

# Table of Contents

## Preface

<b>Evolution of Recrystallization Textures - Classical Approaches and Recent Advances</b>	1
G. Gottstein	
<b>Structure and Formation of Polymer Single Crystal Textures</b>	25
S.Z.D. Cheng and C.Y. Li	
<b>Texturing and Grain Boundary Engineering for Materials Design and Development in the 21st Century</b>	39
T. Watanabe	
<b>From 2D to 3D Microtexture Investigations</b>	49
H.F. Poulsen and D. Juul Jensen	
<b>Tools for Polycrystal Plasticity Analyses</b>	67
P.R. Dawson and D.E. Boyce	
<b>Texture Development in Thin Films</b>	75
D.N. Lee	
<b>20 Years WIMV, History, Experience and Contemporary Developments</b>	95
S. Matthies	
<b>New Concepts to Measure, Calculate and Analyze Textures in Materials</b>	101
H. Weiland, J.M. Fridy and E. Llewellyn	
<b>On the Development of New Scalar Measures of Heterogeneity</b>	107
S.I. Wright, D.P. Field, R. Witt and C.A. Michaluk	
<b>X-Ray Combined QTA Using a CPS Applied to a Ferroelectric Ultrastructure</b>	113
M. Morales, D. Chateigner, L. Lutterotti and J. Ricote	
<b>Development of Grain-Orientation-Dependent Residual Stresses in Interstitial-Free Steel after Deformation</b>	119
Y.D. Wang, X.L. Wang, A.D. Stoica, Y.H. Sha, X. Zhao, L. Zuo and J.W. Richardson	
<b>Stereology for Recovering Grain Boundary Plane Distributions in the Crystal Frame</b>	125
R.J. Larsen and B.L. Adams	
<b>Interactive and Quantitative Texture Determination by Consecutive Inverse Pole Figures</b>	131
C.T. Chou, K.G. Dicks, P. Rolland, A.P. Davey and R.K. Walker	
<b>Texture and Microstructure Analysis with High-Energy Synchrotron Radiation</b>	137
H.J. Bunge, L. Wcislaw, H. Klein, U. Garbe and J.R. Schneider	
<b>Some Remarks about the Processing of Automatic EBSD Orientation Measurements in View of Texture Determination</b>	143
F. Wagner, N. Bozzolo, N. Dewobroto and N. Gey	
<b>Non-Destructive Texture Measurement</b>	149
H.G. Brokmeier	
<b>Recrystallization and Deformation Texture Components Separating by High-Energy X-Ray Diffraction</b>	155
Y.D. Wang, X.L. Wang, A.D. Stoica, J. Almer, U. Lienert, D.R. Haeffner and T.R. Watkins	
<b>Local Texture Measurements with High-Energy Synchrotron Radiation on NiAl Deformed in Torsion</b>	161
W. Skrotzki, R. Tamm, B. Klöden, C.G. Oertel, L. Wcislaw and E. Rybacki	
<b>Quantitative Texture Analysis with Hard (100 keV) Synchrotron X-Rays</b>	167
L. Wcislaw, H. Klein, H.J. Bunge, U. Garbe and J.R. Schneider	
<b>Neutron Diffraction Texture Study of NdFeB As-Cast Alloys and Magnets</b>	173
S. Rivoirard, D. Chateigner, P. de Rango and D. Fruchart	
<b>Measurement of Grain-Orientation-Dependent Stress and Stored Energy Using Spallation Neutron Source</b>	179
Y.D. Wang, X.L. Wang, A.D. Stoica and J.W. Richardson	
<b>Non-Destructive Texture Analysis of a Co-Extruded Cu-Nb Tube</b>	185
W. Ye, H.G. Brokmeier and V. Singer	
<b>Attenuation Corrections in Neutron Texture Experiment</b>	191
V. Luzin and H.G. Brokmeier	

<b>Optimization of Neutron Texture Experiment by Statistical Simulation of Pole Figures with Normal Distribution</b>	197
