

Table of Contents

Preface, Sponsors and Committees

I. Nano-Structure Physics and Nano-Material Science

High Mobility Ge-Based CMOS Device Technologies

S. Takagi, S. Dissanayake and M. Takenaka 1

SiGe-Mixing-Triggered Rapid-Melting-Growth of High-Mobility Ge-On-Insulator

T. Sadoh, K. Toko, M. Kurosawa, T. Tanaka, T. Sakane, Y. Ohta, N. Kawabata, H. Yokoyama and M. Miyao 8

Impact of Self-Heating Effect on the Electrical Characteristics of Nanoscale Devices

Y. Kamakura, T. Zushi, T. Watanabe, N. Mori and K. Taniguchi 14

Functional Device Applications of Nanosilicon

N. Koshida, T. Ohta, Y. Hirano, R. Mentek and B. Gelloz 20

Tunable Single-Electron Turnstile Using Discrete Dopants in Nanoscale SOI-FETs

D. Moraru, K. Yokoi, R. Nakamura, S. Miki, T. Mizuno and M. Tabe 27

KFM Observation of Electron Charging and Discharging in Phosphorus-Doped SOI Channel

M. Anwar, D. Moraru, Y. Kawai, M. Ligowski, T. Mizuno, R. Jabłoński and M. Tabe 33

Photoluminescence Characteristics of Ultra-Thin Silicon-on-Insulator at Low Temperatures

Y. Sakurai, S. Nomura, K. Shiraishi, K. Ohmori and K. Yamada 39

Investigation about I-V Characteristics in a New Electronic Structure Model of the Ohmic Contact for Future Nano-Scale Ohmic Contact

Y. Takada, M. Muraguchi, T. Endoh, S. Nomura and K. Shiraishi 43

Collective Electron Tunneling Model in Si-Nano Dot Floating Gate MOS Structure

M. Muraguchi, Y. Sakurai, Y. Takada, Y. Shigeta, M. Ikeda, K. Makihara, S. Miyazaki, S. Nomura, K. Shiraishi and T. Endoh 48

Electronic Structure and Spin-Injection of Co-Based Heusler Alloy/ Semiconductor Junctions

H. Itoh, S. Honda and J. Inoue 54

First-Principles Calculations of the Dielectric Constant for the GeO₂ Films

M. Tamura, J. Nakamura and A. Natori 60

Nanosize Electronics Material Analysis by Local Quantities Based on the Rigged QED Theory

M. Senami, Y. Ikeda, T. Hara and A. Tachibana 66

Novel Source Heterojunction Structures with Relaxed-/Strained-Layers for Quasi-Ballistic CMOS Transistors

T. Mizuno, M. Hasegawa and T. Sameshima 72

Effect of Al₂O₃ Deposition and Subsequent Annealing on Passivation of Defects in Ge-Rich SiGe-on-Insulator

H.G. Yang, M. Iyota, S. Ikeura, D. Wang and H. Nakashima 79

II. Nano-Processing and Nano-Devices

Controlled Synthesis of Carbon Nanowalls for Carbon Channel Engineering

H. Kondo, M. Hori, W. Takeuchi and M. Hiramatsu 85

Resistive Memory Utilizing Ferritin Protein with Nano Particle

M. Uenuma, K. Kawano, B. Zheng, M. Horita, S. Yoshii, I. Yamashita and Y. Uraoka 92

Atomically Controlled Plasma Processing for Group IV Quantum Heterostructure Formation

M. Sakuraba, K. Sugawara and J. Murota 98

Nanometer-Scale Characterization Technique for Si Nanoelectric Materials Using Synchrotron Radiation Microdiffraction

S. Kimura, Y. Imai, O. Sakata and A. Sakai 104

Generation and Growth of Atomic-Scale Roughness at Surface and Interface of Silicon Dioxide Thermally Grown on Atomically Flat Si Surface

