

# Table of Contents

## Preface

## Chapter 1: Materials for Energy Storage Devices

<b>Study of the Activator Effects on the Specific Surface Area of Porous Carbon and its Performance as Lithium-Sulfur Battery Cathode</b> N. Suryana, S. Mudaim, O. Nurhilal and S. Hidayat	3
<b>Synthesis of Porous Carbons from Candlenut Shells Using Various Types of Activators for Environmentally Friendly Supercapacitors</b> S. Hidayat, S. Mudaim, A. Zulfikar, N. Riveli and I. Rahayu	11
<b>A Facile Two-Step Utilization of Sorghum Waste Derived Activated Carbon</b> M.N. Ikhsanudin, E. Apriliyani and C.S. Yudha	23

## Chapter 2: Functional Materials

<b>Impact of Calcium Hydroxide Particle Size on the Intracanal Medicament Penetration Efficacy</b> A.N. Sidiqa, A. Afidi, M.S. Suntana, M.N. Zakaria, I.M. Joni and A.M. Maskoen	33
<b>The Formation of Porous Silicon Using Vertical Photoelectrochemical Method with Laser Energy Variation</b> R. Suryana, T.A. Setyorini and M. Diantoro	41
<b>Molecular Modeling Analysis of rGO/Fe<sub>3</sub>O<sub>4</sub> Nanocomposite Molecules</b> S. Setianto, S. Ekawardhani, R. Rovina, C. Panatarani and I.M. Joni	49

## Chapter 3: Recycling and Applications of Biobased Materials

<b>Antifeedant Nanosuspension Formula of <i>Tithonia diversifolia</i> Leaf Extract by Emulsion Inverse Method to Control <i>Crocicidolomia pavonana</i> Cabbage Pest Insect</b> W. Hermawan, M. Melanie, Z. Maulidah, D.M. Malini, M. Miranti and M. Madihah	57
<b>Biosynthesis of Gold Nanoparticles Using Sambiloto Leaf Extracts and its Characteristics</b> N.N. Rupiasih, M.Y. Imas, I.W. Supardi, I.K. Putra and A. Syampurwadi	67
<b>Exploring the Potential of Pangasius Catfish Oil as a Base Oil for Nanoemulsion Products: Optimization and Characterization</b> A.A.S.I.C. Putri, C.A.J. Tanaya, P.S. Yustiantara, E.I. Setiawan, N.N. Rupiasih and I.M.A.G. Wirasuta	75
<b>Kinetic Studies on MB Adsorption by Graphene like Material from Coconut Shell Charcoal</b> D.A. Affandi, B.L. Najati, N. Syakir, I.M. Joni and F. Fitrilawati	95
<b>The Effectiveness of Concentration of Chitosan Extracted from Tiger Shrimp Shells as a Natural Preservative of Kenyar Fish</b> N.N. Rupiasih, Y.Y. Tandu, N. Wendri, I.K. Putra and P.B. Vidyasagar	111
<b>Fabrication of a PETG-Based Biocarrier Using Additive Manufacturing for Moving Bed Biofilm Reactor (MBBR) Applications</b> R.K.H.K. Widjaya, F. Faizal, I.M. Joni and C. Panatarani	119

## Chapter 4: Sensors Designing

<b>Fabrication of a Potential Difference Measuring Instrument Using a Capacitive Sensor Based on ATmega328 Microcontroller</b> A.A.N.S. Mahendra Putra, N.N. Rupiasih, I.W. Supardi and P.B. Vidyasagar	131
