

Table of Contents

Preface

The Background to Superplastic Forming and Opportunities Arising from New Developments

T.G. Langdon 1

A Study on Modelling the Superplastic Behaviour of Ti54M Alloy

H. Elrakayby, D. Gonzalez, A. Gomez-Gallegos, P. Mandal and N. Zuelli 9

Superplastic Materials Characterisation Based on Free-Bulge Tests

L. García-Barrachina and A.J. Gámez 15

Effect of Multidirectional Forging and Subsequent Annealing to the Microstructure of Al-Mg-Mn Type Alloy

A.D. Kotov, M. Kishchik and A.V. Mikhaylovskaya 23

Comparison of Technological Properties of Sheet Titanium Alloys VT6 and VST2k

R. Safiullin, S. Malysheva, R. Galeyev, M. Mukhametrakhimov, A. Safiullin, R. Khazhaliev and A. Berestov 33

Microstructure Evolution of Ti-Al-Mo-V Titanium Alloy During the Superplastic Forming with FES Estimated Strain Rates Across the Formed Parts at Constant Gas Pressure

A.O. Mosleh, A.D. Kotov, S.V. Medvedeva and A.V. Mikhaylovskaya 43

The Effect of Thermo-Mechanical Processing Regime on High-Temperature Tensile Properties of V-Alloyed High-Nitrogen Steel

S.V. Astafurov, G.G. Maier, E.V. Melnikov, V.A. Moskvina, M.Y. Panchenko, K.A. Reunova, N.K. Galchenko and E.G. Astafurova 53
