

# Table of Contents

## Preface

## Chapter 1: Bridges

<b>Static Analysis of Reinforced Concrete Arch Overpasses</b> M. Neradilek	3
<b>Medium Span Footbridge System Using UHPC</b> J. Prchal, M. Holý, J. Prchlík, D. Čítek and J. Marek	17
<b>Simulations and Measurement of Temperatures in Bridge Structures</b> V. Němčic, J.L. Vítek and J. Lukeš	29
<b>Composite Structure of UHPFRC and Normal Strength Concrete with Innovative Shear Connector</b> A. Čítek, J. Prchal, J. Mourek, D. Čítek, J. Marek and J. Kolísko	39

## Chapter 2: Concrete Slabs

<b>Comparative Evaluation of Punching Shear Resistance of Flat Slabs Using Experimental Results and the Second Generation of Eurocode 2 with Nonlinear Analysis</b> E. Kormošová, T. Fecko and J. Halvonik	49
<b>GFRP - Reinforced Prestressed Concrete Slabs: Experimental Analysis</b> V. Benko, A. Valašík and A. Kováčová	57

## Chapter 3: Beam Structures

<b>Numerical Modelling of Deep Beams with Various Concrete Strength</b> H. Kamal and I. Holly	67
<b>Experimental Verification of the Influence of Axial Force on the Shear Resistance of Prestressed Beams with Shear Reinforcement</b> V. Borzovič and J. Baran	75
<b>Shear Resistance of Beams Reinforced with GFRP Reinforcement</b> D. Bálint and R. Sonnenschein	83
<b>Perspectives of High-Strength Prestressing Steel in Modern Concrete Engineering</b> Z. Haššová and V. Borzovič	89

## Chapter 4: Panels and Columns

<b>Increasing the Load-Bearing Capacity of Reinforced Concrete Panels by Replacing the Compressed Part of the Cross-Section with UHPFRC</b> K. Toman and I. Broukalová	101
<b>Examination of Defects in Joints of Large Panel System Buildings and Their Impact on Load-Bearing Capacity and Stiffness of Connections</b> J. Kozmon, K. Laco and V. Benko	107
<b>Effect of Recycled Aggregate in Concrete on Column Resistance</b> M. Bobek and R. Sonnenschein	125
<b>3D Printed Portal: Concrete, Digital Geometry and the Redefinition of the Building Element</b> M. Gabriel, A. Hvízdal, O. Melter and Z. Auská	133

## Chapter 5: Parameters Identification and Design

<b>Sustainable Design of Reinforced Concrete Structures: A Multi-Criteria Software-Based Optimization Approach</b>	
A. Horáková, A. Kohoutková and I. Broukalová	143
<b>Reliability Assessment of Design Formulas for Shear Capacity of Glass Fibre Reinforced Polymers Concrete Elements</b>	
J. Večeře, D. Novák, M. Šomodíková and R. Kotynia	155
<b>Design Characteristics of GFRP Reinforcements at Extreme Temperatures</b>	
J. Ježek, F. Girgle, D. Vašátko, Đ. Čairović, M. Zlámal and P. Štěpánek	167
<b>Analysis of a Dam Embankment in Terms of Hydration Heat and Shrinkage</b>	
M. Holý, S. Potůčková, P. Kněž and J. Kolísko	175