M.V. Borovkov and T.I. Savyolova	
<b>Orientation Correction Method of Distorted Samples during in situ Deformations Using a High Resolution EBSD</b>	203
J.H. Han, S.M. Baeck, K.H. Oh and Y.H. Chung	
<b>Orientation Maps on TEM</b>	209
J. Fundenberger, E. Bouzy, A. Morawiec and J.S. Lecomte	
<b>The Quantitative Analysis of Composite Materials by the RIETVELD Method with Texture Correction</b>	215
J.H. Bae, G. Heo, S.T. Oh, E.J. Shin, B.S. Seong, C.H. Lee and K.H. Oh	
<b>Characterisation of Orientation Noise during EBSP Investigation of Deformed Samples</b>	221
A. Godfrey, G.L. Wu and Q. Liu	
<b>Investigation of Online Texture Measurement in Steel Sheets Based on X-Ray Area Detector</b>	227
L. Chen, W.M. Mao, H.P. Feng and Y.N. Yu	
<b>Controlled Depth Penetration X-Ray Diffraction Measurement</b>	233
B. Bolle, A. Tidu, L. Jolly, C. Valot, C. Laruelle and J.J. Heizmann	
<b>Quantitative Surface Roughness Determination of Materials by AFM: Some Limitations</b>	239
A. Méndez-Vilas, M.J. Nuevo, M.L. González-Martín and L. Labajos-Broncano	
<b>On the Use of RMS Roughness for Surface Roughness Characterization</b>	245
A. Méndez-Vilas, M.J. Nuevo, M.L. González-Martín and L. Labajos-Broncano	
<b>Texture Development Dependence on Grain Boundary Properties</b>	251
A.D. Rollett	
<b>A Texture Component Crystal Plasticity Finite Element Method for Scalable Large Strain Anisotropy Simulations</b>	257
D. Raabe, K. Helming, F. Roters, Z. Zhao and J. Hirsch	
<b>The Relation between Texture, Twinning and Mechanical Properties in Hexagonal Aggregates</b>	263
C. Tomé, S.R. Agnew, M.A.M. Bourke, W.R. Blumenthal, D.W. Brown, G.C. Kaschner and P. Rangaswamy	
<b>Atomistic Model of Rapidly Moving Grain Boundaries in FCC Metals</b>	269
W.M. Mao	
<b>Theory of Orientation Gradients</b>	275
D. Raabe, Z. Zhao and F. Roters	
<b>Influence of Grain Neighbourhood on FCC Texture Simulations</b>	281
Z. Zhao, W.M. Mao and D. Raabe	
<b>Lattice Rotations of Individual Bulk Grains during Deformation</b>	287
G. Winther, L. Margulies, H.F. Poulsen, S. Schmidt, A.W. Larsen, E.M. Lauridsen, S.F. Nielsen and A.E. Terry	
<b>Prediction of Texture Development during Grain Growth in Pure Aluminum by Monte Carlo Simulation</b>	293
M. Kobayashi, Y. Takayama and H. Kato	
<b>Spin of a Grain in Interaction with Differently Deformed Neighbors by Compatibility Condition</b>	299
A.A. Zisman and V.V. Rybin	
<b>Successive Selection of Active Slip Systems by the Least Incompatibility Criterion and Corresponding Texture Simulation</b>	305
A.A. Zisman, N.Y. Zolotorevsky and N.Y. Ermakova	
<b>Polycrystal Deformation Model Incorporating the Shape and Spatial Coordination of Constitutive Crystals</b>	311
N.Y. Ermakova, A.A. Zisman and N.Y. Zolotorevsky	
<b>Learning with METIS: Pole Figures and Euler Space</b>	317
M. Büscher and G. Gottstein	
<b>Modeling Texture and Void Evolution in Polycrystals</b>	323
R.A. Lebensohn, C. Tomé and P.J. Maudlin	
<b>Influence of Selective Inactive Glide Plane on Texture Formation in Cold Rolling of Face Centered Cubic Metal</b>	329
