

# Table of Contents

## Preface

<b>What to Learn from Solidification Research under Microgravity</b>	
P.R. Sahm and M.H. Keller	5
<b>Particle Engulfment and Pushing by Solidifying Interfaces (PEPSI)</b>	
D.M. Ţăfărescu, D. Shangguan and P. von den Brincken	25
<b>Effect of Vibration of Crystal during Bridgman Growth under Microgravity Conditions</b>	
G.A. Dolgikh, A.I. Feonychev, N.R. Storozhev and E.V. Zharikov	43
<b>Scientific Basis for the Isothermal Dendritic Growth Experiment: A USMP-2 Space Flight Experiment</b>	
M.E. Glicksman, M.B. Koss, R.C. Hahn, A.C.R. Veloso, A. Rojas and E. Winsa	51
<b>Liquid Phase Processing of Oxide Dispersion Strengthened Aluminium Alloys</b>	
L. Froyen, S. De Bondt and A. Deruyttere	61
<b>Coarsening Processes in Liquid Dispersions</b>	
L. Ratke and D. Uffelmann	69
<b>Peculiarities of the Crystal Growth from the Vapour-Gas Phase in Microgravity</b>	
M.B. Shcherbina-Samoilova	85
<b>Structure of Xn-Pb-Fe Alloy Solidified under Microgravity</b>	
J. Jun, Z. Jiuzhou, Y.Y. Chen, L. Chengshou, J.F. Zhang, C. Xicen, S.M. Dugugev, T.B. Zhukova and I.A. Smirnov	93
<b>Sol-Gel Processing under Microgravity Conditions</b>	
M. Meier, O. Pamperin, H. Dittus and H.J. Rath	99
<b>Solidification of Refractory Metals in a Free Fall</b>	
V.G. Kutsinskii	107
<b>Horizontal Bridgman Growth of Al-Al<sub>3</sub>Ni(Cu) Off-Eutectics</b>	
P. Bárczy and J. Sólyom	113
<b>A Theory of Shapeforming Processes by Directional Solidification under Microgravity Conditions. Part I. Basic Principles - Planar Solid/Liquid Interface</b>	
G. Kaptay	125
<b>A Theory of Shapeforming Processes by Directional Solidification under Microgravity Conditions. Part II. Melts Covered by Films - Solidification of Aluminium Alloys</b>	
G. Kaptay and G. Lámer	147
<b>Experiment Facilities for Microgravity Missions</b>	
A. Ecker	159
<b>Universal Multizone Crystallizer (UMC) - A Precise Device for Space Experiments</b>	
P. Bárczy	171
<b>Columnar Dendritic Growth: Experiment and Theory</b>	
W. Kurz and R.N. Grugel	185
<b>Some Comments on the Present State of Micromodels for Dendritic Solidification</b>	
H.E. Exner, M. Rettenmayr and A. Roósz	205
<b>Simulation of the Dendritic Solidification during Single Roller Quenching</b>	
L. Gránásy and A. Ludwig	211
<b>Directional Solidification of Al-Cu Alloy</b>	
Y.Y. Chen, A. Geying, G. Genda and Q.C. Li	219
<b>Growth, Instability and Form of Faceted Crystals and Eutectics</b>	
I. Minkoff	227
<b>Crystal-Melt Interfacial Free Energy of Elements and Alloys</b>	
L. Gránásy and M. Tegze	243
<b>Surface Tension of Liquid Metals</b>	
I. Egry, G. Lohöfer, P. Neuhaus and S. Sauerland	257
<b>The Effect of Processing Conditions on Solidified Structures in Immiscible Systems</b>	
J.B. Andrews, R.A. Merrick, Z.B. Dwyer, A.L. Schmale, C.N. Buckhalt, A.C. Sandlin and M.B. Robinson	269
<b>Dominant Parameters of Separation in Metallic Monotectic Systems</b>	
H. Bach, T. Strangfeld, J. Proschmann, U. Kreft, L. Kemmerling, B. v. Hett and S. Sprenger	283

<b>Solidification Simulation of Castings by the Explicit Finite Element Method</b>	
Y. Wang, X.S. Zheng and J. Junze	293
<b>Computerized Analysis of the Measurable Processing Variables Influencing the Dimensional Accuracy of Casting during the Crystallization of Cast Iron</b>	
L. Vigh, J. Dúl and Z. Szabó	301
<b>On Surface Properties of Molten Aluminum Alloys of Oxidized Surface</b>	
G. Kaptay	315
