

# Table of Contents

## Preface, Committees and Sponsors

## Chapter 1: Historical and Artistic Area

<b>URFA: The Planned City and the Process of Medievalization</b> M. Ieva	3
<b>Morphology of Roman, Islamic and Medieval Seismic Design: Pointed Arch and Ablaq</b> A. Camiz	9
<b>Morphological, Typological and Structural Characters of the Old Centers in the Center of Coastal Apulia: Some Instruments for the Safeguard and the Recovery of their Architectural Heritage</b> A.V. Riondino	15
<b>The Old City of Jerusalem between Heritage and Urban Renewal: Public Buildings and Typological Aspects</b> G.F. Rociola	21
<b>Preventive Fire Risk Assessment of Italian Architectural Heritage: An Index Based Approach</b> A. Arborea, G. Mossa and G. Cucurachi	27
<b>The Norman Tower in the Abandoned Village of Craco (MT). Meaning and Reasons of the Restoration</b> R. de Cadilhac	34

## Chapter 2: Structural Area

<b>Structural Behaviour of Historical Stone Arches and Vaults: Experimental Tests and Numerical Analyses</b> M. Bovo, C. Mazzotti and M. Savoia	43
<b>Large-Scale Seismic Vulnerability Assessment Method for Urban Centres. An Application to the City of Florence</b> M. Ripepe, G. Lacanna, P. Deguy, M. de Stefano, V. Mariani and M. Tanganelli	49
<b>Dynamic Monitoring and Seismic Response of a Historic Masonry Tower</b> A. Saisi, C. Gentile, M. Guidobaldi and M. Xu	55
<b>Vulnerability Reduction Procedures in Ordinary Urban Management - The Urban Building Code of Faenza</b> C.F. Carocci, P. Copani, L. Marchetti and C. Tocci	61
<b>Strength Performance of Unreinforced Brick Masonry Walls under Flexo-Compression Load. Analytical Methods</b> E. Bernat-Maso and L. Gil	67
<b>One-Year Monitoring of a Historic Bell Tower</b> R. Cantieni	73
<b>Identifying Seismic Local Collapse Mechanisms in Unreinforced Masonry Buildings through 3D Laser Scanning</b> C. Andreotti, D. Liberatore and L. Sorrentino	79
<b>Mechanical Characterization of Building Stones through DT and NDT Tests: Research of Correlations for the <i>In Situ</i> Analysis of Ancient Masonry</b> E. Vasanelli, M. Sileo, G. Leucci, A. Calia, M.A. Aiello and F. Micelli	85
<b>Buildings Behavior in the Urban Fabric: The Knowledge Issue in the Post-Earthquake Reconstruction Plans</b> C.F. Carocci and C. Circo	90
<b>Buildings Behaviour in Urban Fabric: The Safety Assessment Issue in the Post Earthquake Reconstruction Plans</b> S. Lagomarsino, S. Cattari, D. Ottonelli and M. Rossi	96
<b><i>In Situ</i> Investigations for the Seismic Assessment of Existing Bridges</b> C. Pellegrino, M.A. Zanini, P. Zampieri and C. Modena	102

<b>Mechanical Characterization of Apricena Marble by Ultrasonic Immersion Tests</b> A. Castellano, P. Foti, A. Fraddosio, S. Marzano and M.D. Piccioni	109
<b>Seismic Behavior of a Masonry Chimney with Severe Cracking Condition: Preliminary Study</b> S. Ivorra, F.J. Baeza, D. Bru and F.B. Varona	117
<b>Distributed Structural Monitoring for a Smart City in a Seismic Area</b> V. Gattulli, F. Potenza, F. Graziosi, F. Federici, A. Colarieti and M. Faccio	123
<b>Seismic Behaviour Analysis of Classes of Masonry Arch Bridges</b> P. Zampieri, M.A. Zanini and R. Zurlo	136
<b>Analysis of Operational Modal Identification Techniques Performances and their Applicability for Damage Detection</b> A.A. Rizzo, N.I. Giannoccaro and A. Messina	143
<b>Identification of the Modal Properties of a Building of the Greek Heritage</b> M. Diaferio, D. Foti and N.I. Giannoccaro	150
<b>Seismic Response of a Historic Masonry Construction Isolated by Stable Unbonded Fiber-Reinforced Elastomeric Isolators (SU-FREI)</b> A. Castellano, P. Foti, A. Fraddosio, S. Marzano, G. Mininno and M.D. Piccioni	160
<b>Non-Destructive Techniques and Monitoring for the Evolutive Damage Detection of an Ancient Masonry Structure</b> D. Foti	168
<b>Dynamic Analysis of a Historical Fortified Tower</b> M. Diaferio	178
<b>Modeling of Masonry Vaults as Equivalent Diaphragms</b> P.S. Marseglia, F. Micelli, M. Leone and M.A. Aiello	185

### **Chapter 3: Computational and Technological Area**

<b>Building Vulnerability: An Interdisciplinary Concept</b> P. Vlamos, V. Chrissikopoulos and M. Psiha	193
<b>Dynamic Testing of Masonry Towers Using the Microwave Interferometry</b> C. Gentile and A. Saisi	198
<b>A Dynamic Identification of a Historical Building Using Accelerometers with Interface Modules and a Digital Synchronization Method</b> L. Spedicato, I. Armeni, N.I. Giannoccaro, M. Avlonitis and S. Papavlasopoulos	204
<b>A NN-Based Approach for Monitoring Early Warnings of Risk in Historic Buildings via Image Novelty Detection</b> L. Carnimeo and R. Nitti	212
<b>A Wireless Sensor Network Innovative Architecture for Ambient Vibrations Structural Monitoring</b> K. Oikonomou, G. Koufoudakis, E. Kavvadia and V. Chrissikopoulos	218
<b>Synchronization Issues in an Innovative Wireless Sensor Network Architecture Monitoring Ambient Vibrations in Historical Buildings</b> G. Koufoudakis, N. Skiadopoulos, E. Magkos and K. Oikonomou	225
<b>Hearing the Buildings: Smart Monitoring through Advanced Sonification Approaches</b> A. Floros, E. Vlamou and V. Chrissikopoulos	231
<b>Hybrid Model for Measurement of Building Vulnerability</b> P. Vlamos, A. Pateli and M. Psiha	237
<b>On Modeling an Innovative Monitoring Network for Protecting and Managing Cultural Heritage from Risk Events</b> L. Carnimeo, D. Foti and S. Ivorra	243