H. Masui	

<b>A Model of Recrystallization Process in Motor Lamination Silicon Steel</b>	335
H.L. Li, J.T. Park and J.A. Szpunar	
<b>SELF-CON: A Self Consistent Software Package for Micromechanical Simulations</b>	341
J. Signorelli, S. Freschi, P.A. Turner and R.E. Bolmaro	
<b>Why Spin Sharing Seems to be Successful in Texture Simulations?</b>	347
R.E. Bolmaro, A.L. Fourty, M.A. Bertinetti, A. Roatta and J. Signorelli	
<b>Exploring Self-Consistent Models as a Source for Recrystallization Simulation</b>	353
R.E. Bolmaro, A.L. Fourty, M.A. Bertinetti, A. Roatta and J. Signorelli	
<b>Using Evolutionary Size Distributions to Model Recrystallization in Hot Rolled, Commercial Purity Aluminum Alloys</b>	359
J.P. Suni, H. Weiland and R.T. Shuey	
<b>Can we Relate the FCC Rolling Texture Transition to Cross Slip?</b>	365
T. Leffers and O.B. Pedersen	
<b>Finite Element Simulation of Grain Interaction and Orientation Fragmentation during Plastic Deformation of BCC Metals</b>	371
S.J. Park, H.N. Han, K.H. Oh, D. Raabe and J.K. Kim	
<b>Prediction of Deformation and Texture Evolution in the Vicinity of a Hard Particle in an FCC Crystal</b>	377
S.J. Park, S.H. Choi, K.H. Oh and J.A. Szpunar	
<b>Mathematical Insights for Rate-Dependent Slip Model in Crystal Plasticity</b>	383
K. Sekine and K.M. Eom	
<b>Finite Element Modeling of the Intragranular Reorientation and Stored Energy Induced by Deformation in an IF-Ti Steel Aggregate Submitted to Channel Die Compression</b>	389
P. Erieau and C. Rey	
<b>Modeling of Recrystallization Using Monte-Carlo Method Based on EBSD Data</b>	395
J. Tarasiuk, P. Gerber, B. Bacroix and K. Piękoś	
<b>Simulation of Ridging of Ferritic Stainless Steel Using Crystal Plasticity Finite Element Method</b>	401
H.J. Shin, J.K. An, S.H. Park and D.N. Lee	
<b>Evaluation of Local and Global Elastic Properties of Textured Polycrystals by Means of FEM</b>	407
V. Luzin, T. Gnäupel-Herold and H. Prask	
<b>Monte Carlo Simulation for Abnormal Grain Growth during Nucleation</b>	413
K. Okuda and A.D. Rollett	
<b>Creating a Model for Percolation of Grain Boundaries in Polycrystalline Materials</b>	419
A.J. Henrie, B.L. Adams and R.J. Larsen	
<b>Nucleation Spectra for Recrystallization Simulated with the Grain Interaction Model for Deformation Textures</b>	425
M. Crumbach, M. Goerdeler and G. Gottstein	
<b>Grain Subdivision and Local Texture Evolution Studied by Means of a Coupled Substructure-Texture Evolution Model</b>	433
M. Seefeldt and P. van Houtte	
<b>FEM-Aided Taylor Simulations of Radial Texture Gradient in Wire Drawing</b>	439
S. Li, S. He, A. Van Bael and P. van Houtte	
<b>Analysis and Modelling of a Variant Selection Mechanism Occurring by Phase Transformation of HSLA Steel Produced by Compact Strip Production</b>	445
M. Humbert, B. Gardiola, C. Esling, G. Flemming and K.E. Hensger	
<b>Recrystallization Textures Modelling of Steels</b>	451
H. Réglé, D. Grandemange, A. Miroux and B. Bacroix	
<b>Torsional Modelisation of the Torsion Texture of Steel Cord</b>	457
