

# Table of Contents

## Preface and Conference Organization

## Chapter 1: Structural Engineering and Materials, Civil Engineering

<b>A Method of Multi-Failure Models Based on Response Surfaces Method-High Dimensional Model Representation on Structural Reliability Analysis</b> L. Jia and F.C. Guan	3
<b>A Symplectic Method for Dynamic Response of Structures</b> W.H. Li and H.Y. Sun	7
<b>Analysis of the Mechanical Properties of TC4-6061 Composite Plate Based on Classical Laminate Theory</b> Q. Wang, L.L. Liang and C.N. Peng	12
<b>Analysis on Segment Floating in the Construction of Large-Diameter Crossing-River Shield Tunnel</b> R.L. Zhang, L.M. Tang and K. Tang	17
<b>Damage Identification of Plane Truss Structure According to Square Difference in Elemental Modal Strain</b> W.R. Liu, S.J. Du and L.M. Zhang	22
<b>Existing Frame Structure Seismic Capability Based on the Theory of the Reliability Analysis Method for Basic Research</b> L.T. Sun, Y. Bai, Y. Lu and T. Zhang	28
<b>Failure Mode and Experimental Method Research for Bond-Slip of Cold-Formed Thin-Walled Steel and Foam Concrete Composite Member</b> D.Z. Liu, F.Y. Wang, B. Li and Q. Wu	33
<b>Features of Quality Control of Free of Cement Binder of Non-Hydration Type</b> E.V. Voitovich, N.I. Kozhukhova, A.V. Cherevatova, I.V. Zhernovsky and M.S. Osadchaya	39
<b>Finite Element Analysis of Larch Glum Columns</b> Q. Wang, X. Feng and Z.Y. Liu	44
<b>Full-Size Seismic Experiment Analysis on the Timber Structure in Rural Areas</b> P.Q. Wang, Y.M. Dou, Y.T. Li and J.J. Zhang	48
<b>Grouting Technique Applications during Housing Construction</b> Q. Zhang, L. Li and Y. Mo	53
<b>Instability of Sleeve Member with High and Ordinary Strength Steel</b> Z.X. Bai, H.Y. Guan and M.F. Chen	57
<b>Investigation into Corrosion Fatigue Life of Spherical-Headed Cylindrical Shell</b> W.J. Xu, Q.X. Guo and X.T. Wang	63
<b>Monolayer Cable-Stayed Steel Moment Resistant Frame and its Lateral Force Resisting Performance</b> S.N. Lan and C.X. Li	68
<b>Numerical Assessment on Edgewise Compressive Strength of Heavy Sandwich Fiberboard</b> G.J. Hua, W.M. Fei, Z.S. Liao and Y. Xie	74
<b>Numerical Simulation of Construction of Super-Large Deep Soft Soil Foundation Pits and Analysis of its Spatial and Temporal Effects</b> X.Q. Wang and T.T. Sun	79
<b>Pile Foundation <i>In Situ</i> Test in Seaside Soil-Squeezing Backfill Zone</b> L.B. Liu, H.B. Li and Y.Q. Liu	84
<b>Reinforced Concrete Tied Arch Hanging and Pull Synergistic Reinforcement Active Technology Research</b> W. Duan, L.H. Chu and Y.C. Liu	88
<b>Research on Lightweight Multi-Objective Optimization for Closed Body-in-White Structure</b> C.Q. Wang, D.F. Wang and S. Zhang	93
<b>Research on Stability of Overburden Structure around Longwall Mining Face in Steeply Dipping Seam Group</b> S.G. Ren, Y.P. Wu and J.H. Yin	100

