

Table of Contents

Preface

Chapter 1: Advanced Structural Materials

Fatigue Crack-Growth of Aluminum Integral Stiffened Panel under Constant Amplitude Loading J.D. Mattos and M. Arbelo	3
Simulation Studies to Compare Innovative Cellulose-Based Fibers Composites Printed Circuit Border with Glass Fibres J.C. Velosa, A.P. Silva, G.R. Mitchell and J.M.R. Curto	11
Improvement of the Mechanical Properties of GFRP Laminates Used in the Construction of Ship Hulls by Implementing Auxetic Sheet Cores P. Townsend, J.P.R. Rodríguez, C.A.A. León and M. Carboneras	23
An Interlaminar Model for Delamination Behavior of Composite Curved Beams Considering Inter-Ply Voids Y.Y. Ye, J.X. Gao, Q.S. Chen, S.M. Qian, F. Zhang and S.G. Zhang	35
Encapsulation in Expanded Clay as an Alternative Protection for Bacteria in Bioconcrete-Influence on Compressive and Tensile Strength J.A.R. Chieila, D.C. Vilcapoma and E.A.A. Carlos	47
Manufacturing and Evaluation of the Mechanical Response of Geopolymeric Mortars with Raw Materials from Khapia Hill in Puno (Peru) J.C. Grande-Ccalla, F.A. Huamán-Mamani and C.K. Palomino-Ñaupá	53

Chapter 2: Functional Nanomaterials

Evaluation of Hybrid Nanofluid for Application in Enhanced Oil Recovery W.K. Kewu, A.H. El Shazly, A. Zkria, H. Naragino and U. Nour Eldemerdash	61
Synthesis and Photoluminescence Properties of Carbon Dots from Moringa Oleifera Leaves F.S.A. El-Kawy, S. Hammad, H. Talaat and M. Ghali	67

Chapter 3: Photocatalysis and Electrocatalysis for Energy Conversion

Photocatalytic Fuel Cell with Anodic In₂O₃/ ZnO/FTO and Cathodic CuO/Cu for Efficient Aquaculture Wastewater Treatment and Electricity Production S.M. Lam, K.C. Low, J.C. Sin and H.H. Zeng	75
Improvement of Dye-Sensitized Solar Cells Using Hollow ZnO Nanorices Y. Tanaka, T. Nakamoto and K. Taguchi	81
Improved Performance of NiCoFe-LDH Electrocatalyst by Synthesizing on NiCo₂O₄ with Ni Foam for Effective Oxygen Evolution Reaction T.D. Duy, T. Nakamoto and K. Taguchi	87
Synergistic Improvement of Photoactivity in Rare Earth-Doped Hierarchical ZnO Microspheres for Palm Oil Mill Effluent Treatment and Synchronously Biogas Generation J.C. Sin, S.M. Lam, J.H. Tan and H.H. Zeng	95
Characterizing Hydrogen Evolution Reaction of NiCoFe-LDH@NiCo₂O₄ Heterostructured Electrocatalyst for Hydrogen Generation T. Nakamoto, T.D. Duy and K. Taguchi	101
Design of a High Energy Density and High Power Density Asymmetric Hybrid Supercapacitor Using Ternary Nickel Cobalt Sulfide and a Mixture of Cu-Based Metal-Organic Framework and Reduced Graphene Oxide Y.C. Sun and C.X. Wang	107

Chapter 4: Antibacterial and Antioxidant Materials

Development and Characterization of a Curcumin-Loaded Alginate-Xanthan Gum Hydrogel for Antibacterial Activity and Controlled Drug Release	
L. Torres, S. Cespedes, S. Kim, J. Nakamatsu, M. Obregón Príncipe and D. Castillo	117
Beta-Cyclodextrin Inclusion Complexes of Rose Oil and Rose Extract: Preparation and Physical Properties	
T. Chimsook	125

Chapter 5: Machine Learning Approaches in Materials Research

Machine Learning Approach to Develop Novel Metallic Glasses and Predict Glass-Forming Ability	
F. Abu-Salah and E. Maalouf	137
Enhancing Hansen Solubility Predictions: A Combined Approach Using Integrated Datasets and Optimized Machine Learning Techniques	
K. Pantelidou, S. Devrelis, A. Lalas, K. Votis and D. Tzovaras	145