Y.D. Liu, A. Tidu, L. Zuo, B. Bolle and J.J. Heizmann	
<b>A New Formulation for the Elastic-Viscoplastic Lower Bound and Intermediate Modeling for Polycrystalline Plasticity</b>	463
S. Ahzi, S. M'Guil and A. Agah-Tehrani	
<b>Monte Carlo Technique for Simulation of Recrystallization Texture in Interstitial Free Steels</b>	469
S.H. Choi	

<b>Taylor-Type Simulation of the Rolling Texture of Pure Aluminum Taking into Account the Initial Texture</b>	475
Z.Y. Chen, X.M. Zhang, Y.X. Du, Z. Yao and C.M. Liu	
<b>Higher Order Twinning and Microstructure Evolution</b>	481
V. Randle	
<b>Spectral Integration of Microstructure and Design</b>	487
B.L. Adams, M. Lyon, B.L. Henrie, S.R. Kalidindi and H. Garmestani	
<b>Determination of <math>\Sigma 3</math> Boundary Planes in Bulk Copper Samples with Different Textures</b>	493
X. Huang	
<b>Characterization of Cold Drawn Gold bonding Wire with EBSD</b>	499
J.H. Cho, J.S. Cho, J.T. Moon, J. Lee, Y.H. Cho, A.D. Rollett and K.H. Oh	
<b>Influence of Substrate Texture on the Galvannealed Coating by EBSD</b>	505
M.H. Hong, S.H. Choi and J. Chung	
<b>Advanced Characterization of Twins Using Automated Electron Backscatter Diffraction</b>	511
S.I. Wright, J. Bingert, T.A. Mason and R.J. Larsen	
<b>Microtextural Inhomogeneity during Thermomechanical Processing of Coarse-Grained Niobium</b>	517
H.R.Z. Sandim, J.F.C. Lins, A.L. Pinto and A.F. Padilha	
<b>Automatic Orientation Measurements in TEM for Studying Fe-Ni Recrystallization Mechanisms</b>	523
R. Penelle, T. Baudin, D.J. Dingley, M. Tiner and S.I. Wright	
<b>Microtexture Measurement of Copper Damascene Line with EBSD</b>	529
D.I. Kim, J.M. Paik, Y.C. Joo, K.H. Oh, H.C. Lee and K. Dicks	
<b>High-Resolution EBSD Analysis of Deformed Material</b>	535
P. Rolland, K.G. Dicks and C.T. Chou	
<b>Deformation and Annealing Behaviour of Two <math>Ni_3Al</math> Based Alloys</b>	541
R.K. Ray	
<b>Strain Rate Effects on Texture Evolution in OFE Copper</b>	547
J.W. House and P.P. Gillis	
<b>Thermo-Mechanical Processing of Forged Tantalum Analyzed by OIM and X-Ray Diffraction</b>	553
J.W. House, J.F. Bingert, R.J. De Angelis and J.M. O'Brien	
<b>Local Strain Heterogeneities after Cold Rolling of an Ultra Low Carbon Steel</b>	559
K. Verbeken and L.A.I. Kestens	
<b>Deformation Texture of Cold Drawn Al6063 Tube</b>	565
J.H. Cho, S.J. Park, S.H. Choi and K.H. Oh	
<b>In Situ Deformation Behavior of Retained Austenite in TRIP Steel</b>	571
K.K. Park, S.T. Oh, S.M. Baeck, D.I. Kim, J.H. Han, H.N. Han, S.H. Park, C.G. Lee, S.J. Kim and K.H. Oh	
<b>Preferred Orientation Formation in Sheets Worked by Continuous Cyclic Bending</b>	577
Y. Takayama, H. Kato, M. Kobayashi and H. Watanabe	
<b>A Method of Determination of Stored Energy in Single and Dual Phase Cold Rolled Materials</b>	583
A.L. Etter, M.H. Mathon, T. Baudin and R. Penelle	
<b>Texture and Deformation Structure Evolution during Rolling of Individual Grains of Columnar Grain Nickel</b>	589
G.L. Wu, A. Godfrey and Q. Liu	
<b>Analysis of Compression Textures of Aluminum and Nickel Rods</b>	595
