

Table of Contents

Preface, Professor Ján Sobota

Chapter 1: Structural Analysis

Influence of Antisymmetrical Actions at Reinforced Concrete Cable-Stayed Bridge I. Balaz, Y. Kolekova, M. Kovac and I. Veghova	3
Analysis of Natural Frequencies of Voided Biaxial Concrete Slabs N. Jendzelovsky and K. Zabakova Vrablova	15
A Method to Predict the Punching Shear Strength of Flat Slabs with Shear Reinforcement Using a Strut-and-Tie Model L. Lyčka and P. Štěpánek	25
Response of a Reinforced Concrete Slab to the Suddenly Applied Load P. Marton	36
Nonstationary Thermodynamic Analysis of a Chosen Critical Detail in a Waterproof Concrete Basement Structure Using an Experimentally Verified Model M. Ignacak, L. Matiaskova and J. Šoltész	47
An Engineering Heat and Mass Transport Model Utilized for Concrete at Fire A. Matusikova, P. Rozehnalova, F. Girgle, V. Kostiha and P. Štěpánek	58
Numerical Models of Wind Effects on Temperature Loaded Object V. Michalcova, L. Lausova, I. Skotnicova and S. Kuznetsov	69
Analysis of Creep Effects in a Concrete Beam Using Various Software K. Tvrda and J. Drienovska	79
Analysis of Ceiling Slab of Office Centre K. Tvrda and M. Vasecka	89
Determination of Load-Carrying Capacity of Railway Concrete Bridges According to New Guideline J. Vican, P. Kotes, M. Moravcik and J. Odrobinak	100
Shear Assessment of Concrete Bridge Deck Slabs R. Vida and J. Halvonik	110
Analysis of Asymmetric High-Rise Building O. Ivankova, M. Stellmach and L. Konecna	120
Dilatation of the High-Rise Building by Inserted Field O. Ivankova, M. Stellmach and L. Konecna	130
Determination of Material Parameters for Nonlinear Analysis of Reinforced Concrete J. Kubosek and J. Vaskova	140

Chapter 2: Experimental Measurements

Pedestrian Wind Comfort around the Reinforced-Concrete Atypical Structure O. Hubova, L. Konecna, M. Macak and G. Ciglan	153
Influence of Contact of Damaged Reinforced Concrete Beam and Strengthening Slab for Deformation and Resistance of Reinforced Element in the Long-Term Loading M. Krizma, L. Bolha, M. Moravcik and M. Holubek	164
Analysis of Model Foundation Slab Focused on Strain Gauge Measurement D. Litvan, P. Mateckova and M. Smirakova	175
Design of Bitumen Asphalt Belt Sliding Joint Based on Experiment Results P. Mateckova, M. Smirakova, J. Kubosek and R. Čajka	185
Experimental Assessment of Structural Damping of Industrial Boiler Structure J. Protivinsky, M. Kubzova and M. Krejsa	195
Numerical and Experimental Analysis of the Nonlinear Response of Reinforced Concrete Frame Structure from Seismic Effects I. Veghova	205

Chapter 3: Failure Analysis and Reliability of Reinforced Concrete Structures

Frequent Failures of FRC Industrial Floors R. Čajka, M. Smirakova and P. Mateckova	217
The Possible Causes of Damage to Concrete Tanks, Numerical Experiment of Fluid-Structure-Soil Interaction K. Kotrasova, I. Hegedusova, S. Harabinova, E. Panulinova and E. Kormanikova	227
The Strengthening of Reinforced Concrete Structures P. Štěpánek, I. Laníková, P. Šimunek and P. Sulak	238
Analysis of Permanent Lining of Branisko Tunnel J. Chabronova, M. Bednar and J. Snopko	249
Actual Problems of the Safety and Reliability of the NPP Structures in Slovakia J. Kralík	261
Thermal Effects on Box Girder Concrete Bridges M. Moravcik and L. Krkoska	273

Chapter 4: Geotechnical Problems in Foundations of Reinforced Concrete Structures

Testing and Modelling of Concrete Pile Foundations K. Burkovič, M. Smirakova and P. Mateckova	287
3D Numerical Model of the Subsoil-Structure Interaction and Comparison of the Results with Experimentally Measured Values J. Vaskova and R. Čajka	298
Modeling the Load Test of Vertical Resistance of Pile L. Prekop	310
Parallelization of Computational Analysis of Reinforced Concrete Slabs on Foundation J. Brozovsky and M. Krejsa	319
