

# Table of Contents

## Preface, Professor Ján Sobota

## Chapter 1: Structural Analysis

<b>Influence of Antisymmetrical Actions at Reinforced Concrete Cable-Stayed Bridge</b>	3
I. Balaz, Y. Kolekova, M. Kovac and I. Veghova	
<b>Analysis of Natural Frequencies of Voided Biaxial Concrete Slabs</b>	15
N. Jendzelovsky and K. Zabakova Vrablova	
<b>A Method to Predict the Punching Shear Strength of Flat Slabs with Shear Reinforcement Using a Strut-and-Tie Model</b>	25
L. Lyčka and P. Štěpánek	
<b>Response of a Reinforced Concrete Slab to the Suddenly Applied Load</b>	36
P. Marton	
<b>Nonstationary Thermodynamic Analysis of a Chosen Critical Detail in a Waterproof Concrete Basement Structure Using an Experimentally Verified Model</b>	47
M. Ignacák, L. Matiaskova and J. Šoltész	
<b>An Engineering Heat and Mass Transport Model Utilized for Concrete at Fire</b>	58
A. Matusikova, P. Rozehnalova, F. Girgle, V. Kostiha and P. Štěpánek	
<b>Numerical Models of Wind Effects on Temperature Loaded Object</b>	69
V. Michalcova, L. Lausova, I. Skotnicova and S. Kuznetsov	
<b>Analysis of Creep Effects in a Concrete Beam Using Various Software</b>	79
K. Tvrdá and J. Drienovska	
<b>Analysis of Ceiling Slab of Office Centre</b>	89
K. Tvrdá and M. Vasecka	
<b>Determination of Load-Carrying Capacity of Railway Concrete Bridges According to New Guideline</b>	100
J. Vican, P. Kotes, M. Moravcik and J. Odrobinak	
<b>Shear Assessment of Concrete Bridge Deck Slabs</b>	110
R. Vida and J. Halvoník	
<b>Analysis of Asymmetric High-Rise Building</b>	120
O. Ivankova, M. Stellmach and L. Konecna	
<b>Dilatation of the High-Rise Building by Inserted Field</b>	130
O. Ivankova, M. Stellmach and L. Konecna	
<b>Determination of Material Parameters for Nonlinear Analysis of Reinforced Concrete</b>	140
J. Kubošek and J. Vaskova	

## Chapter 2: Experimental Measurements

<b>Pedestrian Wind Comfort around the Reinforced-Concrete Atypical Structure</b>	153
O. Hubová, L. Konecna, M. Macák and G. Ciglan	
<b>Influence of Contact of Damaged Reinforced Concrete Beam and Strengthening Slab for Deformation and Resistance of Reinforced Element in the Long-Term Loading</b>	164
M. Krizma, L. Bolha, M. Moravcik and M. Holubek	
<b>Analysis of Model Foundation Slab Focused on Strain Gauge Measurement</b>	175
D. Litvan, P. Mateckova and M. Smirakova	
<b>Design of Bitumen Asphalt Belt Sliding Joint Based on Experiment Results</b>	185
P. Mateckova, M. Smirakova, J. Kubošek and R. Čajka	
<b>Experimental Assessment of Structural Damping of Industrial Boiler Structure</b>	195
J. Protivinsky, M. Kubzova and M. Krejsa	
<b>Numerical and Experimental Analysis of the Nonlinear Response of Reinforced Concrete Frame Structure from Seismic Effects</b>	205
I. Veghova	

## **Chapter 3: Failure Analysis and Reliability of Reinforced Concrete Structures**

### **Frequent Failures of FRC Industrial Floors**

R. Cajka, M. Smirakova and P. Mateckova

217

### **The Possible Causes of Damage to Concrete Tanks, Numerical Experiment of Fluid-Structure-Soil Interaction**

K. Kotrasova, I. Hegedusova, S. Harabinova, E. Panulinova and E. Kormanikova

227

### **The Strengthening of Reinforced Concrete Structures**

P. Štěpánek, I. Laníková, P. Simunek and P. Sulak

238

### **Analysis of Permanent Lining of Branisko Tunnel**

J. Chabronova, M. Bednar and J. Snopko

249

### **Actual Problems of the Safety and Reliability of the NPP Structures in Slovakia**

J. Kralik

261

### **Thermal Effects on Box Girder Concrete Bridges**

M. Moravcik and L. Krkoska

273

## **Chapter 4: Geotechnical Problems in Foundations of Reinforced Concrete Structures**

### **Testing and Modelling of Concrete Pile Foundations**

K. Burkovič, M. Smirakova and P. Mateckova

287

### **3D Numerical Model of the Subsoil-Structure Interaction and Comparison of the Results with Experimentally Measured Values**

J. Vaskova and R. Čajka

298

### **Modeling the Load Test of Vertical Resistance of Pile**

L. Prekop

310

### **Parallelization of Computational Analysis of Reinforced Concrete Slabs on Foundation**

J. Brozovsky and M. Krejsa

319