K.K. Um, H.T. Jeong, S.B. Lee and D.N. Lee	
<b>Local Texture Evolution during Rolling Deformation of Single Crystals of <math>\{100\}&lt;011&gt;</math> Orientation</b>	601
Z.J. Li, Q. Liu and A. Godfrey	
<b>Texture Development in Ni-Co Alloys Rolled to Moderate Reductions</b>	607
J.V. Carstensen, R.K. Ray and T. Leffers	
<b>Texture Formation with Different Rolling Modes in Copper</b>	613
J. Pospiech, M. Wróbel, J.T. Bonarski and M. Blicharski	
<b>Microband Formation in an IF Steel during Cold Rolling at Low Strain Levels</b>	619
Q.Z. Chen and B.J. Duggan	

<b>Effect of Deformation Path on Torsion Texture and Stored Energy of Copper Rods</b> J. Kuśnierz, M. Kurowski, M.H. Mathon, T. Baudin, Z. Jasieński and R. Penelle	625
<b>Rolling and Annealing Textures of Dispersion Strengthened Copper Strips</b> S.H. Kim and D.N. Lee	631
<b>Effects of Shear Strain and Drawing Pass on the Texture Development in Copper Wire</b> H. Park and D.N. Lee	637
<b>Yield Vertices of BCC Crystals for {110}&lt;111&gt;, {112}&lt;111&gt; and {123}&lt;111&gt; Multiple Slip</b> X.M. Zhang, Z.Y. Chen, J.G. Tang, J.M. Chen and Z.P. Zhou	643
<b>Comparison of Torsion Textures to Rolling Textures</b> K.K. Um, H.T. Jeong and D.N. Lee	649
<b>Monte Carlo Simulation of Grain Growth in Zr Processed by ECAP</b> H.S. Ryoo, S.H. Yu, K.H. Oh and S.K. Hwang	655
<b>Evolution of Texture in Zr and Ti Grain-Refined by ECAP</b> S.H. Yu, D.H. Shin, N.J. Park, M.Y. Huh and S.K. Hwang	661
<b>Textural and Microstructural Characterization of Equal Channel Angular Pressed Nickel</b> W. Skrotzki, R. Tamm, R. Klemm, E. Thiele, C. Holste and H. Baum	667
<b>Texture in Equal-Channel Angular Pressed Aluminum and Nickel</b> S.C. Vogel, I.J. Beyerlein, M.A.M. Bourke, C. Tomé, P. Rangaswamy, C. Xu and T.G. Langdon	673
<b>Texture Evolutions of 5052 Aluminum Alloy Sheets Processed by Dissimilar Channel Angular Pressing</b> J.H. Han, K.H. Oh, K.K. Jee, Y.H. Chung and M.C. Shin	679
<b>Texture Analysis of Aluminum Plate Produced by ECAP</b> S.M. Baeck, H.K. Seok, J.C. Lee, D.I. Kim, H.C. Lee and K.H. Oh	685
<b>Heterogeneous Microstructures and Microtextures in Al Processed by ECAE</b> E. Bouzy, J. Fundenberger and T. Grosdidier	691
<b>Calculation of Deformation Behavior and Texture Evolution during Equal Channel Angular Pressing of IF Steel Using Dislocation Based Modeling of Strain Hardening</b> S.C. Baik, Y. Estrin, H.S. Kim, H.T. Jeong and R.J. Hellmig	697
<b>Neutron Diffraction Study of Texture and Stored Energy in ECA Pressed Copper</b> J. Kuśnierz, M.H. Mathon, T. Baudin, Z. Jasieński and R. Penelle	703
<b>Study of the GBCD for the Grain Growth Areas on Pure Cu Samples Extruded by Means of ECAE</b> G. Wang, S.D. Wu, C. Esling, L. Zuo, Z.G. Wang and G.Y. Li	709
<b>Microtexture of Lamellar Structures in Al Heavily Deformed by Accumulative Roll-Bonding (ARB)</b> X. Huang, N. Tsuji, N. Hansen and Y. Minamino	715
<b>Microstructure and Texture Evolution during Annealing of an Aluminium ARB Material</b> W.Q. Cao, Q. Liu, A. Godfrey and N. Hansen	721
