

Table of Contents

Preface

Chapter 1: Design and Performance Characterisation of Composite Materials

Effect of Filler Weight Percentage on the Permittivity of Coconut Shell–Epoxy Composites K.B. Mekha, K. Sudhakar, N. Zainol, M.S.A. Karim, M. Fikry and N.A.T. Yusof	3
Interfacial Thermal Resistance of Al-TiB₂ Particle Dispersed Composites with Different Sintering Conditions K. Sugio, H. Matsuura and G. Sasaki	9
Influence of SiCp Addition on the Microstructure, Ageing Response and Mechanical Properties of Aluminum Matrix Composites L. Zeng, K. Sugio and G. Sasaki	15
Damping Properties of Magnesium Alloy-S45 Composites with Varying Diameter of Specimen K. Park, K. Sugio and G. Sasaki	21
Microstructure and Mechanical Properties of Tungsten Fiber-Reinforced Composites Fabricated by Spark Plasma Sintering H. Huiseong, K. Sugio and G. Sasaki	27
Study of Structure–Property Relationships in Methacrylate-Functionalized POSS Nanocomposites Using Molecular Dynamics Simulations C.M.R. Madhuranthakam	33

Chapter 2: Microstructural Evolution and Property Analysis of Metallic Materials

<i>In-Situ</i> SEM Study of Temperature Effects on Austenite Grain Growth and Boundaries Migration S. Liu, X.J. Ye and Y.F. Zhang	41
Effect of Carbon Equivalent on Thermal Conductivity of Titanium-Alloyed Gray Cast Iron K. Worakhut, W. Boonyarit, S. Mangmee, W. Hansongkhram, T. Soipornmat, H. Khochadklang, P. Buahombura and S. Boonmee	51
Microstructural Evolution and Coupling Behavior of Dynamic Softening and Phase Transformation in TC18 Alloy during Hot Compression K. Wang, G. Sasaki, K. Sugio and Y. Guo	57

Chapter 3: Material Processing and Forming Technologies

Drilling of CFRP Using a Solid Carbide Twist Drill S.R. Tuisuva, J. Nomani, Z. Chen and A. Polishetty	65
Sensitivity Analysis of Input Parameters in Wire Electric Discharge Machining Using Response Surface Methodology O. Ali, A. Niaz and D.W. Jung	73
Ripple Marks on Surface of Aluminum Alloy Strips Cast Using High Speed Twin Roll Caster Equipped with Nozzle T. Haga, H. Ochi, H. Fuse, H. Watari and S. Nishida	83
Inline Semisolid Rolling of Al-5%Mg Strip Cast Using Twin Roll Caster T. Haga, H. Ochi, H. Fuse, H. Watari and S. Nishida	89
Semisolid Forging of Al-10%Mg T. Haga, H. Ochi, H. Fuse, H. Watari and S. Nishida	95
Microstructure on Inner Surface of Cell Walls inside Aluminum Alloy Foam Fabricated via Semi-Solid Route S. Takamatsu, N. Tsuchida and S. Suzuki	101

Chapter 4: Synthesis and Applications of Functional Chemical Materials

Electrolyte Concentration-Driven Structural and Electrochemical Modulation of Copper Hexacyanoferrate in Zinc-Ion Batteries S. Lee, P.M. Nogales, S. Yang and S.K. Jeong	113
Development and Material Characterization of Chitosan-Coated Tissue Paper Pulp Waste as a Bio-Based Adsorbent for Cupric Ion Removal P. Charnkeithkong and S. Sripiboon	121
Synthesis and Properties of Co-Doped Blue Pigments from the System $\text{Al}_2\text{O}_3\text{-SiO}_2$ M.G. Minova, I.G. Markovska, A.A. Georgieva and F.S. Yovkova	129

Chapter 5: Biomedical Materials

Citric Acid-Derived Disulphide Polymers as Carriers for Dual Drug Delivery in Chemotherapy Applications M.Y. Siti Nur Aishah, O.H. Ching and L. Vuanghao	137
Synthesis and Structural Characterization of Gastric Mucosal Protective Agent Nano-Sucralfate Z.Y. Wu and Z.F. Wu	145
Optimization of Electrospun Surfaces Containing Functional Bioadditives for Wound Dressing Applications J. Oztemur-Sezgin, S. Ozdemir, H. Sezgin and I. Yalcin-Enis	151

Chapter 6: Materials for Opto- and Microelectronics

Study on Film Morphology of Liquid Droplet Evaporation in Confined Space W.X. Wu, J.K. Chen, W. Chen and Z.P. Yin	159
Voltage-Induced Director Orientations in IPS-Liquid Crystal Cells with Different Electrode Structures R. Suryantari and C.Y. Huang	165
Optical Absorption and Bandgap Modulation in Diamond-Like Carbon Films for Anti-Reflection T. Srisantirut, W. Pengchan and T. Phetchakul	171
Effect of Channel Length Variation on the Electrical Conductivity of Passivated Back-Gated Graphene Field-Effect Transistor (GFET) Using Silvaco TCAD Tools H. Guzali, N.I. Ayob, A.A. Md Ralib, M.A. Md Zawawi, C.R. Che Hak and Z. Ahmad	179
The Heat Dissipation Effect of Liquid Cooling Heat Sink Based on Triply Periodic Minimal Surface Structure S.K. Liao, J.Z. Zhang, H.Y. Li and C.H. Kuo	189

Chapter 7: Advanced Manufacturing Processes and Quality Control

Laser Shock Peening with Acoustic Emission In-Situ Monitoring for Quality Control J.M. Griffin, P. Shukla, R. Qin and P. Butler Smith	199
Bayesian Strategy for the Volume Accuracy of Ink Droplets Continuous Estimation during Printing Based on Prior Knowledge with Earth Mover's Distance D. Kong, J.K. Chen and J.C. Xiong	211
The Printing of Highly Uniform Display Device by Graph Convolutional Neural Network-Based Manufacturing J.C. Xiong, J.K. Chen and Z.W. Zhao	217
Flow Stoppage in the Middle Area of Flow Length Occurs at Thin Die Gap T. Haga, H. Sakaue, H. Fuse and H. Watari	225
Three-Dimensional Geometrically Exact Dynamic Modeling of Electrohydrodynamic Direct-Writing under a Non-Uniform Electric Field G.Z. Wang, W. Chen, J.K. Chen, C. Hu and Z.P. Yin	233
