

# Table of Contents

## Preface

## Chapter 1: Green Building Materials

<b>Use of Alternative Raw Materials for the Production of Fiber Cement Products</b> M. Hoško, L. Bodnárová and O. Pikna	3
<b>Research of a New Chemically Resistant Repair Mortar Modified with Secondary Raw Materials</b> P. Figala, R. Drochytka and L. Mészárossová	9
<b>The Influence of Organic Fibers on the Fire Resistance of Concrete</b> J. Klobása and R. Hela	15
<b>Reduction of Firing Temperature by Utilization of Secondary Materials for the Synthesis of Forsterite Ceramics</b> M. Nguyen and R. Sokolař	21
<b>Effect of Secondary Fillers in Polymeric Material for CIPP on Fresh Processability</b> K.H. Jakubíková and R. Drochytka	27
<b>Possibilities of Determining K-Value and Activity Index for Ground Granulated Blast Furnace Slag</b> P. Šperling and R. Hela	33

## Chapter 2: Silicate Materials

<b>Resistivity Changes of Electrically Conductive Silicate Composites Loaded in Different Directions</b> S. Baranek, V. Uher and V. Cerny	41
<b>The Effect of the Type of Gelling Agent on the Speed of Gelation of Sol-Gels</b> J. Majerová, D. Sklenářová and L. Nevřivová	47
<b>Verification of the Electrical Impedance Method for Measuring the Humidity of Silicate Material</b> E. Hrabalkova, D. Powetz, D. Prusa and S. Stastnik	53
<b>The Effect of the Gelling Agent on the Gelation Rate and the Formed Sol-Gel Structure</b> D. Sklenářová, J. Majerová, A. Kohutová and L. Nevřivová	61
<b>Influence of Sintering Time with Constant Temperature on the Development of the Tricalcium Silicate Crystallinity</b> A. Jančíkú and K. Dvořák	67

## Chapter 3: Cement and Cement-Based Composites

<b>Cohesive Zone Modelling and the Fracture Process of Cement-Based Composites</b> V. Kozák and J. Vala	77
<b>The Effect of Different Grinding Technologies on the Mechanical Properties of Portland Cement Depends on the Type of Intensifier</b> S. Ravaszova and K. Dvořák	83

## Chapter 4: Limestone and Lime-Based Composites

<b>Using of Limestone Cement in Fibre-Cement Corrugated Sheets Production</b> M. Hoško and L. Bodnárová	91
<b>The Effect of the Origin and Inner Structure of Limestones on the Burning Process and the Formation of Lime</b> D. Sklenářová and K. Dvořák	97

## **Chapter 5: Contemporary Composite Materials**

### **Influence of Porous Manganese-Containing Fillers on the Electrodynamical Characteristics of Absorbing Polymer Composite Materials**

S.G. Guzii, O. Prysiazna, S.D. Lapovska, O. Khodakovskyy and V. Pokaliuk

105

### **Lightweight Refractory Materials in Al-Si Binary System Produced by Sol-Gel Method**

D. Zemánek and L. Nevřivová

115