<b>Texture Properties of AA8011 Aluminum Alloy Sheet Manufactured by the Accumulative Roll Bonding Process(ARB)</b> H.W. Kim, S.B. Kang, Z.P. Xing, N. Tsuji and Y. Minamino	727
<b>Texture Evolution and Grain Refinement in Al Deformed to Ultra-High Strains by Accumulative Roll Bonding (ARB)</b> C.P. Heason and P.B. Prangnell	733
<b>Formation and Control of the Cube Texture in Fe-Ni Alloys</b> R. Penelle, T. Baudin, A.L. Etter and D. Solas	739
<b>Annealing Texture, Do We Understand It?</b> J.A. Szpunar	749
<b>Twin Nucleation at Triple Junction during Hot Deformation of Copper Polycrystal</b> H. Miura, H. Hamaji and T. Sakai	755
<b>Dynamic Recrystallization at Triple Junction during High-Temperature Deformation in Copper Tricrystal</b> S. Andiarwanto, H. Miura and T. Sakai	761
<b>Orientation Aspects of the Nucleation of Recrystallization in FCC Metals and Alloys with Low Stacking Fault Energies</b> K. Szwietrzka	767
<b>Orientation Dependence of Recrystallization in Aluminum</b> H. Lücken and D. Raabe	773

<b>Non-Oriented Silicon Steel Recrystallization Texture Study</b>	779
M.A. Da Cunha and S. Da Costa Paolinelli	
<b>Deformation Microtexture and Recrystallized Orientations in Non-Oriented Electrical Steel Observed by High-Resolution EBSD</b>	785
M. Kohno, M. Muraki, M. Kawano and M. Komatsubara	
<b>Development of Cube Texture during Industrial Processing of High Purity Aluminum Foil Obtained with 99% Volume Fraction of Cube Component</b>	791
K. Kajihara, K. Tokuda, Y. Sugizaki and Y. Seki	
<b>An EBSD Study of Static Recrystallization of Cold-Rolled Zircaloy-4 Sheets</b>	797
D. Chaubet, B. Bacroix and J.L. Béchade	
<b>Texture Analysis of Copper Bonding Wire</b>	803
S.M. Baeck, K.K. Park, H. Ha, Y.J. Oh, Y.J. Park, J.T. Moon, J. Lee and K.H. Oh	
<b>Early Stages of the Recrystallization Texture Formation in {112}⟨111⟩ - Oriented Silver Single Crystals</b>	809
H. Paul, Z. Jasieński, C. Maurice and A. Piątkowski	
<b>Study of Annealing Texture Components in High Purity Aluminums</b>	815
M.Y. Huh, J.K. Kim, H. Jang, K. Ito and W.Y. Jeung	
<b>Influence of the Primary Recrystallization Texture on Abnormal Grain Growth of Goss Grains in Grain Oriented Electrical Steels</b>	821
J.Y. Park and J.A. Szpunar	
<b>Microstructure and Texture Analysis in Twin-Roll Strip Cast Fe-36wt%Ni Alloy</b>	827
J.Y. Park, J.T. Choi, T. Kang, K.H. Oh and J.A. Szpunar	
<b>Investigation of Recrystallization Texture Evolution during Annealing of Hot Deformed AA3104 Alloy</b>	833
J. Savoie, H.L. Yiu, E.M. Lauridsen, L. Margulies, S.F. Nielsen, S. Schmidt, M. Ashton and R. Sebald	
<b>Statistical Analysis on the Development of Recrystallization Texture in IF Steel</b>	839
D.I. Kim, K.H. Oh and H.C. Lee	
<b>Formation of Recrystallization Textures after Hot Working of AA2014 and AA6063</b>	845
W.H. Van Geertruyden, W.Z. Misiolek, M.C. Gonçalves, G. Szilagyi and M.M. Nowell	
<b>Influence of the Rolling Reduction on Static Recrystallization in Copper</b>	851
P. Gerber, J. Tarasiuk and B. Bacroix	
<b>Nucleation in Rolled BCC Metals</b>	857
