Preface, committee, organizers and sponsors

Chapter 1: Research and Development of the Metal Forming Technologies and Processes

Drawing Force Optimization Research on Forming Parameters of Drawing Wire Rod with Rotating Die under Coulomb Friction U.C. Chai, G.Y. Tzou and I.K. Tiong	3
Finite Element Analysis of Rolling Process to Locally Thin Metal Strips K. Fann, C.Y. Lin and Y.J. Chen	10
Experimental and Numerical Analysis of Titanium Alloy Microtube Tube-End Nosing Forming C.Y. Chen and T.C. Chen	16
Finite Element Simulation of Rotating Compression Forming Y.M. Hwang, K.S. Jhuang and H.C. Yu	22
Dry Progressive Stamping of Copper-Alloy Snaps by the Plasma Nitrided Punches T. Aizawa and H. Morita	28
Grain Size Effect on Optimum Clearance Determination in Blanking Non-Oriented Electrical Steel Sheet Z. Wang, R.G. Cui, X.K. Wang, J. He and S.H. Li	34
Process Analysis of Fabricating Elbow Tubes by Mandrel Bending Process I.Y. Oh, S.W. Han, Y.Y. Woo, J.H. Ra and Y.H. Moon	40
The Effect of Flange Length on the Distribution of Longitudinal Strain during the Flexible Roll Forming Process Y.Y. Woo, P.G. Kang, I.Y. Oh and Y.H. Moon	46
Dimensional Characteristics of Tailor Rolled Blanks Having Thickness Variations both in Longitudinal and Width Directions S.W. Han, H.S. Jung, Y.Y. Woo and Y.H. Moon	52
Mechanical and Microstructural Evolutions of the Laser Deposited Titanium Layers under Various Shielding Atmospheres T.W. Hwang, S.W. Han, D.M. Seo and Y.H. Moon	58
Deep Drawability of Ti/Steel/Ti Laminated Sheets Y. Harada, H. Ono and Y. Nishikubo	64
Study the Influence of Geometric Parameters on Springback in T-Section Aluminum Alloy Window Trim Strip Sheets Forming B. Zhu, Y.X. Zhao, Z.Q. Yu and H. Yan	70
Research on Single Pass Deep Drawing Spinning Formability of Cup-Shaped Parts Q.X. Xia, J.C. Long, F. Du and G.F. Xiao	77
Influence of Laser Shot Peening Parameters on the Surface Hardness and Roughness of 7075 Aluminum Alloy J.H. Zhang, X.Q. Cheng, Q.X. Xia and J.Y. Li	83
Investigation of a Two-Step Rotary Rim-Thickening Process of Disc-Like Blanks D.K. Wang, J.S. Jin and X.Y. Wang	89
Study on Thickness Distribution and Spring Back Phenomena of Sheet-Bulk Forming for Aluminum Alloy J.H. Ye and Q.C. Hsu	95
Investigation on Dynamic Impact Effect of Ultrasonic-Assisted Compression Test J. Hu, T. Shimizu and M. Yang	102
Study on Multi-Step Spinning Process for Disk-Like Part with Thickened Rim J.S. Jin, X.D. Su, X.Y. Wang and L. Deng	108
Micro-Drawing of Circular Cups with Thin Stainless Steel Sheets H.S. Su, F.K. Chen and K.M. Huang	114
Optimizing Design of the Cutting Tool in Cutting of Ultra-High Strength Steel Beam Part L. Dong, C. Li and S.H. Li	120

Geometric Design of Rectangular Cross-Sectional Springs Y.M. Hwang, D.S. Lin and S.L. Lin	126
The Numerical Simulation and Experiment Verification of the Large Aluminum Alloy Covering Part of Car Using Sequential Coupling Technology L.H. Lang, Q.D. Zhang and S. Alexandrov	132
Evolution of White Layer during Wire-Cutting and Comparison of Several Methods to Improve Surface Integrity for Fineblanking Tools X.L. Zhang, H.L. Peng, L.Y. Zhang, C.L. Cao, J.W. Yi, Y. Zhou and Y. Zhang	141
Warm Bulge Forming of Small Diameter A1100 Aluminium Tube S. Mitsui, T. Miyagawa, H. Yasui and S. Yoshihara	149
Analysis of Dieless Drawing to Form the End of Metal Wires under Proportional Shape Evolution with Slab Method K. Fann, C.F. Yu and C.H. Chang	155
Plasma Printing of Micro-Punch Assembly for Micro-Embossing of Aluminum Sheets T. Aizawa, K. Wasa, A. Farghali and H. Tamagaki	161

Chapter 2: Materials Properties Analysis, Measurement and Numerical Modeling

Comparing Two Selection Laws of Active Slip Systems in Finite Element Polycrystalline Model for Numerical Material Testing S. Onoshima and T. Oya	169
Influence of the Friction Factor on the Temperature Field in Upsetting of a Perfectly Plastic Strip under Plane Strain Conditions L.H. Lang, S. Alexandrov and W. Mishuris	175
Prediction of Shear Length in Blanking Process by Numerical Analysis S. Sato and M. Omiya	181
Numerical Biaxial Tensile and Tension-Compression Tests of Aluminum Alloy Sheet Using Crystal Plasticity Finite Element Method A. Yamanaka, N. Nemoto and T. Kuwabara	187
Ideal Flow Theory of Pressure-Dependent Materials for Design of Metal Forming Processes S. Alexandrov, V. Mokryakov and P.P. Date	193
Design of Flexible Bulge Testing System for Evaluating the Influence of Size Effect on Thin Metal Sheets C.Y. Chen, V.A.M. Cristino and C.H. Hung	199
Application of FEM and Abductive Network to Determine Forging Force and Billet Dimensions of Near Net-Shape Helical Bevel Gear Forging T.S. Yang and Y.L. Chang	205
Characterizing of Anisotropy and Asymmetry of Tubular Materials H. Li, H. Yang, J. Ma and Z.Y. Feng	211
Tensile and Compression Analyses to Investigate the Mesoscale Mechanical Characteristics Influential for Press Formability of CFRP Sheets T. Hayashi and T. Oya	217
Effect of Strain Path Change on Formability of TRIP Steels C. Zhou, W.T. Zhang, S.J. Zhang, J.J. Deng and Q.X. Xia	223
Effect of Different Processes on Hydrogen Storage Properties of AZ Magnesium Alloy S.J. Huang, C. Fang, V. Rajagopal and Y.L. Chen	230
Microstructure and Texture Evolution of 2024 Aluminum Alloy Sheet under Different Loading Conditions P. Zhou, L. Deng and X.Y. Wang	236
Hot Deformation Behavior of Al-Cu-Li-Mg-Zn-Zr-Sc Alloy in As-Cast and Hot-Rolled Condition Y.A. Erisov, S. Surudin and F.V. Grechnikov	244
