

Table of Contents

Preface

Chapter 1: Management of Energy Transition Projects

Integrating Risk Management and Green Procurement Practices for Sustainable Energy Transition Projects in Nigeria K.E. Ugwu, C. Odinakachi, E.C. Nwadike, I. Echeme, E. Emefo, K.O. Adeniyi and O.K. Onyekachi	3
Integrating Monte Carlo Simulation and AI-Driven Risk Management into Sustainable Procurement for Energy Transition: A Systematic Review E.K. Ugwu, O.C. Njoku, U.C. Anya, F.C. Ekejiuba, R.T. Okwara, E.O. Chukwu and C.C. Onyeonu	13

Chapter 2: Analysis of Energy Access and Energy Supply Performance in Africa

Theme: Energy Supply & Energy Access in Africa Topic: Examining Energy Supply/Access Performance: An Electricity Supply and Customer Growth Analysis of Nigerian Discos (2015-2024) G.C. Offorson and E.P. Agbo	23
Analyzing Distribution Network Performance Gaps and Modernization Challenges in Uganda's Electricity Sector: A Case Study of Kampala West Region H. Ssekaayi, J. Taaka, M. Edimu and J. Namaganda Kiyimba	33

Chapter 3: Techno-Economic Assessment in Design of Renewable Energy Systems

Analysis of Hybrid Energy System for Optimal Power Performance in 5G Base Stations I.B. Asianuba and O.T. Eze	43
Techno-Economic Analysis of a Biomass Integrated Hybrid Energy System: A Faculty-Level Case Study D. Kogbara and E. Omorogiuwa	55
Techno-Economic Assessment of Solar PV System for Two Private Enterprises in Ghana A.M. Akoumany, C.K.K. Sekyere and D.O. Omata	73
Techno-Economic Assessment of an Off-Grid Hybrid Renewable Energy System with Green Hydrogen Storage System for a Rural Primary Healthcare Centre in Abuja O.D. Adewumi, A.S.O. Ogunjuyigbe, O. Tamunopekerebia and O.R. Adewumi	95