N.H. Heo, S.B. Kim, K.H. Chai, Y.S. Choi and S.S. Cho	
<b>Nucleation, Surface-Energy-Induced Selective Grain Growth and Final Texture in 3% Silicon Steel</b>	863
N.H. Heo, S.B. Kim, S.S. Cho, Y.S. Choi, K.H. Chai, J.M. Oh and H.C. Lee	
<b>Formation Mechanism of Recrystallization Nuclei in Polycrystalline <math>\alpha</math>-Fe</b>	869
T. Imamura, Y. Hayakawa and M. Kurosawa	
<b>Monitoring of Primary Recrystallization in Aluminum Alloy by Resonance EMAT Spectroscopy</b>	875
C.-. Man, X. Fan, J.G. Morris and K. Kawashima	
<b>Simulated Nucleation Textures of Recrystallization during Multiple Pass Hot Rolling of Aluminium Alloys</b>	881
M. Goerdeler, M. Crumbach and G. Gottstein	
<b>Orientation Distribution in Dynamically Recrystallized Nickel</b>	889
H. Fukutomi, M. Hasegawa and K. Okayasu	
<b>Recrystallization Texture of a Copper Electrodeposit with the &lt;111&gt; and &lt;110&gt; Duplex Orientation</b>	895
S.Y. Kang and D.N. Lee	
<b>Recrystallization Textures in some Hexagonal Alloys</b>	901
N. Bozzolo, F. Wagner, N. Dewobroto and T. Grosdidier	
<b>Recrystallization Textures in Coarse Grained Low Carbon and Interstitial Free Steels</b>	907
M.D. Nave and M.R. Barnett	
<b>Deformation and Annealing Textures of Drawn Aluminum Bronze Wires</b>	913
S.Y. Kim, C.H. Choi and D.N. Lee	
<b>Texture Evolution during the Annealing of Nanocrystalline Permalloy</b>	919
Y.B. Park, J. Park, C.S. Ha and T.H. Yim	

<b>Texture Evolution and Wear Properties of Nanocrystalline Ni-P Electrodeposits</b>	925
D.H. Jeong, U. Erb, K.T. Aust and G. Palumbo	
<b>Orientation Dependence of Grain Growth in a Nanocrystalline Ni Foil</b>	931
Y.B. Park, S.H. Hong, C.S. Ha, H.Y. Lee and T.H. Yim	
<b>Texture Evolution in Grain Growth of Nanocrystalline Ni</b>	937
B.K. Kim, J.A. Szpunar and R. Varano	
<b>Annealing Texture in Thermal Stability of Ultrafine-Grained Ni</b>	943
B.K. Kim, J.A. Szpunar and A.P. Zhilyaev	
<b>Abnormal Grain Growth in Silicon Steel</b>	949
N. Chen, S. Zaeferer, L. Lahn, K. Günther and D. Raabe	
<b>Texture Development in Zn-1.1%Al Alloy under Strong Magnetic Field</b>	955
A.D. Sheikh-Ali, D.A. Molodov and H. Garmestani	
<b>Consideration of Neighbour Effect by Introducing a Limiting Radius for the Neighbourhood in Fe-3%Si Grain Growth</b>	961
N. Maazi, N. Rouag and R. Penelle	
<b>Sulfur Segregation and Surface-Energy-Induced Selective Growth in Ultra-Thin 3% Silicon-Iron Alloys</b>	967
Y.S. Choi, S.B. Kim, S.S. Cho, K.H. Chai, J.M. Oh and N.H. Heo	
<b>Effect of Grain Boundary Character on Selective Growth of Goss Grain in Fe-3%Si Alloy</b>	973
Y. Ushigami, S. Nakamura, S. Takebayashi and S. Suzuki	
<b>Mechanism of Discontinuous Subgrain Growth in As-Deformed Aluminium Single Crystals</b>	979
M. Ferry	
<b>Effect of Deformation-Induced Intragranular Microstructure on Plastic Anisotropy and Deformation Textures</b>	985
P. van Houtte and B. Peeters	
<b>The Role of Texture in Stress-Corrosion Cracking of Metals and Alloys</b>	991
B.D. Lichter, W.F. Flanagan and D.N. Lee	
<b>Texture Effects on Zircaloy Oxidation : Experiment and Simulation</b>	999
