

# Table of Contents

## Preface & Committees

## Chapter 1: Keynote Lecture

<b>Forty-Five Years of Superplastic Research: Recent Developments and Future Prospects</b>	3
T.G. Langdon	
<b>Superplasticity of Metallic Alloys: Some Current Findings and Open Questions</b>	13
J.J. Blandin	
<b>Advances in Superplasticity of Ultrafine-Grained Alloys: Recent Research and Development</b>	23
R.Z. Valiev and I.P. Semenova	
<b>Improvement of Superplasticity in Fine-Grained Oxide Ceramics Based on the Concept of Grain Boundary Plasticity</b>	34
H. Yoshida, K. Morita, B.N. Kim, K. Matsui, Y. Ikuhara and T. Sakuma	

## Chapter 2: Mechanism of Superplasticity

<b>Direct Observation of Two-Dimensional Grain Boundary Sliding and Switching in ODS Ferritic Steel</b>	43
E. Sato, H. Masuda, Y. Sugino and S. Ukai	
<b>Description of the Superplastic Flow Process by Deformation Mechanism Maps in Ultrafine-Grained Materials</b>	51
M. Kawasaki and T.G. Langdon	
<b>Texture Change during Superplastic Deformation in Fine-Grained Magnesium Alloys</b>	59
H. Watanabe, T. Uesugi, Y. Takigawa and K. Higashi	
<b>Superplastic Deformation Mechanisms in High Magnesium Containing Aluminum Alloy</b>	66
O.A. Yakovtseva, A.V. Mikhaylovskaya, A.G. Mochugovskiy, V.V. Cheverikin and V.K. Portnoy	
<b>Changes in Crystallographic Orientation Distribution during Superplastic Deformation in Aluminum Alloys</b>	72
Y. Takayama, E. Kimijima, E. Harunari and H. Watanabe	
<b>Unification of Physics during Super Plastic Flow in Advanced Materials</b>	78
J.D. Muñoz-Andrade	
<b>Universality of the Phenomenology of Structural Superplasticity</b>	84
S. Sripathi and A. Padmanabhan	
<b>Effect of Grain Boundary Segregation on Shear Deformation of Nanocrystalline Binary Aluminum Alloys at Room Temperature</b>	89
R. Babicheva, S.V. Dmitriev, Y. Zhang, S.W. Kok and K. Zhou	
<b>The Role of a Threshold Stress on the Superplasticity of Ceramics Revisited</b>	95
C. Retamal, M. Lagos, B.M. Moshtaghioun and D. Gómez-García	
<b>Two-Dimensional Observation of the Core–Mantle Model for Superplastic Flow in an ODS Ferritic Steel</b>	100
H. Masuda, H. Tobe, E. Sato, Y. Sugino and S. Ukai	
<b>Strain-Rate Sensitivity Enhanced by Grain-Boundary Sliding in Creep Condition for AZ31 Magnesium Alloy at Room Temperature</b>	106
T. Matsunaga, H. Somekawa, H. Hongo and M. Tabuchi	
<b>Modelling and Analysis of High Strain Rate Deformation at Elevated Temperature in Friction Stirring of Aluminum Alloys</b>	110
K. Kumai, H. Fukushige and Y. Takayama	
<b>Effect of Solute Elements on Grain Refinement during Friction Stir Processing in High-Purity Aluminum</b>	116
T. Uesugi, H. Iwami, Y. Takigawa and K. Higashi	

## **Enhanced Plasticity of Pure Nickel Processed by HPT Consolidation of Rapid Quenched Ribbons**

A.P. Zhilyaev

122

## **Research on Superplasticity of Supplied 5A06 Aluminium Alloy Sheet**

B.P. Bi and Y. Wang

127

## **Chapter 3: Superplastic Materials**

### **Current Assisted Superplastic Forming of Titanium Alloy Bellows**

G.F. Wang, T. Zhao, M. Yang and X.Y. Zhao

135

### **The Effect of $\alpha$ -Phase Grains Morphology in Initial Microstructure on Superplasticity of Two-Phase Titanium Alloys**

