

# Table of Contents

## Preface

## Chapter 1: Biomedical Devices and Systems

<b>Simulation-Based Parametric Optimization of Optical Ring Resonators for Potential Biomedical Biosensing Applications</b> J.M. Núñez Leyva, E.S. Kolosovas-Machuca and D.E. Rodríguez-Obregón	3
<b>Design of a Modular Simulator Prototype for Psychomotor Training in Laparoscopic Surgery with Automated Evaluation</b> D.M. Torres Carvajal	13
<b>Design of an Artificial Vision System for Exercise Monitoring in Healthy Aging</b> K.M. Reyes Leiva, G. Zapata, M. Heydari, E. Villalba and R. Imbert	23

## Chapter 2: Rehabilitation and Prosthetics

<b>A Decade-Long Systematic Review of EEG-Driven Gait-Intention Interfaces for Lower-Limb Rehabilitation and Prosthetics</b> D.E. Rodríguez-Obregón, H.A. Moreno, I.G. Carrera and L. Lopez-Lopez	35
<b>Development of Personalized External Breast Prosthesis Prototype Using 3D Modeling in Unilateral Post-Mastectomy Patient</b> M.A. Domínguez Laínez, S.A. Midence Pinto, F.E. Núñez Rodríguez and G.M. Fortin Gonzáles	47
<b>Modular Prototype of a Canine Prosthesis through the Simulation of a Transradial Amputation Case</b> A. Rodriguez Palma, J. Diaz Sanabria and F. Caceres Lagos	57

## Chapter 3: Advanced Materials

<b>Advances and Trends in the Development of Organic-Based Composite Materials with Polymeric Matrices</b> Y.P. Ortega, J. Flórez Páez and D. Lozano Rivera	73
<b>Proposal for Alternative Recycled Plastic Formwork System for Tie Columns and Tie Beams</b> B. Pineda, M. Canales and A.S. Rodriguez	87

## Chapter 4: Mechatronics, Machine Design and Renewable Energy

<b>Ale-HAND-Ra: Design and Development of a Low-Cost, Open-Source Humanoid Robotic Hand</b> H. Velásquez, M. Lagos, F. Núñez and L.F. Casas	99
<b>Decoding the Soccer Pass, a Kinematic Analysis Using Kinovea and Inertial Sensors</b> C. Diaz, H. Diaz and K. Reyes	115
<b>Wheelchair and Wheel Design with a Transformable and Adaptable Wheel-Leg Configuration for Climbing Stairs</b> I.A. Magomedov, M.M. Matygov and Z.L. Beslaneeva	125
<b>Optimization of PV Self-Consumption Systems without Storage Based on Net Present Cost Using LabVIEW</b> J.F. Deras Pérez, A.M. Reyes-Duke and H.F. Villatoro	137

## Chapter 5: Internet of Things and Information Technology

<b>METEORO: Low-Cost IoT Weather Station</b> D.A. Aguilar, M.G.S. Flores, J.D.M. Marroquín and O.E.D. Gómez	147
