

Table of Contents

Preface

A RSM Approximation in Probabilistic Nonlinear Analysis of Fire Resistance of Technology Support Structures E.J. Králík	1
A Scarf Joint for Reconstructions of Historical Structures P. Fajman	9
Adjustment of the Stress State of a Membrane Structure in Barrandov P. Fajman and J. Máca	16
An Energetic Approach to Rate Independent Delamination with Cohesive Contact - An SGBEM Implementation J. Kšiňan and R. Vodička	24
Analysis of Causes of Mold Growth on Residential Building Envelopes in Central City Zone of Kosice S. Tóth and J. Vojtuš	28
Analysis of Experimental Measurements and Numerical Simulations of a Heat Field in the Light Weight Building Structure L. Lausova and I. Skotnicova	33
Analysis of Load-Carrying Capacity of Thin-Walled Closed Beams with Different Slenderness J. Valeš	39
Analysis of the 3D State of Stress of a Concrete Beam N. Jendzelovsky	45
Analysis of Timber-Concrete Ceiling Structure in Multi-Storey Building O. Sucharda, D. Mikolášek and J. Brozovsky	51
Application of the Meshless Local Petrov-Galerkin Method for Subsoil Settlement Analysis J. Mužík and D. Sitányiová	55
Classification of Steel Mine Support Sections as per EC3 Classification P. Janas, I. Kološ and R. Fojtík	63
Combination of Wedge Splitting and Bending Fracture Test-Crack Tip Stress Field and Nonlinear Zone Extent Analysis J. Sobek, V. Veselý and S. Seitl	67
Comparison of Numerical Methods for Calculation of Thin Slabs O. Sucharda and J. Kubosek	73
Comparison Experimental Tests of Behavior of the Slab-Column Structure after Removal of the Corner Support with Simplified Models Describing the Mechanism of Destruction M. Wiecezorek	78
Comparison of Finite Element and Classical Computing Models of Reinforcement Pavement J. Melcer and G. Lajčáková	85
Comparison of Fracture Energy Values Obtained from 3PB, WST and CT Test Configurations T. Holušová, S. Seitl and A.F. Canteli	89
Compressed Thin-Walled Cold-Formed Steel Members with Closed Cross-Sections M. Al Ali	93
Delamination of Laminate Plates E. Kormaniková	97
Determination of Shear Wave Velocity in the Soil by Dynamic Tests M. Sokol and L. Konecna	101
Determination of the Failure on the Concrete Runway P. Padevčt, P. Bittnar and Z. Bittnar	109
Differences in the Design of Underfloor Air Cavities T. Renčko and A. Sedláková	113
Dynamic Analysis of Liquid Storage Cylindrical Tanks due to Earthquake K. Kotrasova and I. Grajciar	119

Dynamic Response of Buildings and Structures due to Microtremor Part 1: Industrial Machines Effects	125
J. Benčat, D. Papán and M. Stehlíková	
Dynamic Response of Buildings and Structures due to Microtremor Part 2: Construction Works – Pile Driving Effects	133
J. Benčat and J. Koňár	
Effect of Cement Replacement by Zeolite on the Basic Mechanical Fracture Properties of Concrete: A Parametric Study	140
P. Rovnaníková, P. Schmid and Z. Keršner	
Effect of Spontaneous Drying on Mechanical Parameters of Alkali-Activated Slag Mortar	144
P. Rovnaník, L. Topolář, P. Schmid and Z. Keršner	
Effect of the Extension of Basement Floor and the Importance of a Proper Design of Interaction between the Foundation and the Subsoil	148
I. Olekšáková and O. Ivánková	
Experimental and Numerical Analysis of Timber-Lightweight Concrete Composite with Adhesive Connection	155
J. Kanócz, V. Bajzecerová and M. Mojdis	
Experimental Testing for the Analysis of a Landslide Phenomenon Produced in a Hillside Area from Romania	161
C.F. Dobrescu, E.A. Calarasu, M. Stoica, T. Moldoveanu and F.T. Tamas	
Experimental Tests for the Analysis of the Load-Bearing Capacity of an Internal Slab-Column Connection after its Punching at Various Positions of the Column	169
B. Wieczorek	
Fracture Mechanics Approach for Analysis of Delamination in Composite Plates	176
M. Žmindák, V. Dekýš and P. Novák	
Frequency of the Analysis Response of Reinforced Concrete Structure Subjected to Road and Rail Transport Effects	182
I. Demjan and M. Tomko	
Frequency Response Functions of a Lorry	188
J. Melcer and D. Kuchárová	
Generalized and Simplified Linear Closed-Form Solution of an Active Tensegrity Unit in the Form of Octahedral Cell	192
S. Kmet' and P. Platko	
Geometric and Static Analysis of the Historical Truss in Village Belá Dulice	199
J. Gocál, P. Krušínský, E. Capková and M. Kekeliak	
Impact of Seismicity on Stability of Earthen Dam Slopes	208
S. Harabinova and E. Panulinova	
Influence of Fly Ash Type on Material Properties of Cement Paste	212
P. Padevčt, T. Otcovská and O. Zobal	
Influence of the Age and Level of Concrete Fatigue on Prestressed Railway Sleeper Response: Parametric Study and Experiment	218
H. Šimonová, V. Veselý, Z. Keršner, L. Culík, T. Mosler and V. Bílek	
Insulation - Technical Analysis of Ground Connections and its Impact on the Solution of Substructure Design Details	222
A. Sedláková	
Investigation of Selected Physical Parameters of Cementitious Composite during Sequential Fracture Test	228
P. Konečný, V. Veselý, P. Lehner, D. Pieszka and L. Židek	
Load Capacity of an Internal Slab-Column Connection depending on the Geometric Parameters of the Reinforcement	234
B. Wieczorek	
Mechanical Fracture Parameters of Mortars Modified by Burnt Clays	241
E. Navrátilová, H. Šimonová, B. Kucharczyková, I. Havlíková, J. Bedáň, P. Rovnaníková and Z. Keršner	
Methods for Analyzing the Stability of an Earthen Dam Slope	245
E. Panulinova and S. Harabinova	
Modeling of a Gravel Base under the Cylindrical Tank	249
N. Jendzelovsky and L. Baláž	