<b>Research on the Deformation of the Steel Piles on the Soft Soil</b> H.X. Zhou, P. Zhi and H.B. Zhou	111
<b>Shear Wall Stability Computation and Analysis of Reinforced Concrete Frame-Shear Wall Structures</b> J.F. Hou, S.Q. Su, B.B. Li and Y.X. Zou	117
<b>Shearing Property Study on PC Box-Girder Bridge with Corrugated Webs</b> L. Xie and G.J. He	121
<b>Static and Dynamic Comparative Study on the Cardanic Transmission</b> E. Avrigean	126
<b>Story-Based Stability Analysis for Evaluating Story Buckling Load of Frames</b> F.X. Jiao, X.Q. Gu and Z.W. Li	131
<b>Study on the Impact of Crashworthiness Materials on the Crashworthiness Capacity of Double Hull Ship</b> D. Li, H.B. Gui and J.H. Shi	139
<b>The Influencing Factors' Identification and Analysis of Rockfill Dam Slope's Stability in Tailing Pond Based on RS and PCA</b> F.L. Jiang, Z.G. Yang, G.H. Li, S.Y. Feng and B. Lei	144
<b>The Key Issues and Considerations of Buckling Restrained Braces in Seismic Applications</b> W.L. Wen, L.C. Zhou and Z. Tao	148
<b>The Research of Similar Material and Dosage in Blasting Model Test</b> H. Zhao, X.P. Li and Q. Dong	152
<b>Theoretical and Experimental Model for the Analysis of a Cardan Cross</b> E. Avrigean and M. Stetiu	156
<b>Thermal Analysis of Concrete Structures with Pipe-Cooling System by a New Algorithm</b> Y.P. Zhu, S.R. Feng, Q.C. Shi and J.A. Su	161
<b>Wind Tunnel Experiment on the Wind Effects of Low-Rise Buildings in Rural Areas</b> P.Q. Wang, Y.T. Li, Y.M. Dou and J.J. Zhang	166
<b>Differential Settlement among Diaphragm Wall and Upright Column Piles</b> Y.H. Chen, Y.C. Ma and H.Y. Ma	171
<b>Analysis of Unsteady Seepage Behavior of Rumei High Core Wall Rockfill Dam by FEM</b> Z.Z. Shen, L. Zhong and X.D. Chai	175
<b>Optimization of Seepage Prevention Form of the Zhen'an Pumped Storage Power Station</b> Z.Z. Shen, L. Zhang and L.Q. Xu	180
<b>Research on Determination Loose Zone of Surrounding Rock in Highway Tunnel</b> Y. Huang, J.S. Kou, H.B. Fang, M.L. Li and Y. Liang	185
<b>Optimization Research on Geometric Parameters of Scallop-Shaped Lattice Shells</b> N. Li, R.A. Chang, W. Zong and Q.H. Yu	192
<b>An Evaluation System for Seismic Retrofitting Schemes of an Existing Building Using Energy Dissipation Device</b> X.Q. Li and L. Liu	197

## **Chapter 2: Vibration Engineering and Noise, Analysis and Dynamics**

<b>Acceleration Data Acquisition and Analysis Method of Shaking Table Test</b> S.F. Chai, P. Wang, Z.J. Wu, J. Wang and G.F. Che	205
<b>Research on Characteristics of Special Nonlinear Vibration System</b> S.Y. Liu, Q.C. Yang, S.J. Zhu and X.L. Wei	213
<b>Research on Dynamic Characteristics of Bladed Disk System by Fixed Interface Prestressed-Free Interface CMS Super-Element Method</b> L. Zhang, X. Li and T.J. Liu	218
<b>Study on Spatial Nonlinear Vibration Characteristics of Cables with a Particular Constraint</b> J.M. Liu and B.D. You	222
<b>Study on Tower Vibration Characteristic of 3-Rotor HAWT System</b> L.P. Lu, Y.P. Wang and Q.W. Huang	230
<b>The Fault Diagnosis Method for Roller Bearing with Harmonic Wavelet Packet and DT-SVM</b> R. Pan, T. Xu and Y. Liu	238

