

# Table of Contents

## Preface, Scientific Committee

## Chapter 1: Concrete in Severe Conditions

<b>Field Tests of Cementitious Composites Suitable for Protective Structures and Critical Infrastructure</b>	
J. Štoller and P. Dvořák	3
<b>Fiber Reinforced Fly Ash Concrete and Extreme Fires</b>	
M. Broucek, M. Sejnoha and P. Reiterman	12
<b>Numerical Analysis of Effect of Cyclic Thermal Load on Concrete to Concrete Bonding</b>	
Y. Khmurovska, P. Štemberk, M. Petřík, I. Maruyama and O. Holčapek	18
<b>Long-Term Mechanical Properties of Fiber Reinforced Polymer Bars Exposed to Alkali Environment: Experimental Investigation</b>	
F. Girgle, L. Bodnárová, A. Matusikova, V. Kostiha, J. Prokeš and O. Januš	27
<b>Lightweight Concrete with Different Content of PP Fibers Exposed to High Temperature</b>	
M. Rydval, J. Kolisko and I. Simunek	33
<b>Performance of Dosage of Ceramic Chopped Fibers in Aluminous Cement-Based Composites after Exposure to High Temperatures</b>	
M. Jogl	38
<b>Resistance of Surface Layers of Concrete against Aggressive Environment</b>	
R. Pernicová and D. Dobíš	44
<b>Residual Mechanical Properties of Hybrid Fiber Reinforced HPC Exposed to High Temperatures</b>	
J. Fořt, A. Trník, D. Čítek and Z. Pavlík	52
<b>The Issue of Underground Depositing of High Radioactive Waste</b>	
M. Kočová, Z. Ríhová and J. Zatloukal	59
<b>Durability of Two Types of HPC at Sulphate Solution Environment</b>	
J. Pokorný, M. Pavláková and Z. Pavlík	66
<b>Assessment of Concrete Quality of Load-Bearing Structure of the Bridge across Otava River No. 121-006 near Zvikov after Fifty Years of Operation in Severe Environmental Conditions</b>	
S. Rehacek, D. Čítek, J. Kolisko and P. Huňka	72

## Chapter 2: Additives and Admixtures

<b>MgO Influence on the Fundamental Characteristics of Corundum Refractory Castables</b>	
L. Nevřívová	81
<b>The Crystalline Admixture Effect on Concrete and Cement Mortar Compressive Strength</b>	
J. Pazderka	87
<b>Early Stage Microstructure Development of Cement Paste Modified by Crystalline Admixture</b>	
V. Hrbek, V. Petráňová and J. Němeček	92
<b>Grindability of CFBC Fly Ash and High Temperature Fly Ash</b>	
R. Šulc, M. Vašák and J. Poláček	100
<b>The Speed of the Crystalline Admixture's Waterproofing Effect in Concrete</b>	
J. Pazderka and E. Hájková	108
<b>Synergistic Effect of High Temperature Fly Ash with Fluidized Bed Combustion Fly Ash in Cement Composites</b>	
M. Čažký and R. Hela	113

## Chapter 3: Advanced Binder Systems

<b>Research of the Interaction of Mechanically Activated Fillers Based on Silica and Cement Paste</b>	
V.V. Yadykina, A.M. Gridchin and A. Trautvain	121
<b>Monitoring of Kinetics of Pozzolanic Reaction</b>	
M. Čáchová, L. Scheinherrová, L. Kobera, M. Urbanová, J. Brus and M. Keppert	126
<b>Chemical Properties and Reactivity of CFBC Fly Ash</b>	
T. Váchal, R. Šulc, T. Janků and P. Svoboda	132
<b>Impact of Milling Intensifiers on Specific Surface Area of Cement</b>	
D. Dolák and K. Dvořák	140
<b>Influence of Use Fluidized Fly Ash Combined with High Temperature Fly Ash on Microstructure of Cement Composite</b>	
L. Osuská, R. Hela and M. Tažký	146
<b>Long-Term Development of Strength of Cement Paste with Fly Ash</b>	
O. Zobal and P. Paděvět	151
<b>Nanosilica Activated High Volume Fly Ash Concrete: Effects on Selected Properties</b>	
M. Labaj, R. Hela and I. Hájková	157
<b>Belit Cement Based on Concrete Recyclate</b>	
R. Magrla, D. Gazdič, K. Kulísek and K. Dvořák	163
<b>The Use of FBC Fly Ash in the Preparation of Portland Cement Clinker</b>	
K. Kulísek, D. Gazdič, K. Dvořák and M. Fridrichová	168
<b>Preliminary Study on Design of Biological Shielding Concrete - Selection of Binder</b>	
J. Kotátková and P. Reiterman	173

