

Table of Contents

Preface

Chapter 1: Processing Technologies of Structural Materials

A Mechanistic Cutting Force Model for Thin-Wall End Face Turning Operation P. Borthakur and T.C. Bera	3
Experimental Investigation on the Mechanical Properties and Formability Analysis of Stainless Steel 316 Thin Sheets at Different Annealing Temperatures K.S. Naidu, R. Datta and M. Bhargava	10
Influence of Process Parameters on Forming Forces in Single Point Incremental Forming of Commercially Pure Titanium R. Kumar, A. Singh and G. Kumar	18
Interfacial Temperature Variation in Friction Stir Lap Welding of AA7075 N. Kumar and A. Bhattacharya	28

Chapter 2: Steel and Alloys

Solubility of Nitrogen in Austenitic Stainless Steel S. Ghali, H. El-Faramwy and M. Eissa	37
Mössbauer Spectroscopy Analysis of FeCo Nano-Particles Alloy Synthesized by Hydrothermal Method M.W. Halimi, A. Guittoum, M. Hemmous and I. Bouelkreb	47
Effect of Laser Power on the Synthesis of NbTiFeCrAl High Entropy Alloy Coatings N. Malatji, M.B. Shongwe, P. Mpofu and L.R. Kanyane	53

Chapter 3: Functional Materials

Development of Silver Nanoparticles Enriched N-Dodecanoic Acid as Energy Storage Material for Thermal Management of Electronic Systems L. Swetha, R. Parameshwaran and D. Sandip	61
Development and Characterization of Ni-Cobalt Oxide Coatings for Functional Applications A.R. Shashikala and B.S. Sridhar	71
Study on the Influence of Curing Regime on the Microstructural and Mechanical Properties of Alkali-Activated Concrete with Coarse Recycled Aggregates M.D. Ikramullah Khan, V. Vinayaka Ram and R. Parameshwaran	78

Chapter 4: Materials for Biomedical Applications

Microstructural Analysis of Biodegradable Magnesium Alloy WE43 after Laser Surface Melting C.Y. Tan, C. Wen, K. Munir, D. Zhang and H.Q. Ang	91
--	----

Chapter 5: Composites

The Effect of a Silane Compatibilizer on 3D-Printed Nylon-Cork Composites S.S. Alghamdi, R. Balu, N. Choudhury, N.K. Dutta and S. John	99
Mechanical Characterization of MWCNTs Reinforced Jute/Glass-Epoxy Hybrid Composites M. Bhargav and V.S. Babu	105
Cumulative Damage Analysis of GFRP Laminates with Different Impact Scenarios N.R. Mathivanan, B.L. Sunith and B.S. Sridhar	113

Mechanical and Vibrational Studies on Hybrid Fibre Metal Laminates N. Kali, N. Chelimilla and S. Korla	121
Low Velocity Impact Analysis of Hybrid Kevlar/Glass Laminate Composites B.S. Sridhar, B.L. Sunith and J. Christian	130

Chapter 6: Fatigue and Fracture of Materials

Fatigue Life Enhancement of Binder Jet Manufactured Bronze Infiltrated 316L by Severe Shot Peening T. Rautio, M. Jaskari, M. Keskitalo, M. Hietala and A. Järvenpää	143
Investigation of the Effect of Novel Two-Step Austenitization Process on the Microstructure and Mechanical Properties of ADI D. Joshi, S. Putatunda, S. Panneerselvam and J. Boileau	151
Bending Fatigue Strength of WAAM Ultra-High-Strength Steel M. Hietala, M. Keskitalo, M. Jaskari, T. Rautio and A. Järvenpää	158
Study on Flexural Performance of Fiber Reinforced Concrete Beams Using Glass Fiber Reinforced Polymer Bars and Steel Rebars K. Hemalatha and D.R. Prasad	165

Chapter 7: Additive Manufacturing

Influence of Supertransus Heat Treatment on the Microstructure and Compressive Performance of Additively Manufactured Ti6Al4V (ELI) M. Sukre and A. Meena	177
On Porosity and Flexural Strength of FDM Parts Printed using Short Carbon Fiber Reinforced Polyamide 6 Filament S. Gangwar and S. Ahmed	184
Additively Manufactured Hybrid and Hierarchical Auxetic Structures: A Review S. Kumar, H.D. Sondagar, V. Naranje and S. Teraiya	193

Chapter 8: Computational Materials Science

Deformation Behaviour of SWCNT and MWCNT under Torsional Loading: Insights from Molecular Dynamics D. Bedi, S. Sharma and S.K. Tiwari	203
Analytical Study of Single-Walled Carbon Nanotubes Using Strain Gradient Timoshenko Nanobeam B. Babu, N. Saju, T.D. Castro and D. Rohit	211
Predictive Modeling of Half-Metallicity in Heusler Compound through Machine Learning Modeling A. Ashok and N. Bhagat	218
Effect of Material Modeling on Prediction of Isothermal Formability of AA6082-O Sheet at Elevated Temperature S.S. Panicker and S. Basak	230
Numerical Modelling of Nanoindentation in Cement Paste V. Renuka, S.V. Rao and T. Tadepalli	237
Predicting the Natural Frequency Response and Strain Energy Release Rate in Delaminated Adhesively Bonded Joints through Finite Element Analysis and Experimental Validation N. Kumar and S. Biswas	245

Chapter 9: Advanced Manufacturing and Industrial Development

Real-Time Monitoring of Shop Floor Machines with Open Sources Technologies: A Case Study A. Kumar and V. Vasu	255
Innovations in Raw Materials Preparations – Micro Pelletizing D. Prasad, R. Kumari, C.A. Arunkumar, B.S. Bandyopadhyay and S. Sinha	262
