## Preface

## Chapter 1: Industrial Engineering

|                                                                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>An Open Architecture for the Sustainable Lifecycle of Products and Manufacturing Processes from the Holonic Paradigm</b>                                                          |     |
| M.J. Ávila Gutiérrez, F. Aguayo González, J.R. Lama Ruiz and A.M. Martín Gómez                                                                                                       | 3   |
| <b>Water and Power Consumption, Ethanol Production and CO<sub>2</sub> Emissions: High-Scale Sugarcane-Based Biorefinery Toward Neutrality in Carbon</b>                              |     |
| R.d.F. Dias, H.B. Carminati, O.d.Q.F. Araújo and J.L. de Medeiros                                                                                                                    | 9   |
| <b>A Lifecycle Sustainability Assessment of CO<sub>2</sub> Emissions, Energy Consumption and Social Aspects of Methylic and Ethylic Biodiesel Using Principal Component Analysis</b> |     |
| S.F. Interlenghi, J.L. de Medeiros and O.d.Q.F. Araújo                                                                                                                               | 18  |
| <b>Direct Digital Manufacturing in the Context of a Circular Economy</b>                                                                                                             |     |
| D.A. Fonseca and F.J.P. Simões                                                                                                                                                       | 30  |
| <b>Innovation in Lean Manufacturing by Kansei-Chisei Engineering</b>                                                                                                                 |     |
| A. Córdoba, F. Aguayo González, J.R. Lama Ruiz and A. de las Heras                                                                                                                   | 43  |
| <b>Transparent Acquisition and Processing of Energy Data in the Field of Industrial Production - Requirements and Applications</b>                                                   |     |
| M. Brandmeier, N. Eckl, D. Weberling and J. Franke                                                                                                                                   | 47  |
| <b>Evaluation and Assessment of Additive Manufacturing Processes Based on the Least Energy Demand in Application for Sustainable Production</b>                                      |     |
| S. Kreitlein, V. Gerter, N. Urban and J. Franke                                                                                                                                      | 56  |
| <b>Portugal Mineral Resources Cluster: Collective Strategy for Sectoral Recognition and Sustainable Development</b>                                                                  |     |
| L. Lopes, M. Peres, M. Goulão, L. Martins and I. Frazão                                                                                                                              | 64  |
| <b>Environmental Sustainability Evaluation for an Automobile Manufacturing Industry Using Multi-Grade Fuzzy Approach</b>                                                             |     |
| S. Nallusamy, M. Ganesan, K. Balakannan and C. Shankar                                                                                                                               | 72  |
| <b>Impact of Product-Service Systems on the Energy Efficiency of Machine Tools</b>                                                                                                   |     |
| G. Mert and J.C. Aurich                                                                                                                                                              | 79  |
| <b>The Role of Innovative Projects for Sustainable Development of Enterprises</b>                                                                                                    |     |
| A.M.G. Militaru, B. Fleacă, C. Simion and M. Popescu                                                                                                                                 | 86  |
| <b>A Holistic Performance Management Approach in Business Networks</b>                                                                                                               |     |
| M. Moritz, D. MANOLACHE and M. Gheorghe                                                                                                                                              | 95  |
| <b>The Improvement of Metal Stamping Procurement Process</b>                                                                                                                         |     |
| P. Boonkanit and S. Parklumjiek                                                                                                                                                      | 103 |
| <b>Sustainable Restructuring Process in Polish Steelworks</b>                                                                                                                        |     |
| B. Gajdzik                                                                                                                                                                           | 107 |
| <b>Study of Environmental Performance of Taiwan's Manufacturing Industry</b>                                                                                                         |     |
| M.L. Huang, T.C. Kuo, C.H.J. Lin and Y.Y. Lo                                                                                                                                         | 111 |
| <b>Ultra-Efficiency Factory - Framework and Holistic Approach to Increase and Evaluate Efficiency and Sustainability</b>                                                             |     |
| T. Kuhlmann and A. Sauer                                                                                                                                                             | 118 |
| <b>Evaluating Energy Efficiency of Production Machine</b>                                                                                                                            |     |
| T.A.L. Nguyen, L.N.H. Tran, H. Paris and M. Museau                                                                                                                                   | 126 |
| <b>Energy Footprint Mapping Analysis-Based Energy Saving Product Design Study</b>                                                                                                    |     |
| Y. Tian, L. Zhang, T.Y. Wang, S.L. Tian, M.T. Jing and P.L. Li                                                                                                                       | 134 |
| <b>Corporate Social Responsibility Behavior: Impact on Firm's Financial Performance in an Information Technology Driven Society</b>                                                  |     |
| L.Z. Chen, E.O. Marfo and X.H. Hu                                                                                                                                                    | 139 |

