

# Table of Contents

**Preface****In Memoriam Prof. M. Káldor**

F. Tranta 1

**Nucleation in Undercooled Ge<sub>73.7</sub>Ni<sub>26.3</sub> Alloy Melt Induced by Ni, Cu and Si Clusters**

W.K. Wang, R.P. Liu, Z.H. Zhou, L.M. Cao and L.L. Sun 5

**Rapid Crystal Growth in Undercooled Hypoeutectic Cu-Sb Alloys**

J.R. Gao, N. Wang and B. Wei 13

**Solute Trapping in Highly Undercooled Succinonitrile-Acetone Alloys**

A. Ludwig, A. Schillings and G. Ehlen 19

**Columnar to Equiaxed Transition in a Refined Al-Cu Alloy under Diffusive and Convective Transport Conditions**

M.D. Dupouy, D. Camel, J.E. Mazille and I. Hugon 25

**Experimental Verification of the Solute Redistribution in Cellular/Dendritic Solidification of the Al-3.5Li and Fe-4.34Ni Alloys**

J. Kloch, B. Billia, T. Okane, T. Umeda and W. Wołczyński 31

**Microstructure and Microsegregation in LASER Resolidified Fe-Cu Alloys**

L. Ladeuille, D. Daloz, C. Barat, W. Kurz and G. Lesoult 37

**Determination of Mushy Zone Permeability in Equiaxed Al-Cu Alloys**

Ø. Nielsen, L. Arnberg, A. Mo and H.J. Thevik 43

**Modelling of Microsegregation of Binary Solid Solutions**

I. Kuti and A. Roósz 49

**Microstructures of Alloy Solidified in an Extremely Wide Range of Cooling Rates**

E. Hornbogen 57

**Twinned Feathery Grains and Related Morphologies in Aluminum Alloys**

S. Henry and M. Rappaz 65

**Effect of Microstructural Features on the Austempering Heat Treatment Processing Window**

H. Bayati and R. Elliott 73

**Investigation of Secondary Dendrite Arm Coarsening of Al-Cu-Si Alloy**

V. Rontó and A. Roósz 79

**The Effect of Convective Flow in Vertical Directional Solidification**

T. Mori, M. Li and H. Iwasaki 87

**Modeling Segregation and Convection during the Growth of Ternary Alloys under Terrestrial and Microgravity Conditions**