## Chapter 4: Sustainable Concrete and Composites

<b>High-Volume Municipal Solid Waste Incineration Bottom Ash Concrete</b>	
P. Reiterman, O. Holčapek, A. Krausová, M. Šyc and M. Keppert	181
<b>Influence of Mix Proportions on Water Absorption of RCA Concretes</b>	
R. Jaskulski, P. Las and W. Kubissa	187
<b>Effect of Microfillers on Selected Destructive and Nondestructive Mechanical Properties of Cement Mortars: Different Types of Recycled Materials</b>	
T. Plachý, P. Tesárek, L. Hlubocký, J. Hrůza, J. Fládr, J. Trejbal and Z. Prošek	195
<b>Carbonation Resistance of Fine Aggregate Concrete with Partial Replacement of Cement</b>	
T. Pavlů and M. Šefflová	201
<b>Probabilistic Modelling of Strength of Concretes with RCA</b>	
R. Jaskulski, A. Stępień and M. Sobocińska	207
<b>Dispersed Reinforcement Based on Natural Fibres Used in Cement Composites</b>	
J. Hroudová, M. Sedlmajer and M. Magdaléna	216
<b>Influence of Waste Crushed Limestone and Waste Micronized Marble Powder on Mechanical Properties of Cement Composite</b>	
Z. Prošek, J. Topič, K. Šeps and P. Tesárek	222
<b>The Carbonation Depth of Fine Recycled Aggregate Concrete</b>	
M. Šefflová and T. Pavlů	228

## Chapter 5: Experimental Methods and Measurement

<b>Application of Non-Destructive Methods for the Determination of Microstructural Parameters of Recycled Asphalt Concrete in Track Bed</b>	
M. Lidmila, T. Zikmund, J. Dvořák, J. Kaiser and V. Lojda	235
<b>Experimental Analysis of Strengthening of Dapped-End Beams</b>	
J. Rymeš, P. Štemberk and A. Kohoutková	241
<b>Evaluation of Crack Formation in Concrete and Basalt Specimens under Cyclic Uniaxial Load Using Acoustic Emission and Computed X-Ray Tomography</b>	
A.N. Kravcov, P. Svoboda, A. Konvalinka, E.B. Cherepetskaya, I.E. Sas, N.A. Morozov, J. Zatloukal and J. Kotátková	247

<b>Relationship between Compressive Strength and Young's Modulus of Cement Paste with Recycled Concrete Powder</b>	254
J. Topič, J. Trejbal, T. Plachý and Z. Prošek	
<b>Ultrasonic Pulse Method - Influence of Internal Compressive Stress on Results of Testing Calcium Silicate Bricks</b>	260
J. Brožovský	
<b>Laser-Ultrasonic Testing of the Structure and Properties of Concrete and Carbon Fiber-Reinforced Plastics</b>	267
A.N. Kravcov, P. Svoboda, A. Konvalinka, E.B. Cherepetskaya, A.A. Karabutov, D.V. Morozov and I.A. Shibaev	

## Chapter 6: High Performance Concrete

<b>Experimental and Numerical Analysis of Tensile Properties of Textile Reinforced Concrete with Steel Fibres</b>	275
J. Machovec, F. Vogel, S. Linforth and P. Konvalinka	
<b>Controlled Hardening of Silicate Binders for the Optimization of High Performance Composites</b>	281
Z. Bažantová, K. Kolář, P. Konvalinka, J. Litoš and M. Petrtýl	
<b>Comparison of Different Types of Glass Reinforcement for HPC Facade Elements from Mechanical and Economical Aspects</b>	286
L. Laiblová, T. Vlach, M. Ženíšek, A. Kumar and P. Hájek	
<b>Options of UHPC in the Czech Republic</b>	292
K. Křížová and R. Hela	
<b>Preparation of High-Performance Concrete for Adjusting of Possibility of its Usage in Building Practice</b>	298
M. Špak	
<b>Bond Characteristics of TRC Slabs Cured in Autoclave</b>	305
O. Holčapek	
<b>Dosage of Metakaolin in High Performance Concrete</b>	311
M. Ženíšek, T. Vlach and L. Laiblová	
<b>Effect of Placement Method on Projectile Impact Resistance of UHPFRC</b>	316
R. Lovichová, M. Mára and J. Fornůsek	

## Chapter 7: Other Special Concrete and Building Composites

<b>An Additively Manufactured Modular Metamaterial Composed of a Single Cell</b>	325
V. Nežerka, M. Somr, T. Janda, M. Doškář, J. Zeman and J. Novák	
<b>Foam Concrete Gravity Wedges as a Thermal Insulation of Flat Roofs</b>	331
K. Mikulica and M. Labaj	
<b>Gypsum Mortars with Different Types of Aggregates: Design and Properties</b>	337
M. Doleželová, J. Krejsová and A. Vimmrová	
<b>Influence of the Aggregate Type on the Properties of Dolomitic Lime-Based Mortars</b>	343
M. Vyšvařil, T. Žižlavský and P. Bayer	
<b>Mechanical Properties of Cement Composites Reinforced by Carbon Microfibers: Compressive and Bending Strength</b>	351
P. Tesárek, P. Holub, J. Havrda, J. Fládr, Z. Prošek, J. Trejbal and T. Plachý	
<b>The Comparison of Water, Water Vapour Transport Properties and Mechanical Characterization of Two Commercial Plasters on Market in the Czech Republic</b>	357
M. Čáchová, D. Koňáková, E. Vejmelková, J. Kotátková and R. Černý