Y. Hayashi, R. Hasunuma and K. Yamabe 110

Nano-Surface Modification of Silicon with Ultra-Short Pulse Laser Process Y. Setsuhara and M. Hashida	117
Evaluation of Strained Silicon by Electron Back Scattering Pattern Compared with Raman Measurement and Edge Force Model Calculation M. Tomita, D. Kosemura, M. Takei, K. Nagata, H. Akamatsu and A. Ogura	123
Development of New Methods for Fine-Wiring in Si Using a Wet Catalytic Reaction C.L. Lee, T. Sugita, K. Tatsumi, S. Ikeda and M. Matsumura	129

III. Nano-System Functionality Integration

Optical Response of Si-Quantum-Dots/NiSi-Nanodots Stack Hybrid Floating Gate in MOS Structures N. Morisawa, M. Ikeda, K. Makihara and S. Miyazaki	135
Energy Band Engineering of Metal Nanodots for High Performance Nonvolatile Memory Application Y.L. Pei, T. Hiraki, T. Kojima, T. Fukushima, M. Koyanagi and T. Tanaka	140
Strained Ge and $\text{Ge}_{1-x}\text{Sn}_x$ Technology for Future CMOS Devices O. Nakatsuka, S. Takeuchi, Y. Shimura, A. Sakai and S. Zaima	146
Improved Electrical Properties and Thermal Stability of GeON Gate Dielectrics Formed by Plasma Nitridation of Ultrathin Oxides on Ge(100) H. Watanabe, K. Kutsuki, I. Hideshima, G. Okamoto, T. Hosoi and T. Shimura	152
Structural Change during the Formation of Directly Bonded Silicon Substrates T. Kato, T. Ueda, Y. Ohara, J. Kikkawa, Y. Nakamura, A. Sakai, O. Nakatsuka, S. Zaima, E. Toyoda, K. Izunome, Y. Imai, S. Kimura and O. Sakata	158
Microscopic Structure of Directly Bonded Silicon Substrates T. Kato, Y. Ohara, T. Ueda, J. Kikkawa, Y. Nakamura, A. Sakai, O. Nakatsuka, M. Ogawa, S. Zaima, E. Toyoda, H. Isogai, T. Senda, K. Izunome, H. Tajiri, O. Sakata and S. Kimura	164
Formation of Nanotubes of Carbon by Joule Heating of Carbon-Contaminated Si Nanochains H. Kohno and T. Nogami	171
Si Nanodot Device Fabricated by Thermal Oxidation and their Applications Y. Takahashi, M.Y. Jo, T. Kaizawa, Y. Kato, M. Arita, A. Fujiwara, Y. Ono, H. Inokawa and J.B. Choi	175
Influences of Carrier Transport on Drain-Current Variability of MOSFETs K. Ohmori, K. Shiraishi and K. Yamada	184
Resistive Switching in NiO Bilayer Films with Different Crystallinity Layers K. Kita, A. Eika, T. Nishimura, K. Nagashio and A. Toriumi	188

IV. Nano-Device Integrity for Variability / Fluctuation Management and Integration

Analysis of Threshold Voltage Variations in Fin Field Effect Transistors K. Tsutsui, Y. Kobayashi, K. Kakushima, P. Ahmet, V.R. Rao and H. Iwai	194
Capture/Emission Processes of Carriers in Heterointerface Traps Observed in the Transient Charge-Pumping Characteristics of SiGe/Si-Hetero-Channel pMOSFETs T. Tsuchiya, K. Yoshida, M. Sakuraba and J. Murota	201
Quasi-Ballistic Transport in Nano-Scale Devices: Boundary Layer, Potential Fluctuation, and Coulomb Interaction N. Sano and T. Karasawa	207
Effect of Back Bias on Variability in Intrinsic Channel SOI MOSFETs T. Hiramoto, T. Saraya and C.H. Lee	214
Discrete Dopant Effects on Threshold Voltage Variation in Double-Gate and Gate-All-Around Metal-Oxide-Semiconductor Field-Effect-Transistors N. Mori, Y. Kamakura, G. Mil'nikov and H. Minari	218
Interconnect Design Challenges in Nano CMOS Circuit K. Masu, S. Amakawa, H. Ito and N. Ishihara	224