J.J. Derby, N. Ponde, V.F. de Almeida and A. Yeckel 93

**3D Simulation of Surface Tension Driven Interdendritic Convection and Microsegregation during Laser Surface Alloying**

E.W. Kreutz and N. Pirch 99

**Influence of Convection and Surface Effects on Macrosegregations in Eutectic and Peritectic Systems**

G. Ehlen, A. Schweizer, A. Ludwig and P.R. Sahm 105

**Effect of Grain Refinement on Macrosegregation in Direct Chill Semi-Continuous Casting of Aluminium Sheet Ingot**

A. Joly, G.U. Grün, D. Daloz, H. Combeau and G. Lesoult 111

**Interfacial Criteria to Avoid Pushing of Particles during Solidification of Metal Matrix Composites**

G. Kapta 121

**Hydrodynamics of Moving Structures during a Static Solidification Process**

C. Stomp, H. Combeau and B. Appolaire 127

**Behaviors of Bubbles in Front of a Solidifying Interface**

Z. Wang and K. Mukai 139

**Resolidification of Metal Matrix Composites in Microgravity**

L. van Vugt and L. Froyen 145

<b>Interfacial Forces and Energies Relevant to Production of Metal Matrix Composites</b>	151
G. Kaptay, E. Báder and L. Bolyán	
<b>Application of Interfacial Demarcation Technique under Solidification of Bi 1%Sb Alloy Containing ZrO<sub>2</sub> Particles</b>	157
N. Babcsán	
<b>Transition of Flake into Fibre Structure in Eutectic Al-Si</b>	161
R. Cupryś, B. Major and W. Wołczyński	
<b>Solidification Microstructure Investigation of a Ni-Ni<sub>3</sub>Si Eutectic Alloy</b>	167
S. Milenkovic and R. Caram	
<b>Containerless Solidification of Peritectic and Eutectic Ceramics Using Aero-Acoustic Levitator</b>	173
K. Nagashio, H. Takamura and K. Kurabayashi	
<b>Eutectic Mircrostructure Evolution in a Directionally Solidified Nb-Al Alloy</b>	179
C.T. Rios, S. Milenkovic and R. Caram	
<b>Formation of Austenite in Peritectic Fe-C-X Alloy</b>	185
E.P. Kalinushkin, E. Fraš, W. Kapturkiewicz, A.A. Burbelko and J. Sitalo	
<b>Effect of Liquid Phase Diffusion on the Mechanism of Peritectic Transformation in Alloy Steels</b>	191
E.P. Kalinushkin and Y. Taran	
<b>Peritectic Coupled Growth in Nd-Based Superconducting Oxides from Highly Undercooled Melt</b>	197
K. Nagashio, K. Kurabayashi and Y. Takamura	
<b>Monotectic Composite Growth with Fluid Flow</b>	203
C. Stöcker and L. Ratke	
<b>Effect of Convective Instability in Directionally Solidified Hypermonotectic Al-In Alloys</b>	209
L.J. Hayes and J.B. Andrews	
<b>Universal Multi-Zone Crystallizator, the ISS Oriented Hungarian Apparatus</b>	219
P. Bárczy	
<b>Thermal Behavior in Unidirectional Cooling of Some Materials under Microgravity</b>	229
M. Kudoh and T. Noguchi	
<b>Directional Solidification of Bi-Sn on USMP-4</b>	235
H. Stenzel, H. de Groh III, E. Leonardi, V. Timchenko and G. de Vahl Davis	
<b>Microgravity Solidification of Al-In Alloys</b>	247
J.B. Andrews, L.J. Hayes, Y. Arikawa and S.R. Coriell	
<b>Gravitational Influence on the Microstructure of Directionally Solidified Monotectic and Eutectic Alloys</b>	259
I. Aoi, M. Yoshida, S. Murao and H. Nakae	
<b>Solidification of Pb<sub>40</sub>Ni<sub>40</sub>P<sub>20</sub> Alloy on Board Chinese Recoverable Satellite</b>	265
L.L. Sun, Q.J. Wu, R.P. Liu, Z.X. Qin, Z.H. Zhou and W.K. Wang	
<b>Cellular Growth in Transparent Model Substances under Microgravity and Ground Based Conditions</b>	271
B. Kauerauf, G. Zimmermann and S. Rex	
<b>Investigation on Morphological Instability during Directional Solidification on a Sounding Rocket</b>	277
A.H. Weiss, G. Zimmermann, S. Rex and S.R. Coriell	
<b>Containerless Solidification of Undercooled Ag-Cu-Sb Alloy Droplets under Microgravity Conditions</b>	285
J.R. Gao and B. Wei	
<b>Effect of Direction of Solidification on the Dendritic Structure</b>	291
C. Pólska, K. Tomolya, J. Kováč, Z. Gácsi and M. Réger	
<b>Solidification of Anisotropic Semiconducting Material - Tellurium under Microgravity Conditions</b>	297
R.V. Parfeniev, I.I. Farbshtein, I.L. Shulpina, S.V. Yakimov, V.P. Shalimov, A.M. Turchaninov, A.I. Ivanov and S.F. Savin	
<b>Influence of Gravity on Microstructural Transitions in Directional Solidification on Refined Al-Ni Alloys at Low Growth Rates</b>	305
M.D. Dupouy, D. Camel and L. Deferm	
<b>The Effect of Gravitation Forced Convection on Structure of Al-Ni Eutectic</b>	309
V. Mertinger and P. Bárczy	