M. Motyka and J. Sieniawski

143

### **Mechanism of Low-Temperature Superplastic Deformation in Aluminum Alloys Containing a Dispersion of Nanoscale $Al_3(Sc,Zr)$ Particles**

R. Kaibyshev

150

### **Hot Forming of Mg AZ31B Alloy Sheet Processed by Warm Rolling**

A.R. Antoniswamy, A.J. Weldon, E.M. Taleff, L.G. Hector and J.T. Carter

157

### **High-Temperature Plasticity in Super Hard Boron Carbide Ceramics**

B.M. Moshtaghioun, D. Gómez-García and A. Domínguez-Rodríguez

166

### **Influence of Superplastic Forming on Reduction of Yield Strength Property for Ti-6Al-4V Fine Grain Sheet and Ti-6Al-4V Standard**

P. Sartkulvanich, D. Li, E. Crist and K.O. Yu

171

### **Characterization of a Superplastic Titanium Alloy with an Experimental and Numerical Approach Based on Free-Inflation Tests**

D. Sorgente, A. Piccininmi, V. Piglionico, P. Guglielmi, D. Grossi, G. Palumbo and L. Tricarico

177

### **Hot Forming Process Analysis of Ti6Al-4V Alloy: Experiment, Behaviour Modelling and Finite Element Simulation**

V. Velay, H. Matsumoto, V. Vidal, L. Penazzi, F. Nazaret, Y. Marcel and M. Bouillane

183

### **Superplasticity and Characterization of TIMETAL®54M Sheets**

Y. Kosaka and P. Gudipati

190

### **Thermo-Mechanical Modeling of Distortions Promoted during Cooling of Ti-6Al-4V Part Produced by Superplastic Forming**

M. Rollin, V. Velay, L. Penazzi, T. Pottier, T. Sentenac, L. Iranzo-Perez, A. Dupuy and G.

Khelifati

196

### **Development of Al-Mg Alloys with Different Levels of Mn and Fe for Super-Plastic Forming**

I. Pushkareva and H.O. Jin

202

### **Chronicling the Development of a High Strength 5xxx-Based Superplastic Aluminium Alloy**

S.P. Miller-Jupp

208

### **Improving the Microstructure and Mechanical Properties of a Cast Mg-9Al-1Zn Alloy Using Friction Stir Processing**

W.H. Loke, R.N. Ibrahim and S. Lathabai

214

### **Processing, Superplastic Properties and Friction Stir Welding of Fine-Grained AZ31, AZ91, AE42 and QE22 Magnesium Alloys**

T. Ryspaev, M. Janecek, R. Kral, V. Wesling and L. Wagner

220

### **Fabrication of Dense Nanostructured Bulk Ceramics by Means of Spark-Plasma-Sintering (SPS) Processing**

K. Morita, B.N. Kim, H. Yoshida, K. Hiraga and Y. Sakka

225

### **Energy Absorption of Superplastic Zn-22Al Alloy Foam Manufactured through Melt Foaming Process**

S. Ogawa, K. Sekido and K. Kitazono

231

### **Deformation Mechanism and Characteristics of Thin-Walled Component in Aluminum Alloy**

K. Liao, F. Chen and Y.P. Liu

237

### **High-Temperature-Tensile-Deformation Behavior of Ti-6Al-4V Alloy with the Acicular $\alpha'$ Martensite Microstructure**

T. Nishihara, H. Matsumoto, Y. Iwagaki, T. Shiraishi and Y. Ono

243

<b>Influence of Second-Phase Particles on the Hot Ductility of Al–Mg Solid-Solution Alloys</b>	249
T. Ito, K. Kawasaki and T. Mizuguchi	
<b>Superplastic Deformation Behavior in Dual-Phase Mg-Ca Alloy</b>	256
T. Yano, N. Ikeo, H. Watanabe and T. Mukai	
<b>Elimination of Shrinkage Cavities by Liquid Hot Isostatic Pressing in Aluminum Alloys under Superplastic Conditions</b>	261
D. Tagirov and R. Kaibyshev	
<b>Deformation Characteristics of 6066 and 6069 Aluminum Alloys at Elevated Temperatures</b>	267
S. Koizumi, J. Kobayashi and G. Itoh	
<b>Tensile Properties of Recrystallized and Unrecrystallized Tungsten at Elevated Temperatures</b>	272
N. Tano, J. Kobayashi, G. Itoh, A. Kurumada and S. Mukae	
<b>Superplasticity of an AA2519 Aluminum Alloy</b>	278
I. Žukov, M. Gazizov and R. Kaibyshev	