J. Favereon, C. Valot, T. Montesin and G. Bertrand	
<b>Microtextural Analyses of the Ni/NiO System after High Temperature Oxidation</b>	1007
F. Desserrey, C. Valot, T. Montesin and J.P. Larpin	
<b>The Influence of the Texture and Microstructure of a Zr-2.5Nb Substrate upon the Oxidation Kinetics</b>	1013
J. Lin, X.H. Cao and J.A. Szpunar	
<b>The Influence of Substrate Texture on the Oxidation Kinetics of Copper</b>	1019
K.T. Lee, H.T. Jeong, J.A. Szpunar and H.G. Kim	
<b>The Role of Textures in the Corrosion Resistance of Electrogalvanized Zn Coatings</b>	1025
S.H. Hong, J.B. Kim and S.K. Lee	
<b>Texture and Corrosion Mechanisms in Aluminized Steel Sheet</b>	1031
S.H. Hong, B.M. Lim, W.S. Chung and J.H. Choi	
<b>Effects of Cathodic Polarization on the Pitting Behavior of Aluminum Single Crystals in Hydrochloric Acid Solution</b>	1037
J.H. Seo, J.H. Ryu and D.N. Lee	
<b>Effect of Texture on the Corrosion Behaviour of High Purity Aluminum</b>	1043
S.H. Kim, U. Erb, K.T. Aust and G. Palumbo	
<b>Magnetic Properties of Fe-3%Si Sheets Having Ideal Orientations</b>	1049
N.J. Park, G.S. Kim and M.Y. Huh	
<b>Anisotropic Magnetization Curve Simulation of an Easy-Plane Ferrimagnetic <math>\text{ErMn}_4\text{Fe}_8\text{C}</math> Carbide from Orientation Distribution Data</b>	1055
M. Morales, D. Chateigner and D. Fruchart	
<b>Magnetic Alignment and Crystallographic Texture Relationships in Permanent NdFeB Magnets</b>	1061
S.J. Lillywhite, A.J. Williams and I.R. Harris	
<b>Texture Development and Texture Influence on the Mechanical Properties of the Mg-Alloy AZ31</b>	1067
S.B. Yi, H.G. Brokmeier and R.E. Bolmaro	
<b>Effect of C on the R-Value Anisotropy of Ti-Added IF Steels</b>	1073
S.H. Choi and J. Chung	

<b>Through-Thickness Texture Inhomogeneity and its Effect on Formability in IF Steel Sheets</b>	1079
Y.B. Park, J. Park and K.G. Chin	
<b>Macroscopic Texture and Anisotropy in Ti-Added IF Steels</b>	1085
S.H. Choi	
<b>The Evolution of the Elastic Properties of FCC Polycrystals Due to Texture Evolution</b>	1091
A. Bertram and T. Böhlke	
<b>The Influence of Tandem Rolling Process Parameters on the Texture and Earing Behaviour of AA1050</b>	
C. Liu, L. Zhuang, M. van der Winden and T.J. Hurd	1097
<b>Calculation of Plastic Strain Ratio of Deep-Drawing Steel Sheets from Texture</b>	
Q.W. Jiang, Y.D. Zhang, X. Zhao, Z.D. Liang, F.H. Wang and L. Zuo	1103
<b>Evaluation of the Plastic Strain Distribution of Pearlitic Wires during Torsion</b>	
Y.D. Liu, X. Zhao, A. Tidu, B. Bolle, L. Zuo and J.J. Heizmann	1109
<b>Plastic Strain Ratios of Fe and Ni Electrodeposits</b>	
H.J. Shin and D.N. Lee	1115
<b>The Effect of Texture on the Pseudoelasticity of CuZnAl Shape Memory Alloy Sheet</b>	
N.J. Park and S.B. Yi	1121
<b>Texture and Shape Memory Effect of TiNi Alloy Produced from Ti/Ni Laminated Sheets</b>	
H. Inoue, M. Ishio and T. Takasugi	1127
<b>An Example of Texture Influence in Stress Analysis</b>	
T.A. Lychagina and H.G. Brokmeier	1133
<b>Effects of Textures on Hydrogen Diffusion in Nickel</b>
