

Table of Contents

Preface

Chapter 1: Metal-Organic Frameworks and Functional Nanocomposites

Synthesis, Structural and Optical Properties of Co Doped α-Sb₂O₄ Nanocomposites	
G.B. Bagihalli, S.N. Unki and V. Adimule	3
Enhancement of Band Gap Energy and Crystallinity of Cu-MOFs due to Doping of Nano Metal Oxide	
M. Challa, M.R. Ambika, S.R. Usharani, B.C. Yallur and V. Adimule	13
Influence of Nano Particles on Optical Properties of Cu-MOFs	
M. Challa, B.C. Yallur, M.R. Ambika and V. Adimule	23
Modulation of Optical Band Gap of 2-Amino Terephthalic Acid Cu-MOFs Doped with Ag₂O and rGO	
M. Challa, M.R. Ambika, S.R. Usharani, S. Batakurki and B.C. Yallur	35
Radish (<i>Raphanus sativus</i>) Leaves Mediated CuO-NiO Nanocomposite for Photocatalytic Activity	
V. Pavitra, H.P. Divya, B.M. Praveen, G. Nagaraju and Udayabhanu	47

Chapter 2: Nanostructures for Electronics and Optoelectronics Applications

Synthesis, Structural and Optical Properties of Co Doped Sm₂O₃ Nanostructures	
S.S. Nandi, V. Adimule and B.C. Yallur	59
Synthesis, Morphology and Enhanced Optical Properties of Novel GdxCo₃O₄ Nanostructures	
V. Adimule, B.C. Yallur, S.R. Batakurki and S.S. Nandi	71

Chapter 3: Materials and Technologies for Biomedical Engineering

Covalent Immobilization of REDV Peptide on Heparin Coating Promotes Selective Adhesion of Endothelial Cells	
P.X. Zheng, Z. Yu, L. Duan, J.H. Zhang, R. Fu and R. Jiang	85
Photothermally Triggered Control of the Drug Delivery System Using Doxorubicin-Loaded Mesoporous Silica for Effective Killing of Human Hepatoma Cells	
M. Li, Y.H. Huang, Y.P. Qin, B. Ren, H.Y. Song and Y.J. Qi	91

Chapter 4: Structural Materials

Effect of Process Parameters on Properties of Titanium Alloy during Thermal Simulation Deformation	
J.J. Tang, C. Liang, C.G. Xu and J.Q. Li	101
Effect of Alloying Elements on Strengthening Phase and Solidification Structure of Ti-Al-Mo-Zr Titanium Alloy	
J.J. Tang, C. Liang, C.G. Xu and J.Q. Li	107
Recent Advancements in Surface Modification by Gas Tungsten Arc Cladding Technique: A Review	
R. Ranjan and A.K. Das	113