Modeling of Strengthening of Masonry Pillars with Carbon Fabric J. Brozovsky, M. Jašek and M. Maluchová	253
Modelling and Statistical Approaches to Lateral-Torsional Buckling Z. Kala and J. Valeš	259
Monitoring and Analysis of Fungal Organisms in Building Structures S. Tóth and J. Vojtuš	265
Narrow Reinforced Concrete Slabs after their Flexural Destruction M. Wiecezorek	271
Nonlinear Analysis of Underground Walls in Interaction with Subgrade Ľ. Prekop	276
Numerical and Experimental Models of Load on Buildings from the Effects of the Atmospheric Wind V. Michalcova, S. Kuznetsov and S. Pospíšil	280
Parameter Study of Asymptotic Sampling for Truss Structures Reliability A. Hlobilová and M. Lepš	288
Pilot Study of the Effect of Admixtures in Fine-Grained Cement-Based Composites on Volume Changes and Fracture Parameters V. Bílek Jr., L. Topolář, H. Šimonová, B. Kucharczyková, I. Havlíková, L. Pazdera and Z. Keršner	294
Probabilistic Simulation of the Mechanical Response of a Pre-Stressed Railway Sleeper: Initiation and Propagation of Cracks during Static Test L. Řoutil, V. Veselý and Z. Keršner	298
ProbCalc - An Efficient Tool for Probabilistic Calculations M. Krejsa, P. Janas and V. Krejsa	302
Problems with Variability in Using Fly Ash in Mixed Cement O. Zobal, P. Padevět, V. Šmilauer and Z. Bittnar	308
Remarks to the Complex Modelling of Concrete Structures: From Experiment to Reliability Assessment D. Novák and L. Řoutil	312
Sandwich Beam in Four-Point Bending Test: Experiment and Numerical Models S. Piovár and E. Kormaníková	316
Sloshing of Liquid in Rectangular Tank K. Kotrasova	320
Software Application for Optimizing a Method Used to Waterproofing Rehabilitation for Building Infrastructure F.L. Tamas and V.V. Ungureanu	324
Stability and Vibration of Imperfect Column and Slender Web Ľ. Šnirc and J. Ravinger	328
The Intumescent Paint Layers Thickness Influence on the Load-Bearing Capacity of the Steel Joints I. Száva, K. Jármai, S. Vlase, T. Bodnár, V.V. Ungureanu, B.P. Gálfi, P. Dani, R. Munteanu and F.L. Tamas	332
The Welding Process as a Local Issue with Global Consequences M. Al Ali	340
Two Parameter Description of Crack Tip Stress Fields for Wedge Splitting Test Specimen: Influence of Wedge Angle S. Seitzl, C. Bermejo, J. Sobek and V. Veselý	345
Using of Computer Fluid Dynamics in Simulation of the Waste Reservoirs Processes I.S. Leoveanu, K. Kotrasova and E. Kormaníková	351
