Welcome Message

Chapter 1: Structural Metals

An Empirical Investigation into the Chromium-Containing Percentage of Carbon Steel on Oil and Water Wettability Behaviour M. Fadhil and P. Baumli	3
Wettability Testing of Stranded Aluminium Conductors S. Gyöngyösi, M. Mészáros and C.E. Czégéni	13
Machine Learning-Based Investigation of the Compressive Behavior of Ti6Al4V Lattice Structures M.B. Hasan, N. Trisovic and T. Mankovits	19

Chapter 2: Polymers and Composites

Characterization of Polymer Composites Reinforced with Metal Particles M. Mátyus, D. Mentés, B. Fiser and T.J. Szabó	31
Crystallinity Transformation in Pulverized Polyphthalamide for Sustainable Polymer Engineering Y. Yekymov and V. Lebedev	45
Application of Timoshenko Beam Theory in Finite Element Simulation of Fiber-Reinforced Composite Material L.J. Mónus and E.R. Fábián	55
A Comparative Study on the <i>In Vitro</i> Degradation of PLA Processed by FFF and Film Extrusion K.K. Abdullah and K. Molnár	65

Chapter 2: Functional Materials

CT-Based Reconstruction of Closed-Cell Aluminum Foams V.A. Chang'a and T. Mankovits	75
Enrichment of Rare Earth Elements and Noble Metals in Thermal Treatment Residues of Different Base Materials – A Review A.A. Gobosho and H. Kovács	85

Chapter 4: Additive Manufacturing

Innovative 3D-Printed Tantalum Patches for Non-Destructive Repair of Enamelled Reactors Z.G. Kaszás, G. Varga and T. Poós	99
Evaluation of Statistical Learning Methods for FFF 3D Printing Problems A. Debreceni and S. Bodzás	109
Reverse Engineering and Digital Manufacturing Using 3D Scanning and Printing T. Tornai, I. Fürstner and L. Gogolák	117
Statistical Modeling of Geometric Accuracy of FDM Printing for Machine Design Applications R. Garay and D. Nemes	129

Chapter 5: Engineering Analysis of Machining and Forming Processes

Influence of Fiber and CO Laser Cutting Parameters on the Material Properties of Wear-Resistant Hardox 450 Steel I. Čáčková, V. Čáčko and B. Ferenczi	143
Cylindricity Error by Least Square and Minimum Zone Fitting V.G. Rácz and B. Mikó	155
Theoretical Foundations of Mechanical Design for Improving Machine Productivity during the Cutting Process M. Alsigar, M. Alhafadhi, A. Lafta, O. Mayoof and H. Al-Murshidi	167
Tool Life Estimation and Optimization Using a Stacking Regressor and Whale Optimization Algorithm (WOA) in Micromilling O.I. Elly and M. Takács	175
Research on the Wear of Cutting Inserts during the Processing of Waste Construction Glass V. Čáčko, I. Čáčková, L. Šooš and B. Ferenczi	187
Failure Analysis of Thin-Walled Extruded Aluminum Tubes Using MSFLD-Based Criteria A. Baksa, M. Habbachi and E.B. Varga	199
Evaluation of Friction Coefficient During Single Point Incremental Forming of Commercial Purity Aluminium Alloy M. Habbachi and A. Baksa	211
Manufacturing Working Analysis of a Mechanical Wire Bending Machine I.M. Mokaya and S. Bodzás	221

Chapter 6: Applied Mechanics

Effect of Magnetic Field on Aeroelastic Stability of High Aspect Ratio Plate M.A. Mikilyan	235
Note on the Calculation of Hierarchical Rotational Shell Finite Elements I. Páczelt and A. Baksa	249
Connection of Mechanics and Fractional Derivatives P.B. Béda and G. Béda	261
Articulated Vehicle Systems with Inerter T. Görögh and P. Béda	271
Characterization of Pressure Drop in Pipe Flow of Shear Thickening Fluids J. Polyák, B. Boglárka and P. Nagy-György	283

Chapter 7: Thermal Engineering

Theoretical and Analytical Methods for Determining Heat Transfer Coefficients in Evaporation Processes T. Poós and H. Abu-Zienah	293
Selecting Thermal Pipe Insulation via Discrete Optimization M. Szokody and T. Poós	303
Experimental Investigation and Effective Numerical Modeling of Heat Transfer in Phase Change Materials D. Illés, R. Kovács and M. Szücs	315

Chapter 8: Tribotechnics

Prediction of the Frictional Behavior of Sealing Assembly for Mass Production by Surface Roughness Analysis V. Sári-Barnácz, B. Fazekas and T.J. Goda	329
Experimental Study of Severe Abrasion "GOUGING" Using Structural Steel and Tool Grade Steel M. Vite-Torres, I.A. Salazar-Velázquez, O. Figueroa-García, E.A. Gallardo-Hernández, J.R. Laguna-Camacho and J.A. Frías-Flores	339
Tribology Application of Unpreloaded Mechanical Seal in Presence of MGS-1 Regolith M.P. Kiss, G.Z. Kalacska and R. Keresztes	351

