

Table of Contents

Preface, Organizers and Sponsors

I. Theoretical Approach, Numerical Simulation and Modeling

A New Approach to Finding a Risk-Informed Safety Factor for “Fail-Safe” Pressure Vessel and Piping Design	
J.T. Fong, N.A. Heckert, J.J. Filliben, P.V. Marcal and S.W. Freiman	3
Numerical Analysis of Constraint and Strength Mismatch Effects on Local Fracture Resistance of Bimetallic Joints	
K. Fan, G.Z. Wang, J. Yang, F.Z. Xuan and S.T. Tu	24
Numerical Prediction of Creep Crack Growth Rate in Cr-Mo-V Steel for Specimens with Different Constraints	
J.W. Zhang, G.Z. Wang, F.Z. Xuan and S.T. Tu	32
Modeling of Low Cycle Behavior of P92 Steel Based on Cyclic Plasticity Constitutive Equations	
X.W. Wang, J.M. Gong, Y. Jiang, Y.P. Zhao and M.H. Yu	41
On the Utilization of Shear Modified GTN Damage Model in Cold Rolling	
Q. Sun, D.Q. Zan, H.L. Pan and J.J. Chen	47
Trans-Scale Analysis Approach of Fatigue Crack Behavior for Aluminum Alloy LC4 Plate	
T.T. Wei and X.S. Tang	51
Determination and Validation of Gurson-Tvergaard Model Parameters for Finite Element Simulation of Small Punch Test	
Y.Y. Lu, L. Chen and K.S. Guan	59
Fatigue-Fracture Solution of Iron Wire under Pseudo-Periodic Strain	
J.J. Wang and J.H. Xiao	69
All Set Theory in the Fuzzy-Random Creep Fracture Model	
W. Wang, W.L. Zhong, C.H. Liu and F.Z. Xuan	76
The Strain-Based Failure Assessment Diagram for Commercially Pure Titanium TA2	
B. Sun, C.Y. Zhou and X.H. He	79

II. Structural Integrity Evaluation and Experimental Methodology

Critical Zone Approach for Structural Integrity of Power Engineering Components	
V.N. Shlyannikov	89
Analytical and Experimental Study of Gear Surface Micropitting Due to Variable Loading	
H. Long, I.S. Al-Tubi and M.T.M. Martinze	96
Methodology and Warm Prestressing Effect for Pressurized Thermal Shock Analysis in Nuclear Power Plant	
G.A. Qian and M. Niffenegger	104
High Cycle Fatigue Properties of Duplex Stainless Steel in Air and 3.5% NaCl Solution	
S.R. Yu, W. Song, S.X. Li and M. Kai	114
Fatigue Behavior of K447A Superalloy under Low Cycle Fatigue and Creep-Fatigue Interaction Conditions	
H.C. Yu, C.L. Dong and Y. Li	121
Thermo-Mechanical Behavior of the Shape Memory Alloy Strip	
P.T. Zhao, J.H. Qiu and H.C. Yu	127
Statistical Analysis and Reliability Prediction of Creep Rupture Strength and Life for DZ125 Superalloy	
C.L. Dong, Y. Li and H.C. Yu	133
Creep Behavior of a 4.5% Re Nickel-Base Single Crystal Superalloy at High Temperature	
D.L. Shu, S.G. Tian, X. Ding, J. Wu, Q.Y. Li and C.L. Jiang	139