## **Sustainable Manufacturing Engineering and Innovative Projects of Teaching, Research and Entrepreneurship**

M.E. Peralta Álvarez, F. Aguayo González, J.R. Lama Ruiz, M.J. Ávila Gutiérrez and E. González-Regalado

151

## **Chapter 2: Sustainable Technologies in Machinery Production**

### **Recycling of PA-12 in Additive Manufacturing and the Improvement of its Mechanical Properties**

P. Mägi, A. Krumme and M. Pohlak

159

### **Mechanical Properties and Surface Integrity of Recycling Aluminum 6061 by Hot Extrusion Process**

S.N. Ab Rahim and M.A. Lajis

165

### **Integrating Simulation with Experiment for Recycled Metal Matrix Composite (MMC-Al<sub>R</sub>) Developed through Hot Press Forging**

A. Ahmad, M.A. Lajis, S. Shamsudin and N.K. Yusuf

169

### **Direct Recycling of Aluminium Chips into Composite Reinforced with *In Situ* Alumina Enrichment**

A. Wagiman, M.S. Mustapa, M.A. Lajis, S. Shamsudin, M.I.M. Masirin and M.H. Rady

175

### **Life Cycle Assessment on the Effects of Parameter Setting in Direct Recycling Hot Press Forging of Aluminum**

M.A. Lajis, N.K. Yusuf and A. Ahmad

181

### **Formation of Ferrosilicon Alloy at 1550°C via Carbothermic Reduction of SiO<sub>2</sub> by Coal and Graphite: Implication for Rice Husk Ash Utilization**

S. Kongkarat, M. Boonyaratchinda and C. Chobtham

187

### **Ecological Fickerts Used in the Dimension Stones Polishing Reinforced with Silica from the Rice Hull Ash**

W.F.G. Dorigo, L.L.L. da Silveira and P.F. de Almeida

196

### **Green Manufacturing - Textured Novel Cutting Tool for Sustainable Machining: A Review**

A. Farooqi and N. bin Yusoff

205

### **Understanding Cold Spray for Enhanced Manufacturing Sustainability**

C.A. Widener, M. Ellingsen and M. Carter

214

## **Chapter 3: Sustainable Technologies in Chemical Production**

### **Technical, Economic and Environmental Viability of Offshore CO<sub>2</sub> Reuse from Natural Gas by Dry Reforming**

B.C. de S. Lima, O.d.Q.F. Araújo, J.L. de Medeiros and C.R.V. Morgado

223

### **Solar Fuels from CO<sub>2</sub> Photoreduction over Nano-Structured Catalysts**

P.C. Sahoo, S. Martha and K. Parida

231

### **Development of Peat Processing Methods for Production of Innovative Products**

K. Irtiseva, J. Baronins, J. Krūmiņš, J. Ozolins, M. Kļaviņš and O. Medne

250

### **Synthesis of Ammonia Directly from Air and Water *via* a Single-Chamber Reactor Using Lanthanum Chromite-Based Composite as an Electrocatalyst**

I.A. Amar and M.M. Ahwidi

257

### **Extremophiles - Platform Strains for Sustainable Production of Polyhydroxyalkanoates**

I. Pernicova, D. Kucera, I. Novackova, J. Vodicka, A. Kovalcik and S. Obruca

267

### **Desorption of Phenols from Anion Exchange Resins after the Separation of Wood Pyrolysis Products**

K. Meile, N. Iljina and A. Zhurinsh

273

### **Natural Deep Eutectic Solvent (NADES) as a Greener Alternative for the Extraction of Hydrophilic (Polar) and Lipophilic (Non-Polar) Phytonutrients**

Y.L. Kua and S. Gan

278