Abrasion between Rotary Shaft/Seal Pairs under Extremes of Lunar Highland Regolith Exposure	
B. Turapov, G. Kalacska and R. Keresztes	359
Numerical Analysis of an Electro-Viscoelastic Frictional Contact Problem with Damage	
M. Chegaar	371

Chapter 9: Machine and Equipment Design

Optimizing Spur Gears for Robotic Transmissions: Surface Finish Analysis	
S.K.A. Abdelfattah, S. Bodzás and G. Szanyi	387
The Actual Influence of Gear Ratio Size on the Service Life of Rolling Bearings in Universal Helical Gear Reducers with External Gearing	
M. Rackov and S. Kuzmanovic	395
Comparison of AC Powered Hedge Cutters Based on the Properties of the Eccentric Mechanism	
B. Siktár, J. Kakuk and G. Hegedűs	401
Geometric Design and FEM Analysis of Connecting Spur Gear Pair for Mechanical Wire Bending Machine	
I. Ennamouss and S. Bodzás	409
Finite Element Investigation of Axisymmetric Rubber Bumper	
K. Lima Gascoigne and T. Mankovits	421
Application of Topological Optimization Methods on an Automatic Tool Changer Mechanism	
K. Szabó	433
Development of a Bike Component by Topological Optimization Methods	
K. Szabó	443
Static Analysis of the Hydraulically Actuated Reversing Mechanism of a Reversible Agricultural Plough	
D. Late, P. Tripon, E. Marin, D. Manea and L.C. Vlăduoiu	453

Chapter 10: Mechatronics

Development of a Time-Synchronised Micro-PMU System for Low-Voltage Grid Fault Prediction	
J. Bencsik and Z. Conka	463
Design and Development of a Modular Automated Pallet Changing System for CNC Machining Centres	
B. Ferenczi, I. Čáčková and V. Čáčko	471
Measurement of Vehicle Parameters for Vehicle Dynamics Model Validation	
I.L. Csajbók and D. Nemes	477
SWOT Analysis of Vehicle-to-Grid Integration: Opportunities and Challenges in Hungary and the European Union	
J. Menyhárt	487
Possibilities for Representing the Shape and Size of Polytopes when Applying the Tp Transition	
D. Nemes and S. Hajdu	493

Chapter 11: Condition Monitoring

A Dual-Scheme Cointegration Framework for Condition Monitoring and Fault Detection Using Non-Joint and Mixed-Order Time Series	
N.H.R. Syed, D.A. Teklemariyem, W.J. Staszewski and P.B. Dao	503
Vibration-Based Condition Monitoring of Induction Motors in Industrial Applications of Uzbekistan	
D. Akbarov, I. Bendiák and S. Semperger	513
Multi-Class Anomaly Detection in an Industrial Robot Arm	
D. Bodnar and K. Jármai	521

Transforming CMM Inspection Reports into NVH-Relevant Feature Sets K. Horvath and A. Zelei	527
Non-Destructive Watermelon Ripeness Assessment Using Deep Learning and Field-Based RGB Imagin I. Domokos and P. Szilágyi	537

Chapter 12: Hydrogen Transition

Comparative Study of Microstructural Characteristics of P355NH Transporting Pipelines Exposed to Hydrogen N. Bencs-Nagy and J. Lukács	551
Digital Twin Technology for Safety Enhancement of Hydrogen Refuelling Stations G. Hasulyo and M. Vadászi	563
Hydrogen Embrittlement in Austenitic Stainless Steels: A Review of Testing Methods and Standardization Challenges J. Fajger and R.P.S. Sisodia	573

Chapter 13: Engineering Management

The Municipal Environmental Protection Programme of the Municipality of Dunaújváros I. Angerer-Petrovickijne	589
Assessing Hydrodynamic and Operational Efficiency of a Solar-Driven Pumped Hydropower System under Changing Weather Conditions: A Case Study in Lake Velence Catchment, Hungary A. Kálmán and K. Bene	599
Developing an EnergyPlus-Based Simulation Model for Energy and Comfort Analysis of an Office Building in Debrecen E. Sarvajcz-Bánóczy and I. Kocsis	613
Modeling the Breakage of Agricultural Particulate Materials: Review J. Huang	619
Impact of Machined Surface Quality Level on Electrical Energy Consumption in WEDM L. Straka and A. Zalyvchyi	633
History and Manufacturing Analysis of Single – Purpose Gear Manufacturing Working Machines S. Bodzás and G. Szanyi	645
Comparative Analysis of Manufacturing Technologies for Cycloidal Drive Production: FDM 3D Printing vs CNC Laser-Cut Aluminum A. Sarajlić, M. Čabaravdić, T. Mankovits and S. Mano	653

Chapter 14: Industrial Engineering

Quantitative Evaluation of Process Discovery Enhancement Using Clustering-Based Techniques E.B. Varga and A. Baksa	669
Applying AI to Predict High-Cost Rental Prices: A Comparative Modelling Approach M.A. Parvez and S. Dadvandipour	685
AI Powered KPI Optimization: Bridging the Gap between Industry Data and Operational Excellence P. Madarasi and J. Menyhárt	693
Process Simulation Using Parametrized Models G. Ruzicska, L. Czégé and T. Mankovits	699