## Chapter 4: Microstructure Refinement

<b>Severe Plastic Deformation under High Pressure for Production of Superplastic Materials</b>	287
Z. Horita	
<b>Production, Properties and Application of Ultrafine-Grained Titanium Alloys</b>	294
S. Zherebtsov and G. Salishchev	
<b>Mechanical Behavior and Microstructure Evolution during Superplastic Deformation of the Fine-Grained AlCoCrCuFeNi High Entropy Alloy</b>	302
N. Stepanov, D.G. Shaysultanov, G.A. Salishchev and O.N. Senkov	
<b>Effects of Initial Microstructure and Deformation Method on Grain Refinement in a Cu-Cr-Zr Alloy</b>	308
I. Shakhova, A. Belyakov and R. Kaibyshev	
<b>On Regularities of Grain Refinement through Large Strain Deformation</b>	314
A. Belyakov, Z. Yanushkevich, M. Tikhonova and R. Kaibyshev	
<b>Effect of Natural Aging on RT and HSR Superplasticity of Ultrafine Grained Zn-22Al Alloy</b>	320
M. Demirtas, G. Pürçek, H. Yanar, Z.J. Zhang and Z.F. Zhang	
<b>Microstructural Evolution of Body-Centred Cubic Fe-Al Alloy by Friction Stir Processing with SiC Particles Addition</b>	326
T. Nagaoka, Y. Kimoto, H. Watanabe, M. Fukusumi, Y. Morisada, H. Fujii and H.K.D.H. Bhadeshia	
<b>Nanostructurization of Magnesium Alloy via Friction Stir Lap Processing</b>	332
Y. Kimoto, T. Nagaoka, H. Watanabe, M. Fukusumi, Y. Morisada and H. Fujii	
<b>Superplastic Behavior of Friction-Stir Welded Joints of an Al-Mg-Sc Alloy with Ultrafine-Grained Microstructure</b>	338
S. Malopheyev, S. Mironov, I. Vysotskiy and R. Kaibyshev	
<b>Effect of Hydrogen on the Development of Superplastic Deformation in the Submicrocristalline Ti-6Al-4V Alloy</b>	344
G.P. Grabovetskaya, E.N. Stepanova, I.V. Ratochka, I.P. Mishin and O.V. Zubudchenko	
<b>Experimental and Simulation Modeling of Nickel-Based Superalloy Pressure Welding Process</b>	350
E. Galieva, V. Valitov, R. Lutfullin, S.V. Dmitriev, A. Akhunova and M. Mukhametrahimov	
<b>Deformation Nanostructuring and Superplastic Processing of Metallic Materials</b>	355
F.Z. Utyashev and S.K. Mukhtarov	
<b>Two-Dimensional Molecular Dynamics Simulation for Studying of Grain Refinement</b>	361
J.A. Baimova and S.V. Dmitriev	
<b>Nanostructuring of 2xxx Aluminum Alloy under Cryorolling to High Strains</b>	367
E. Avtokratova, S.V. Krymskiy, A.V. Mikhaylovskaya, O. Sitdikov and M. Markushev	
<b>Superplastic Behavior of an AA2139 Subjected to ECAP</b>	373
M. Gazizov and R. Kaibyshev	
<b>Ultrafine-Grained Structure Produced by FSW and ECAP in Al-Mg-Sc-Zr Alloy: Comparison</b>	379
V. Kulitskiy, S. Malopheyev, Y. Buranova, S.V. Divinski, G. Wilde and R. Kaibyshev	