Effect of Repair Length on Residual Stresses in a Multi-Pass Butt-Welded 12Cr1MoV/P91 Dissimilar Pipe	
Y.P. Zhao, J.M. Gong, X.W. Wang, Y.F. Wang, Z.Q. Ge and Q.N. Li	145
Numerical Simulation on Fatigue Life Assessment of Free Span for Submarine Pipeline	
J. Dong, X.D. Chen, B. Wang, W.H. Guan, T.C. Yang, Z.C. Fan and J.H. Pan	153
Influence of Heat Treatments on the Microstructure and Mechanical Properties in Ti-10V-2Fe-3Al Alloy	
C. Li, J. Chen, W. Li, W. Qiu and J.J. He	160
Research on Stress Intensity of Variable Cross-Section H-Type Structure in Heat Exchanger with Longitudinal Flow of Shell Side	
Z.C. Liu, K. Wang, X. Gu and M.S. Liu	166
The Effect of Two Wire Submerge Welding Parameters on the Properties of Welded Joint	
C.W. Ma, T.Y. Liu, Y.Y. Tang, Q.H. Lu, C.G. Li and H. Yan	172
Thermo-Mechanical Simulation of Reheat Cracking in Welding CGHAZ of Vanadium-Modified 2.25Cr1Mo Steel	
Y.C. Han, X.D. Chen, Z.C. Fan and H.Q. Bu	178
Correlation between Magnetic Memory Signals and Mechanical Properties of 35CrMo Tempered and Quenched Steel	
P.J. Guo, X.D. Chen, W.H. Guan and H.J. Zhao	186
Effect of Coking Size on the Thermal Diffusion and Stress Distribution of Cr25Ni35Nb and Cr35Ni45Nb Austenitic Steels	
L.M. Shen, J.M. Gong and H.S. Liu	192
Limit Load Analysis of Elbow with Local Wall Thinning under Combined Loads	
P. Cui and C.Y. Zhou	198
Measurement of Welding Residual Stress by Ultrasonic Technology	
H. Chen, J.D. Zhu and Y.X. Xiang	206
Microstructure and Wear Properties of Ni-W-Si Coatings by Laser Cladding	
X.P. Liu, P.L. Zhang, H. Yan, Y.L. Lu, Z.S. Yu, C.G. Li, Q.H. Lu and D.D. Qiu	214
Numerical Simulation and Experimental Study on the Contact Pressure between Bipolar Plate and GDL in a PEM Fuel Cell	
X.M. Han, J.Z. Tan, Y.C. Liu, P. Li and L. Pan	220
Atomistic Simulation of Fatigue Crack Growth in α-Fe under High Temperature	
T. Liu and M.S. Liu	226
Residual Stress Analysis for Engine Block by the Grooving Method	
C. Guo, Q.H. Lu, P.L. Zhang, B.R. Peng and X.F. He	236
Resistance Spot Weldability of Hot-Formed Ultra High Strength Steel Based on Virtual and Physical Experiment	
Z.S. Yu, W.P. Dong, C.W. Ma, J.W. Ren, B.H. Li and Y.R. Ji	244
Study on Mechanical Behavior of Plastic Pipe Reinforced Cross-Winding Steel Wire Subjected to Non-Axis Line Symmetric Surface Load on Soil	
X. Li, W.F. Li and L.Y. Xu	251
The Study on EMAT Applied in Nondestructive Testing of Elevated Temperature Material	
Y. Zheng, S.J. Li and H. Zheng	261
Finite Element Simulation of the Creep Behavior of 2.25Cr-1Mo-0.25V Steel Based on Continuum Damage Mechanics	
Y. Zhou, X.D. Chen, Z.C. Fan and Y.C. Han	266
Contact Nonlinear FE Analysis and Intensity Evaluation of Double-Cone Seal	
H.H. Wang, R.X. Yang and J.C. Lu	272
Structural Integrity Assessments by Measuring of Residual Stresses and Brittle Crack Toughness: A Thick Large-Scale Welding Study	
W.C. Woo	279
Influence of the Residual Stress on Mechanical Properties of Ductile Materials by Simulating Small Punch Test	
H.H. Wang, S.J. Zhang, Y.G. Wang and K.S. Guan	285

III. Industrial Application

Structural Integrity Role in Plant Life Extension - A Case Study J.H. Shi	295
Why and how Did a Multi-Layered Vessel Explode? W.Q. Wang	307
Failure Analysis and Redesign on Jacketed Polypropylene Reaction Kettle of Propylene J.Q. Yang and K.S. Guan	316
Finite Element Analysis of Bolted Flanged Joints Subjected to External Loads H.H. Wang, Y.J. Feng, W.M. Zhu and Z.M. Zhang	324
Design of the Equal-Loading Butt Joint for CF62 Steel Y.W. Qian and J.P. Zhao	330
Effect of Carbon Black Reinforcing Fillers on Mechanical Properties of NBR Materials Used for the Progressing Cavity Pump L. Pan, J.Z. Tan, L.F. Fan and X.M. Han	339
Nonuniform Flow Distribution Analysis of Air-Cooled Heat Exchanger H.L. Lu, X.L. Xue, X.Y. Tang, J.X. Ding, X.F. Geng and X.M. Liu	345
Elastoplastic Analysis of Novel Parabola-Arc-Shaped Head for Internal Pressure Vessel N. Wang, H.Q. Liu and S.T. Tu	352
Fatigue Failure Analysis on Key Components of Bladder Accumulators Y.P. Niu and B.B. Chen	363
Rough Set Analysis of the Heat Conduction in the Steam Pipe W.L. Zhong, W. Wang, J.D. Lin, M. Nie and C.H. Liu	371
Three-Dimensional Leak before Break Analysis of Nuclear Pipes Containing Cracks W.F. Liang, T. Liu and M.S. Liu	376
Drawing and Forming Parameters of Tailor-Welded Plates of High Strength Steel in Nonuniform Thickness M.Z. Jiang, H.Y. Gong, B. Wang, S.F. Wang, H.X. Li and D.D. Qiu	382
