## Preface

|                                                                                                                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Impact Behavior Characterization on Fractured Pins of AISI E52100 Steel</b><br>B. Vargas-Arista, M.A. Gómez-Morales, E. Garfías-García and F. García-Vázquez                                                                                           | 1   |
| <b>Influence of Cr and Nb on the Overlay Deposited on D2 Steel by Plasma Transferred Arc Process</b><br>F. García-Vázquez, H.M. Hernández-García, B. Vargas-Arista, A. Aguirre and E.E. Granda-Gutiérrez                                                  | 11  |
| <b>Mechanical Response and Microstructure of Al-SiO<sub>2</sub> Composites Prepared by Means of a Solid-State Route</b><br>I. Estrada-Guel, C. Carreño-Gallardo and R. Martínez-Sánchez                                                                   | 17  |
| <b>On the Mechanical Milling of the AlCuFe Icosahedral Phase with Water</b><br>C. Patiño-Carachure, J.L. López-Miranda, F. de la Rosa, M. Abatal, R. Pérez and G. Rosas                                                                                   | 23  |
| <b>CuAl<sub>2</sub> Intermetallic Alloy Subjected to the Hydrogen Embrittlement Reaction by Using Mechanical Attrition in Water</b><br>A.G. Hernández-Torres, F. Mares-Briones, J.R. Romero-Romero and G. Rosas                                           | 29  |
| <b>Densification Study of Cu-Al-SiC Composite Powders Prepared by Mechanical Milling</b><br>C.A. León-Patiño, D. Ramírez-Vinasco and E.A. Aguilar-Reyes                                                                                                   | 37  |
| <b>Carbon Nanotubes Functionalized by Nanoparticles of Platinum</b><br>S. Capula-Colindres, K. Aguir, F. Cervantes-Sodi, L.A. Villa-Vargas and V. Garibay-Febles                                                                                          | 45  |
| <b>Combination of Grinding and Wet Welding to Repair Localized Cracking in T-Welded Connections</b><br>G.T. Méndez, R. Cuamatzi-Meléndez and A.A. Hernández                                                                                               | 51  |
| <b>Electrochemical Characterization of X60 Steel Corrosion at Different Overvoltages: A Cathodic Protection Study</b><br>B. Trejo-Atecas, R. Orozco-Cruz, A. Contreras-Cuevas and R. Galván-Martínez                                                      | 59  |
| <b>Electrochemical Noise Study on Corrosion of Low Carbon Pipeline Steel in Sour Solutions</b><br>R. Galván-Martínez, R. Orozco-Cruz, J. Mendoza-Flores, J. Genesca-Llongueras and A. Contreras-Cuevas                                                    | 67  |
| <b>Modeling of Surface and Size Effects on Various Shape of Spin-Crossover Nanoparticles</b><br>A. Muraoka and K. Boukheddaden                                                                                                                            | 77  |
| <b>Influence of the Chemical Composition on the Ausferritic Transformation in Carbide-Free Bainitic Cast Steel</b><br>A.D. Basso, N.E. Tenaglia, R.E. Boeri and J.M. Massone                                                                              | 85  |
| <b>Residual Stress Assessment of Multiple Welding Repairs of Girth Welds in Pipeline Used in Oil Industry</b><br>O. Vega-Becerra, R. Galván-Martínez, S.L. Hernández-Mejía and A. Contreras-Cuevas                                                        | 93  |
| <b>Behavior of the Nano Alumina Powder Conformed by Slip Casting under Microwave Sintering</b><br>A. Arellano, J. Lemus-Ruiz, D. Bouvard and L. Olmos                                                                                                     | 105 |
| <b>Systematic Study of Polycrystalline Flow during <i>In Situ</i> Tension Test by SEM of Pb-50%Sn at Room Temperature</b><br>A.J. López-Ramírez, J.D. Muñoz-Andrade, E. Garfías-García and M. Aguilar-Sánchez                                             | 113 |
| <b>Synthesis of Synthetic Hematite with Substituted Aluminum by Sol-Gel Method</b><br>G. Carbajal, N.N. Zurita-Mendez, M.A. Espinosa-Medina, A.B. Martinez-Valencia and A. Sanchez-Castillo                                                               | 119 |
| <b>CuAl<sub>2</sub> Intermetallic Hydrogen Evaluation after Mechanical Activation of Powders</b><br>J.L. López-Miranda, T.A. Reyes-Hernández, A.G. Hernández-Torres, J.R. Romero-Romero, R. Pérez and G. Rosas                                            | 127 |
| <b>Characterization of Constrained Sintering of Powders on Solid Substrate</b><br>L. Olmos, J. Lemus-Ruiz, H.J. Vergara-Hernández, O. Jimenez, J.M.L. Salgado and J.J. Tena-Martinez                                                                      | 135 |
| <b>Phase Evaluation and its Hydrogen Correlation of the FeAl<sub>3</sub> and FeAl<sub>2</sub> Intermetallic Alloys during Mechanical Ball-Milling with Water</b><br>J.R. Romero-Romero, J.L. López-Miranda, R. Esparza, M.A. Espinosa-Medina and G. Rosas | 143 |

|                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|-----|
| <b>Rheological, Structural and Mechanical Characterization of Monolithic Zircon-Alumina Bodies</b>         |     |
| M. León-Carriedo, C.A.G. Chavarría, J.L.R. Galicia, J. López-Cuevas and M.I.P. Canul                       | 151 |
| <b>The Role of Residual Stresses in Circumferential Welding Repairs of Pipelines in SCC Susceptibility</b> |     |
| A. Contreras-Cuevas, J. Alamilla-López, R. Galván-Martínez and O. Vega-Becerra                             | 159 |
| <b>Corrosion Behavior of Low Carbon Steel Exposed to Different Soils</b>                                   |     |
| L.M. Quej-Aké, J. Marín-Cruz, R. Galván-Martínez and A. Contreras-Cuevas                                   | 169 |