<b>Improvement of Microstructure and Mechanical Properties of 7050-T7451 Aluminum by a Novel Double-Sided Friction Stir Processing</b>	385
W.J. Yang, J.Z. Li, X. Wen and H. Ding	
<b>Ultrafine-Grained Structure and Mechanical Properties of a High-Mn Twinning Induced Plasticity Steel</b>	392
P. Kusakin, A. Belyakov, R. Kaibyshev and D.A. Molodov	
<b>Submicrocrystalline Austenitic Stainless Steel Processed by Cold or Warm High Pressure Torsion</b>	398
M. Tikhonova, N. Enikeev, R.Z. Valiev, A. Belyakov and R. Kaibyshev	
<b>Superplastic Behavior of a Cu-Cr-Zr Alloy Subjected to ECAP</b>	404
R. Mishnev, I. Shakhova, A. Belyakov and R. Kaibyshev	
<b>Formation of Ultrafine-Grained Structures in 304L and 316L Stainless Steels by Recrystallization and Reverse Phase Transformation</b>	410
M. Odnobokova, A. Belyakov, A. Kipelova and R. Kaibyshev	
<b>Effect of Rolling on Superplastic Behavior of an Al-Mg-Sc Alloy with Ultrafine-Grained Structure</b>	416
A. Dubyna, S. Malopheyev and R. Kaibyshev	
<b>Low-Temperature Superplasticity in an Al-Mg-Sc Alloy Processed by ECAP</b>	422
D. Yuzbekova, A. Mogucheva and R. Kaibyshev	
<b>Superplasticity in a 5024 Aluminium Alloy Subjected to ECAP and Subsequent Cold Rolling</b>	428
A. Mogucheva, D. Yuzbekova and R. Kaibyshev	
<b>Development of Fine-Grained High-Mn Steel by Cold Rolling and Annealing</b>	434
Z. Yanushkevich, A. Belyakov, R. Kaibyshev, C. Haase and D.A. Molodov	
<b>Austenite Grain Size Refinement of Multi-Microalloyed Low Carbon Steel Using Severe Plastic Deformation at High Temperature</b>	440
X.W. Kong, T.Z. Sui and Z.Y. Hu	
<b>Microtextural Changes and Superplasticity in an Al-7075 Alloy Processed by High-Pressure Torsion</b>	445
A. Loucif, Y. Huang, A.L. Helbert, T. Baudin, S. Sabbaghianrad and T.G. Langdon	

## Chapter 5: Industrial Application

<b>Constitution of ISO and JIS for Method of Tensile Testing of Superplastic Materials</b>	453
K. Kitazono, Y. Takayama, Y. Motohashi and F. Ono	
<b>Heat Assisted Dieless Drawing Process of Superplastic Metal Microtubes - From Zn22Al to <math>\beta</math> Titanium Alloys</b>	459
T. Furushima and K. Manabe	
<b>The Mechanics of Superplastic Forming - How to Incorporate and Model Superplastic and Superplastic-Like Conditions</b>	468
O.I. Bylya, R.A. Vasin and P.L. Blackwell	
<b>About Formability of Ultra-Fine Grained Metallic Materials</b>	476
I. Sabirov, E. Moreno-Valle, M.Y. Murashkin and R.Z. Valiev	
<b>A New Lead-Free Solder Joint Utilizing Superplastic Al-Zn Eutectoid Alloy for Next Generation SiC Power Semiconductor Devices</b>	482
J. Onuki, A. Saitou, A. Chiba, K. Tamahashi, Y. Motohashi and Y. Kawamata	
<b>Titanium Superplastic Forming by Aurock: A Complete Integrated Solution from CAD File to Final Part</b>	488
O. Barrau, F. Nazaret, M. Le Fournier, E. Lebard and Y. Lemaoult	
<b>Superplastic Forming of a Complex Shape Automotive Component with Optimized Heated Tools</b>	494
D. Sorgente, G. Palumbo, L.D. Scintilla, R. Brivio, G. Carozzi and L. Tricarico	
<b>Efficient Diffusion Bonding of Large Scale Parts</b>	500
S. Jahn, F. Gemse, U. Broich and S. Saendig	
<b>Research on Work Hardening Type Superplastic Deformation Behavior of FSW Titanium Alloy</b>	506
M.J. Fu, X.H. Li, X.Q. Han and H.Y. Xu	
<b>Constitutive Modeling for the Simulation of the Superplastic Forming of AA5083</b>	512
F. Jarrar, R. Jafar, O. Tulupova, F. Enikeev and N. Al-Huniti	

