

Table of Contents

Preface

Chapter 1: Properties of Structural Metals

The Effect of Heat Treatment on Microstructure and Mechanical Properties of FeCoNiAl_{0.25}Mn_{0.75} High Entropy Alloy L.M. Duc, N.H. Hai, N.V. Duong, N.T. Hung, N.K. Giang, H.V. Vuong and P.M. Khanh	3
Degradation of Pipeline Steel's Strength under High Temperature and Load due to Cavity Formation C.S. Nguyen, T.H. Nguyen and A.H. Bui	13
Comparative Analysis of Microstructure in Ferritic Steel Fabricated by Conventional and Additive Manufacturing Processes M.T. Nguyen	19

Chapter 2: Building Materials

Comparative Analysis of the Bearing Capacity and Cracking of Reinforced Concrete and Fiber-Reinforced Concrete Cylindrical Shells M. Surianinov, S. Neutov, D. Kirichenko and V. Metlizkiy	31
Comprehensive Studies of the Mechanical Properties of Fiber Concrete M. Surianinov, S. Neutov, I. Korneieva and Z. Holovata	39
Basic Characteristics of the Deformation Diagrams of Compressed Concrete under the Action of Dynamic Loads O. Romashko-Maistruk and V. Romashko	47
Construction Materials - How to Protect Living Organisms from Electromagnetic Radiation N. Tsapko, G. Shabanova, S. Logvinkov, O. Myrgorod and O. Pirohov	57
Study of Special Cements Based on Calcium and Barium Ferrites G. Shabanova, V. Taranenkova, M. Sharapov, O. Myrgorod and O. Pirohov	63

Chapter 3: Polymers and Composites

Bioplastic Properties of Cassava Peel Starch (<i>Manihot esculenta</i>) Influenced by the Addition of Crab Shell Chitosan and Zinc Oxide (ZnO) N. Sasria, N.J. Stanley and A. Zufikar	75
Synthesis and Characterization of Chitosan/Alginate Hydrogel Using CaCl₂ as a Crosslinking Agent A.R. Nafisah, F.M. Tarmidzi, D. Setiawan and D.R. Ngabito	85
Polypropylene Blends with Poly(Lactic Acid) Fiber: Preparation, Characterization, and Dyeability S. Metanawin, M. Pechyen and T. Metanawin	93
Development of Synthetic Rubber Flooring from Bio-Based Polyurethane P. Pongmuksuwan and W. Kitisatorn	101
Mechanical Properties of Recycled PA12/Hemp Fiber Composite S. Somsri, S. Siengchin and J. Tengsuthiwat	109
Numerical Simulation and Experimental Study on the Melt Flow Behavior of 3D-Printing Polylactic Acid Composites Filaments Reinforced with Iron Fillers P. Suttipong, C. Aumnate, J. Suk-Em and J. Tungtrongpaioj	115
Optimization of Carbon Black Content in Nitrile Rubber for Enhanced Mechanical Properties and Sealing Performance in Rotary Shaft Seals P. Pongmuksuwan and W. Kitisatorn	123

Chapter 4: Food Chemistry

Degradation β -Carotene Model of Degummed Red Palm Oil (DRPO) by RSM-Optimizing Condition

J.P. Hidayat, N. Sholihah, A. Maulidi, A.A. Putri and A.C. Kumoro

133