<b>Recent Theoretical Development on Solidification Processing with High Temperature Gradient</b>	
Y. Miyata and M. Takeda	317
<b>Modelling of Microsegregation</b>	
X. Doré and M. Rappaz	331
<b>Experimental and Numerical Investigation of Remelting Phenomena</b>	
M. Rettenmayr, O. Warkentin and M. Rappaz	339
<b>Mass Conservation for Microsegregation and Solute Redistribution in Cellular/Dendritic Solidification with Back-Diffusion</b>	
W. Wołczyński and J. Kloch	345
<b>Analytical Modelling of Solidification during Temperature Gradient TLP Diffusion Bonding</b>	
A.A. Shirzadi and E.R. Wallach	351
<b>Application of a Nodular Iron Microstructure Model for an Industrial Casting</b>	
M.I. Onsøien, P. Misic, Ø. Grong, Ø. Gundersen and A.L. Dons	361
<b>Modeling of Copper Microsegregation in Continuously Cast Steel Billets</b>	
M.N. Srinivasan and A.M. Shahhosseini	369
<b>Two-Phase Modelling of Mushy Zone Parameters Associated with Hot Tearing</b>	
I. Farup and A. Mo	377
<b>Modeling of the Solidification Process under Non-Steady-State Conditions</b>	
M. Réger and T. Réti	383
<b>Modelling of Solidification Microstructures</b>	
M. Rappaz, J.-. Desbiolles, C. Gandin, S. Henry, A. Sémorez and P. Thévoz	389
<b>Computer Simulation of the Various Types of Nonmetallic Inclusions Formation During Solidification of Low-Carbon Steels</b>	
T.T. Nghiem, A.V. Dub and A.F. Vishkarev	397
<b>Solidification of a Sphere Composed of Binary Alloys</b>	
T. Czibere, F. Karaffa and L. Kalmár	403
<b>Modelling of Nodular Cast Iron Graphite Growth in Solid State</b>	
E. Fraś, A.A. Burbelko and W. Kapturkiewicz	409
<b>Modeling and Testing the Thermal Behavior of UMC</b>	
J. Szőke, A. Roósz, B. Tolvaj and T. Roósz	415
<b>Recent Continuous Casting Technologies of Steel in Japan</b>	
T. Umeda	423
<b>Feeding Range of the Cast Steel</b>	
A. Chojecki and I. Telejko	435
<b>Development of Steel Plate - Cast Iron Hybrid Casting Process for Recycling of Low Level Radioactive Metal Waste</b>	
H. Nakamura, T. Hirabayashi, J. Akimoto, K. Takahashi, H. Shindo, D. Sakurai, A. Almansour, T. Okane and T. Umeda	441
<b>Comparison of the Semisolid Shear Behaviour of Al-7Si-0.35Mg Alloys Produced by Two Casting Methods</b>	
H. Wang, D.H. StJohn, C.J. Davidson and M.J. Couper	449
<b>Assessment of Metal/Mould Interfacial Heat Transfer during Solidification of Cast Iron</b>	
K.N. Prabhu and W.D. Griffiths	455
<b>Experimental and Numerical Investigations of Mould Filling of Thin Wall Horizontal Aluminium Castings</b>	
R. Van Tol, L. Katgerman and H.E.A. Van den Akker	461
<b>Interfacial Heat Transfer between a Solidifying Aluminium Alloy and a Coated Die Steel</b>	
C.P. Hallam, W.D. Griffiths and N.D. Butler	467
<b>Fabrication of 5052 Aluminum Alloy Thin Slab by Electromagnetic Casting and Mechanical Properties of Its Cold-Rolled Sheet</b>	
S. Kamado, T. Kosaka, Y. Kabayama, Y. Kojima, T. Muramatsu and M. Matsuo	473
<b>Investment Casting in Silica Aerogels</b>	
D. Tscheuschner and L. Ratke	479
<b>Application of Semi-Solid Forming to 2024 and 7075 Wrought Aluminum Billets Fabricated by the EMC Process</b>	
R.S. Rachmat, H. Takano, N. Ikeya, S. Kamado and Y. Kojima	487

<b>Thermomechanical Effects in DC Casting of Aluminium Alloy: A Numerical Benchmark Study</b>	
J.M. Drezet, A. Burghardt, H.G. Fjaer and B. Magnin	493
<b>Dimensional Changes of Cast Iron during Crystallisation at Different Mold Parameters</b>	
J. Dúl, Z. Gedeonová and G. Szalai	501
<b>Calorimetry of Undercooled Metals and Alloys</b>	
L. Battezzati, M. Baricco, A. Castellero, P. Perotto and P. Rizzi	507
<b>Specific Heat and Solidification of Undercooled Bi-Sb Alloy Melts</b>	
Z.H. Zhou, J.H. Zhao, L.L. Sun, D.Y. Dai and W.K. Wang	513
<b>Equilibria in the Ternary Fe-Al-N System</b>	
M.S. Yaghmaee, G. Kaptay and G. Jánosfy	519
<b>Rapid Compression Testing of Semi-Solid Alloy Slugs</b>	
P. Kapranos, H.V. Atkinson and D.H. Kirkwood	525
