sulfide Inclusions during the Solidification of Cast Fe-Mn-C-S Alloys	385
A. Chojecki and T. Bogacz	

Displacement on the Surface Mould and Metal during the Solidification of Nodular Graphite Iron Castings	
Z. Gedeonová, S. Bodi, J. Dúl, G. Nándori and L. Vigh	391
Relation between the Volume Change during the Solidification of Lamellar and Ductile Cast Iron and the Crystallization Sequence	
G. Nándori	399
Experimental Determination of the Influence of Casting Conditions on the Solidification of Zinc Die Castings	
F. Klein and P. Wimmer	409
Numerical Simulation of the Solidification of Zinc Die Castings	
F. Klein, E. Pokora and J. Dúl	415
Experimental Study into the Mechanism of Formation of Cone of Crystals in a Steel Ingot	
I. Zigalo and Y. Pavlenko	423
A REM Tracer Study into Mechanism and Kinetics of Steel Ingot Solidification	
I. Zigalo, Y. Pavlenko and Y. Grishchenko	429
Solidification of In-Situ Aluminium Composites	
J.E. de Bie, L. Froyen, P. Lust and L. Delaey	435
Kinetic Diffusional Model of Transient Growth of Multi-Layer Nodular Grains	
E. Fraś, W. Kapturkiewicz and A.A. Burbielko	443
Diffuse Interface Approach to Crystal Nucleation	
L. Gránásy	451
Interfacial Phenomena during Melt Processing of Ceramic Particle-Reinforced Metal Matrix Composites Part I. Introduction (Incorporation) of Solid Particles into Melts	
G. Kaptay	459
Interfacial Phenomena during Melt Processing of Ceramic Particle-Reinforced Metal Matrix Composites Part II. Interfacial Force between a Spherical Particle and an Approaching Solid/Liquid Interface	
G. Kaptay	467
Method for Estimating Solid-Solid Interface Energies in Metal-Ceramic Systems: The Aluminium - Silicon Carbide System	
G. Kaptay	475
Development of Gas-Solid Structures at Various Orientations of the Solidification Front with Respect to the Earth Gravity Field	
V. Shapovalov	485
Nonequilibrium Crystal Growth and Kinetic Roughening in Greatly Undercooled Ge and Ge-2at%Sn	
D. Li, K. Eckler and D.M. Herlach	489
The Dynamic Tests of the UMC Capsule	
G. Czél, L. Papp and U. Kaczmarczik	495
The Prediction of the Microstructure of Cast Iron Using Thermal Analysis	
	503
Temperature Distribution of Transient Crystallizer	
M. Réger	511
On the Transition of Solidification Mechanisms in Highly Undercooled Germanium	
D. Li, K. Eckler and D.M. Herlach	517
