

Table of Contents

Preface

I. Microstructural Characterisation

Effect of Carbon Addition on the Microstructure and Properties of Unalloyed Titanium A. Szkliniarz	3
Structure of Aluminium Matrix Composite with Ceramic Preform Obtained by Centrifugal Infiltration Process A.J. Dolata	7
Plasticity and Microstructure of Magnesium - Lithium Alloys D. Kuc, E. Hadasik, J. Mizera and T. Mikuszewski	11
TEM and X-Ray Examinations of Intermetallic Phases and Carbides Precipitation in an Fe-Ni Superalloy during Prolonged Ageing K.J. Ducki, J. Mendala and L. Wojtynek	15
Effect of Solution Treatment on the Microstructure of Ti-C Alloys A. Szkliniarz and W. Szkliniarz	21
Scanning Transmission Electron Microscopy Studies of the Microstructure of High Chromium Steel after Long Time Exposure K.B. Rodak and A. Hernas	25
Effect of Boron Addition on the Microstructure of Ti-47Al-2W-0.5Si Alloy W. Szkliniarz and A. Szkliniarz	29

II. Advanced Thermal, Mechanical and Chemical Processing

Influence of Heat Treatment on the Hardness of ZnAl22Cu3 Alloy R. Michalik and A. Tomaszewska	35
Dissolution of Carbide Isolates in Acids Using Microwave Technique A. Wyciślik and J. Richter	39
The Correlation between the Surface Geometry of Tested Materials and the Shape of Lubricant Drop A.J. Dolata and J. Wieczorek	45
Influence of Forming on the Properties of Alloy Based on the Matrix of FeAl Intermetallic Phase J. Cebulski, K. Basa and D. Pasek	49
Production Methods of Thin, Narrow and Profiled Steel Strips J. Herian and K. Aniołek	53
Physical and Mechanical Properties of Composites with Aluminum Alloy Matrix Designed for Metal Forming J. Myalski, J. Wieczorek and A. Plachta	59
Influence of Deformation Parameters on the Structure in Selected Intermetallic from Al-Fe Diagram M. Jabłońska, D. Kuc and I. Bednarczyk	63
Estimation of Flow Stress of Zinc-Titanium Strip during Reverse Rolling M. Spyra, M. Tkocz and E. Hadasik	67
Characteristics of the Structure of Welded Joints in Sanicro 25 Steel P. Jamrozik and M. Sozańska	71
Influence of Copper Addition on Structure and Hardness of the ZnAl40Cu3 Alloy after Heat Treatment R. Michalik and A. Tomaszewska	75
The Repair Welding Technology of Casts Magnesium Alloy QE22 R. Kocurek and J. Adamiec	81
High Manganese TWIP Steel - Technological Plasticity and Selected Properties M. Jabłońska, G. Niewielski and R. Kawalla	87

The Potential and Application Areas of Forging Aided by Shear Stress M. Tkocz, Z. Cyganek and F. Grosman	91
Welding of Steel with High Manganese and Aluminum Content S. Lalik and G. Niewielski	95

