

# Table of Contents

## Preface, Committees, Sponsors

## Chapter 1: Research and Development of Engineering Materials and Processing Technologies

<b>Altering the Microstructure of Pearlitic Steel Using Pulsed Electric Current</b> B. Elliott-Bowman, A.C. Cook, P. Brown, D. Dye and R.S. Qin	3
<b>Thermal Reactions of Mechanically Milled Wolframite and Thermal Coal Mixtures</b> L. Telmenbayar and J. Temuujin	7
<b>Ultrasonic Impact Treatment of Fine- and Coarse Grained Commercial Purity Titanium</b> R. Hairullin, A. Kozelskaya and M. Kazachenok	12
<b>Influence of Salt Quantity on Recovery Yield of Heterogeneous Aluminium Scrap</b> S. Capuzzi, G. Timelli, L. Capra and L. Romano	16
<b>Mechanical Behavior of PLA/Clay Reinforced Nanocomposite Material Using FE Simulations: Comparison of an Idealized Volume against the Real Electron Tomography Volume</b> P. Jimbert, M. Iturrondobeitia, R. Fernandez-Martinez, T. Guraya and J. Ibarretxe	20
<b>Characterization of Efflorescences of Ambient and Elevated Temperature Cured Fly Ash Based Geopolymer Type Concretes</b> J. Temuujin, C. Ruescher, A. Minjigmaa, B. Darkhijav, B. Davaabal and B.E. Battsetseg	25

## Chapter 2: Biotechnologies

<b>Valorization of Waste Food Industry for Producing Second Generation Bioethanol</b> V.E. Capdevila, M.C. Gely, V. Kafarov and A.M. Pagano	33
<b>Technical-Economic Study of the Esterification Process of Used Vegetable Oils (UVOs) Using Heat Exchange Networks (HENs)</b> M.F. Laborde, M. Serna Gonzalez, A.M. Pagano and M.C. Gely	40
<b>Vegetable Extracts as Inhibitors of Carbon Steel Corrosion in Acidic Environment</b> L. Benea, E. Dănilă and V.M. Dumitrașcu	46

## Chapter 3: Materials and Alloys for Biomedical Application

<b>Studies on Titanium Cenosphere Composite Developed by Powder Metallurgy Route</b> D. Dutta Majumdar, D.P. Mondal, A. Roy Choudhury, H. Rao and J.D. Majumdar	55
<b>Electrochemical Behavior of Cobalt-Chromium Alloy as Biomaterial in Different pH Environments</b> L. Benea, V.M. Dumitrașcu and E. Dănilă	59
<b>Comparative Tribocorrosion Resistance in Physiological Solution of Untreated and Modified Ti-6Al-4V Alloy Surface by Electrodeposition of Hydroxyapatite Coatings into Nanoporous Titania Layers</b> E. Dănilă and L. Benea	64
<b>Characterization and Corrosion-Resistance Performance of Hybrid Co/UHMWPE Composite Biocoatings</b> L. Benea, I. Bounegru and A. Chiriac	69