<b>Effect of Sn Addition on Superplastic Properties of Zn-22mass%Al Eutectoid Alloy</b>	518
T. Itoi, F. Sato, Y. Takabayashi and M. Hirohashi	
<b>Research of Solid Compound Formation during Thermal Deformation Effect on Intermetallic Ni<sub>3</sub>Al-Alloy with a Heat-Resistant Alloy EP975 and Influence on the Physical, Mechanical and Performance Properties</b>	
V. Valitov, K. Povarova, O. Bazyleva, A. Drozdov, S. Ovsepyan and E. Galieva	523
<b>Effect of Different Proportion of Coarse and Fine Grain Microstructure on Superplastic Forming Characteristics</b>	
V. Pancholi, K. Rohit and A. Raja	528
<b>Hybrid Superplastic Forming of Non-Superplastic AZ31 Mg Alloy</b>	
M.L. Guo, M.J. Tan, X. Song and B.W. Chua	534
<b>An Analysis of Superplastic Forming in a Re-entrant Shape</b>	
G. Kumaresan and K. Kani	540
<b>Formabilities of C-Si-Al-Mn Transformation-Induced Plasticity-Aided Martensitic Sheet Steel</b>	
J. Kobayashi, Y. Nakashima, K.I. Sugimoto and G. Itoh	546
<b>Characterization of Superplastic Materials by Results of Free Bulging Tests</b>	
S.A. Aksenov, I.Y. Zakhарiev, A.V. Kolesnikov and S.A. Osipov	552
<b>Superplastic Behavior of ATI 718Plus Superalloy</b>	
S.K. Mukhtarov and F.Z. Utyashev	557
<b>Hot Forming and Superplastic Forming: Presses Evolution and New Applications in the Aerospace Industry</b>	
G. Sana, A. Petiot and A. Giraudet	563
<b>The Superplastic Properties and Microstructures Evolution of High Nb Ti<sub>3</sub>Al Based Alloy</b>	
X.Q. Han and M.J. Fu	568
<b>Production of a Superplastic Vibration-Damping Steel Sheet Composite Using Friction Stir Forming</b>	
H. Mofidi Tabatabaei, T. Hara and T. Nishihara	574
<b>Topology Optimization and Process Validation of a SPF/DB Cylinder Structure</b>	
J. Shao, Z.Q. Li, H.Y. Xu, X.Q. Han and R.X. Zhang	581
<b>The Influence of Ti-6-4 Alloy Interlayer on Ti3Al Alloy DB Quality and Interface Mechanical Properties</b>	
H.Y. Xu, M.J. Fu, X.Q. Han, J. Shao and Z.Q. Li	586
<b>Superplasticity Effect Demonstrated by Gas Forming Hot Bent AA5XXX Sheets into V-Shaped Trough Containing Uneven Concavities</b>	
C.H. Chen, J.Y. Wang, Y.K. Fuh, S. Lee, C. Liu and C.L. Chu	592
<b>Development of Superplastic Dieless Drawing Apparatus for 3Y-TZP Zirconia Ceramic Tube</b>	
T. Furushima, Y. Hirose, K. Tada and K. Manabe	597
<b>Innovative Methods for Investigating Key Process Variables in the Manufacture of Superplastically Formed Aero-Engine Components</b>	
N. Zuelli, C. Fleming, M. Farrell, R. Zante and L. Robinson	603
<b>Promises of Low-Temperature Superplasticity for the Enhanced Production of Hollow Titanium Components</b>	
A. Kruglov, R. Lutfullin, R. Mulyukov, M. Mukhametrakhimov, O. Rudenko and R. Safiullin	610
<b>New Technologies Development and Equipment for Local Shape-Forming of the Complicated Parts Made of Heat-Resistant Alloys under Superplastic Deformation Conditions</b>	
F.Z. Utyashev, R. Mulyukov, R. Sukhorukov and V. Valitov	615
<b>Finite Element Analysis and Validation of the Superplastic Forming of Multi-Sheet Structures</b>	
P. Anderson	621
