

# Table of Contents

## Preface, Committees, Sponsors

## Chapter 1: Materials Engineering and Application, Technologies of Materials Processing

<b>Modelling and Analysis of Piezolaminated Functionally Graded Polymer Composite Structures Reinforced with Graphene Nanoplatelets under Strong Electroelastic Fields</b> N.R. Mekala, R. Schmidt and K.U. Schröder	3
<b>Hybrid Adhesives Filled with Functionalized and Non Functionalized Silica Nanoparticles</b> J.d.J. Figueroa-Lara, M. Torres-Rodríguez and M. Gutiérrez-Arzaluz	9
<b>Chemical Etching of TiO<sub>2</sub> Nanorods Greatly Improves Current Generation of <i>S. loihica</i> PV-4 on a Carbon Paper Electrode</b> L. Dong, T. Yin, L. Su and D.G. Fu	14
<b>New Developments in Scanning Microelectrochemical Techniques: A Highly Sensitive Route to Evaluate Degradation Reactions and Protection Methods with Chemical Selectivity</b> R.M. Souto, D. Filotás, B.M. Fernández-Pérez, L. Nagy and G. Nagy	19
<b>Finite Element Simulation of Deep Drawing Processes for Shell Bar RR Impact RH/LH</b> A. Sunanta and S. Suranuntchai	24
<b>Finite Element Simulation of Hot Forging Process for KVBM Gear</b> S. Wangchaichune and S. Suranuntchai	30
<b>Influence of Water Vapor on Oxide Scale Morphology of Incoloy800HT at 850°C</b> A. Srisrual, K. Pitaksakorn and P. Promdirek	36
<b>Study on Mechanical Alloying of TiB<sub>2</sub> Particulate Reinforced Titanium Matrix Composites</b> Y.Y. Li, F.W. Zhu and Z.L. Qiao	41
<b>Hydrogen Influence on Microstructure, Corrosion Resistance and Mechanical Properties of Low Alloy Steel and Explosively Cladded Steel Used for Hydrogen Storage Salt Caverns</b> M. Gloc, M. Szwed, A. Zagórski and J. Mizera	47
<b>Comparative Tribological and Mechanical Property Analysis of Nano-Silica and Nano-Rubber Reinforced Epoxy Composites</b> A. Kurdi and L. Chang	53
<b>Growth and Characteristics of High Quality (200) and (111) Orientations Cubic Structure MgZnO Thin Films by Pulse Laser Deposition (PLD) Method</b> S. Han, S. Peng, P.J. Cao, W.J. Liu, Y.X. Zeng, F. Jia, D.L. Zhu and Y.M. Lu	61

## Chapter 2: Practice of Research and Designing in Mechanical Engineering

<b>Designing of Outriggers for the Needs of the Vehicles Stability Testing</b> V. Kryaskov, A. Vashurin, A. Tumasov and A. Vasiliev	71
<b>Design Study of Trapezoid-Shaped Magnetic Flux Concentrator for Axial Amplification Characteristics</b> Y. Bi, X.M. Zhang and W.J. Wang	77
<b>Modeling and Calibration of the Orthogonality Deviation between the "X" and "Y" Axes of Coordinate Measuring Machines</b> C.A.G. de Moraes, M. da Silva Bertolini and B. di Giacomo	84
<b>Numerical Study of NACA 0012 Aeroacoustics Response for Normal and Icing Conditions</b> E.H. Caicedo and M.S. Virk	89
<b>Wind Resource Assessment in Cold Regions - A Numerical Case Study</b> J.Y. Jin, P. Sokolov and M.S. Virk	94
<b>A Finite Element Analysis on Metal Ball Effect on Dynamics of a Ball Bearing</b> B.W. Huang, J.S. Chen, Z.Y. Huang and N.W. Lin	100

<b>Optimal Design Parameters of Cab's Isolation System for Vibratory Roller Using a Multi-Objective Genetic Algorithm</b> V.Q. Le and K.T. Nguyen	105
<b>Analysis of the Characteristics on Dielectric Barrier Discharges Depending on the Relative Permittivity and Frequency</b> D.K. Lee	113
<b>Analysis of Factors Influencing the Characteristics of the Tire and its Model Used in MSC.ADAMS/Car</b> D. Butin, A. Vasiliev, A. Tumasov and S. Bagichev	117
<b>Optimization of Design Parameters for Materials Consumption for Reinforcing Metal Framework of Industrial Buildings</b> T. Zolina and P. Sadchikov	122
<b>Aerosol Systems of Supply Ventilation, as Means of Air Quality Improvement of Working Zones</b> A.V. Azarov, N.S. Zhukova, I.V. Stefanenko and M.A. Nikolenko	128
<b>On the Calculation Model of Fine Dispersed Dust Pollution of Kabul's Atmosphere for Ventilation Design</b> I.V. Stefanenko, T.V. Solovyeva, V.N. Azarov and M.H. Nasimi	132
<b>Air Flow Straighteners' Application to Reduce the Power Consumption of Exhaust Ventilation Schemes</b> V.N. Azarov, N.M. Sergina and I.V. Stefanenko	137
<b>Fundamentals of Methodology of Development of the Technical Theory of Natural and Technical Systems in Use of Water Resources</b> I.V. Stefanenko, E.A. Semenova, O.V. Klimenko and V.A. Bondarenko	141
<b>Applying Absorption in Environmental Mechanics' Decreasing of Aspiration Emissions of Gas Station</b> S.A. Koshkarev, V.N. Azarov, I.V. Stefanenko and E.V. Sokolova	145
<b>Research on Lateral Nonlinear Vibration Behavior of Composite Shaft-Disk Rotor System</b> C.J. Zhang, Y.S. Ren and S.J. Ji	149

### **Chapter 3: Materials and Technologies in Construction**

<b>Influence of Pore Structure on Chloride Distribution in Surface Layer of Cement Paste under Cyclic Wet-Dry Condition</b> H.L. Chang, S. Mu, Y.Y. Du and L. Yang	165
<b>Mechanical Properties of Fiber Reinforced Concrete</b> B. Chaichannawatik, A. Sirisonthi, Q. Hussain and P. Joyklad	174
<b>Modelling of Dust Dispersion of Emissions from Expanded Clay Manufacturing in the Atmosphere</b> N.V. Menzelintseva, N.Y. Karapuzova, O.S. Vlasova and A. Redhwan	179
<b>Research of Air Flows Dynamics at Construction Works in the Condition of Urban Built-Up Areas</b> I.V. Stefanenko, V.N. Azarov, K.A. Trokhimchuk and M.V. Trokhimchuk	183
<b>On the Regularities of the Concentration Profile of Asbestos-Cement Dust, its Particle Size Distribution Depending on the Height of Working Room and the Methods of Air Exchange Organization</b> V.N. Azarov, I.V. Stefanenko and R. Burkhanova	187