<b>The Influence of Sag on Vibration Modal of Suspended Cable</b> L.F. Zhang, X.H. Liu and B. Yan	242
<b>The Mechanism of the Noise Transmission in the Carbody of High-Speed Trains</b> J.Q. Guo, J.M. Ge, Z.J. Sun, X.J. Deng, S.Q. Liu and Y.J. Zhao	250
<b>The Similar Relationship Research of the L-Type Eccentric Structure Model on Vibration Test</b> A.J. Chen, X.M. Jiang and G.J. He	256
<b>Using Multi-Agent System to Control the Radiation Noise in an Enclosure</b> D.L. Chen and N. Chen	261
<b>Vibration Characteristics of Non-Metal Flight Control Structures in Extremely High Temperature Environments</b> D.F. Wu, Y. Pu, L. Shang, Y.W. Wang and J.L. Yang	265
<b>Frequency Response Analysis of Damped Dual Mass Flywheel</b> R. Zeng, Z.F. Jiang and X. Wan	271
<b>Numerical Study on the Evolution of Force Chain inside Railway Ballast under Tamping Operation</b> T.Y. Zhou, B. Hu, P. Xu and B. Yan	275
<b>Research of the Vertical Vibrations of Tandem Mill Based on Wavelet Analysis</b> C.H. Ren, X. Ma, Z.M. Li and Y.H. Ding	279
<b>Research on Vibration Parameters of Tamping Operation</b> T.Y. Zhou, B. Hu, Y.X. Peng and B. Yan	283
<b>Application Analysis of Dynamic Pressure Damper in Hydraulic Systems</b> X.Y. Mao, Y.F. Peng, C. Wu, J.H. Hu and H.Y. Ding	287

### **Chapter 3: Aerospace and Aircraft Engineering, Testing and Fault Diagnosis, Computational Methods**

<b>The Measure of Missile's Capture Performance Based on the Geometric Counts under HPM Damage</b> L.S. Ran, S.H. He and D.W. Lu	297
<b>Development of a Flight Simulation Test-Bed for a General Propeller-Driven Unmanned Aircraft</b> B.M. Albaker, N.A. Rahim and A.H. Rasheed	303
<b>Overall Solution of Comprehensive Evaluation for Missile Storage Life</b> J. Gao, D.P. Huang and X.B. Li	307
<b>The Method of Satellite Autonomous Orbit Determination Based on Star and Sun Sensor Wireless System</b> J. Liu and X.G. Pan	312
<b>Combination of Conflicting Evidence Based on Relative Entropy</b> S. Wu and G.C. Chen	318
<b>Hybrid Control for Markovian Neutral Systems with Distributed Delays</b> Y.Z. Wang	323
<b>A Test Method and Test Codes Generator for Improved HT Fault Model Based on NoC</b> Y.Z. Zhang, Y.G. He, L.F. Yuan and M.X. Liu	327
<b>A Instantaneous Availability Modelling Method for Repairable System</b> D.Z. Kong and X.B. Li	334

### **Chapter 4: Disaster Prevention and Mitigation**

<b>Research of Influence Factors on Freeway Incident Detection</b> Z.Y. Yang and G.Y. Yan	343
<b>Risk Assessment of the Debris Flow Gully in Tibet Southeast</b> J. Xu, Q. He, P.Q. Wang, L. Lu and D.D. Chen	347
<b>Seismic Vulnerability Analysis of FRP Retrofitting Industrial Buildings</b> J. Zhu, P. Tan and P.J. Chang	353
<b>Strong Motion Observation from Recent Destructive Earthquakes in China Mainland</b> D.W. Lu and Z.B. Yang	358

<b>The Research of the Large Reservoirs Combined Forecasting and Scheduling System of Liaoning Province</b> H. Liu and J.S. He	362
<b>Construction of the Safety Risk Monitoring of Tailings Based on Big Data of Information Platform</b> L.B. Zhao, W.D. Wang, A.S. Meng and B. Liang	368
<b>Fuzzy Comprehensive Evaluation of Safety Culture in Coal Mining Enterprises</b> C. Liu, J. Liu and J.X. Wang	373
<b>Unmanned Aerial Vehicle Maritime Cruise Base Site Selection Strategy Research in the Bohai Sea</b> L. Wei, Y.B. Li, J.H. Xu and X.X. Luo	378