III. Surface Engineering and Corrosion Resistance

The Structure of Coatings Obtained in the Zn-31Al-3Mg Bath on High-Silicon Steel H. Kania	101
Liquid Metal Embrittlement of Steel with a Coating Obtained by Batch Hot Dip Method in a Zn + 2% Sn Bath J. Mendala and P. Liberski	107
Influence of the Ion Nitriding Process on the Electrochemical Properties of X39Cr13 Steel Used for Surgical Instruments M. Basiaga and J. Przondziono	111
Synergistic Influence of the Addition of Al, Ni and Pb to a Zinc Bath upon Growth Kinetics and Structure of Coatings H. Kania and P. Liberski	115
Investigation of the Initial Stage of Hot Dip Zinc Coatings on Iron Alloys with Various Silicon Contents P. Liberski, A. Tatarek and J. Mendala	121
Kinetics of Growth and Structure of Coatings Obtained on Sandelin Steels in the High-Temperature Galvanizing Process H. Kania	127
Influence of Si and REE on the Corrosion Resistance of ZnAl40Cu3 Alloy R. Michalik	133
Kinetics of Corrosion Processes of Alloy on the Intermetallic Phase Matrix FeAl in High Temperature in Air Atmosphere J. Cebulski and S. Lalik	137
Influence of the Type of Medical Sterilisation on Electrochemical Properties of Passive Layer Created on X10CrNi 18-8 Steel J. Przondziono and W. Walke	141
The Structure and Growth Kinetics of Zinc Coatings on Link Chains Produced of the 23MnNiCrMo5-2 Steel H. Kania and P. Liberski	145
Influence of Corrosion in "Acid Rain" on the Structure of Surface Layer of the ZnAl22Cu3 Alloy R. Michalik	151
Gas Corrosion of Chromium-Manganese Steel in Atmospheres with Low Oxygen Partial Pressure R. Przeliorz and J. Piątkowski	157
Resistance to Electrochemical Corrosion under Conditions of Sterilisation of Guide Wires Used in Endourological Treatment J. Przondziono and W. Walke	163
Corrosion Resistance of Zn-31AlMg Coatings Obtained by Batch Hot Dip Method H. Kania and M. Bierońska	167

IV. Materials and Environment

Classification and Assessment of Environmental Aspects of Converter and Electric Steel Plants B. Gajdzik, A. Wycislik and K. Janiszewski	175
Evaluation of Refractory Lining of the Blast Furnace Hearth and Bottom in Five Years of its Operation on the Basis of the Isotherms Shapes G. Kopeć and B. Machulec	179
Effects of Raw Material Contaminants on the Ferrosilicon Melting Process in the Submerged Arc Furnace B. Machulec and W. Bialik	183

Technological Effects of Metallurgical Industry Restructuring in Poland B. Gajdzik and K. Janiszewski	187
Influence of the Steel Scrap Classes on the Liquid Steel Output Melt in Electric Arc Furnace K. Janiszewski, L. Socha and K. Gryc	191
Utilization of Metallurgical Waste in Non-Metallurgical Industry T. Lis, K. Nowacki and T. Małysa	195
Evaluation of the Applicability of Sanicro 25 Steel in Supercritical Boilers P. Jamrozik and M. Sozańska	201
The Influence of Slenderness Ratios of Multi-Hole Ceramic Filters from $S_F - 1.67$ to $S_F - 8.36$ of Filter Surface on Efficiency of Liquid Steel Refining from Non-Metallic Phase K. Janiszewski, B. Gajdzik and A. Wyciślik	205

V. Advanced Materials for Transport Industry

Non-Metallic Inclusions in Castings Made of Nickel-Base Superalloys B. Chmiela and S. Roskosz	211
Metallurgical Quality of Feed Ingots and Castings Made from Nickel and Cobalt Superalloys F. Binczyk, J. Cwajna, P. Gradoń, M. Sozańska and M. Cieśla	215
Effect of Cooling Rate and Modification on the Structure of Cast AlSi17 Alloy J. Piątkowski and T. Matuła	221
X-Ray Analysis of the Precipitation Process in an Fe-Ni Superalloy L. Pająk, K.J. Ducki and L. Wojtynek	225
The Effect of Heat Treatment on Creep Resistance of Castings from the Modified Superalloy MAR-247 M. Cieśla, F. Binczyk and M. Mańka	229
Nucleation and Growth of Primary Silicon Crystals in AlSi Alloy after Modification with CuP and Overheating to a Temperature of 920°C J. Piątkowski	237
Application of Incremental Metal Forming for Production of Aircraft Integral Panels M. Tkocz and F. Grosman	243
Analysis of Cracking Process in Conditions of High-Temperature Creep of Castings Form the Modified Superalloy IN-713C M. Cieśla, F. Binczyk and M. Mańka	247
Porosity in Turbine Blades Cast into New Shell Moulds Made of SiC Based Ceramics S. Roskosz	255
Research on Mechanical Properties of Thin Sheets Blanks Made of Creep-Resisting Nickel Superalloys M. Hyrcza-Michalska	259
Analysis of the Cracking Processes of Jointing Components Used in Turbine Valve Chest M. Cieśla and K. Mutwil	263
