

# Table of Contents

## Preface

## Chapter 1: Titanium Aluminides

<b>Powder Metallurgy and Heat Treatment Effects on Microstructure in a <math>\gamma</math>-TiAl Ti-4522XD Alloy</b>	
B. Ruiz-Palenzuela, I. Sabirov and E.M. Ruiz-Navas	3
<b>Sintering Titanium Aluminides with Co Addition</b>	
L. Quaglio, W.A. Monfardini and J. Soyama	13
<b>Effect of Heat Treatment Temperature and Rolling on Microstructure and Mechanical Property of Powder Metallurgy Ti43Al9V(Y) Alloy in Electron Backscattering Diffraction</b>	
Y.Y. Chen, D.D. Zhang, T.Z. He, P. Sun and L.Y. Bao	21

## Chapter 2: Titanium Matrix Composites

<b>Recent Developments in Producing Highly Dense Ti Matrix Composites via Powder Metallurgy Approaches</b>	
Y.C. Song, O. Stasiuk, D.G. Savvakina and O.M. Ivasishin	31
<b>Additive Manufacturing of TiBw-Reinforced Titanium Matrix Composites Fabricated by Electron Beam Melting: Microstructure and Mechanical Properties</b>	
S.F. Li, D.X. Hui and D. Pan	41
<b>Optimizing Titanium-Boron Carbide Composites for Aerospace Manufacturing via Plasma Metal Deposition</b>	
C.M. Arévalo, E.M. Perez-Soriano, E. Ariza, M. Kitzmantel and I. Montealegre-Meléndez	49
<b>Microstructural Development of Ti-35Nb-TiC Metal Matrix Composites</b>	
V.A.R. Henriques, R.O.P. de Lima, M.H. Lapena, J. Assis and A.M. Gama	57
<b>Enhancing Wear Resistance of Titanium Alloys: Insights from Tribological Testing</b>	
I. Montealegre-Meléndez, C.M. Arévalo, E. Neubauer and E.M. Perez-Soriano	65
<b>Improvement of the Mechanical Properties of a P/M Ti-6Al-4V Alloy with Additions of Carbon and Silicon</b>	
N. Burgos and J.M. Martin	73

## Chapter 3: Metal Injection Molding and Sinter-Based Additive Manufacturing

<b>Suitability of Novel Titanium Powder for Metal Injection Moulding Application</b>	
V. Kruzhanov, A. Gonchar, V. Troshchylo, A. Brodskyy, V. Yarovynskyi, O. Chukhmanov and A. Yarovynskyi	83
<b>Interaction of Binder and Powder in Processing of Titanium by MEX-AM</b>	
C. Kukla, E. Gordo Odériz, S. Schuschnigg, J. Villemur, P. Luna and C. Holzer	93
<b>Processing of a Beta Titanium Alloy by Metal Injection Molding (MIM)</b>	
R.O.P. de Lima, M.H. Lapena, A.M. Gama and V.A.R. Henriques	103
<b>Comparing Lithography-Based Metal Manufacturing for Titanium with Established Processes such as Cold Metal Fusion</b>	
T. Marter and F. Gerdtz	113

## Chapter 4: Other Additive Manufacturing Techniques

<b>Large Titanium Preforms Manufactured by Cold Spray</b>	
C. Doblin, S.H. Zahiri, M. Faizan-ur-Rab, S. Gulizia, A. Vargas-Uscategui, A. Yousefiani and B. Zamorano	123

<b>Manufacturing of a Ti6Al4V Aerospace Component by Metallic Wire Based Laser Beam Directed Energy Deposition</b>	
E. Vaamonde, P. Rey and M. Salgueiro	133
<b>Ti and Co-Cr-Mo Alloy Dissimilar Surface Modification Obtained by Laser Surface Alloying / Additive Manufacturing</b>	
G.A. Assumpção, A.F. Ramirez-Rodrigues and J.B. Fogagnolo	143
<b>Effect of Layer Thickness and Particle Size Distribution on the Microstructure and Properties of Ti6Al4V Processed by Laser Powder Bed Fusion</b>	
N. Belsure, R. Sandberg, E. Hryha, G. Soundarapandiyar and F. Deirmina	149

## **Chapter 5: Sustainability and Recycling**

<b>Exploitation of FAST/SPS to Recycle Surplus Titanium Alloy Particulates for Sustainable Solutions and near Net Shape Components</b>	
S. Lister and M. Jackson	161
<b>3D Printing of Ti-6Al-4V Parts from Waste Material</b>	
M. Grande-Molina, L. Calvo, L. Poudelet, R. Cardona, C. Chirico and B. Ferrari	169
<b>Effect of the Scanning Speed and Powder Recycling Impact on Titanium Ti-6Al-4V Alloy by PBF – L/M</b>	
Á. Nieto, A. Periñán, J. Santaolaya and C. Galleguillos	179

## **Chapter 6: Some Specialized Applications**

<b>Porous Titanium for Biomedical Applications Produced Using Coarse Titanium Powder via the Space Holder Technique</b>	
A. Govender and M. Kiliswa	189
<b>Comparison between TiN Coating on Porous Ti-6Al-4V Produced by PBF-EB/M or PM for Bipolar Plates in PEM Fuel Cells</b>	
J. Villemur, C.R. Villarreal, J.M. Crego, J.R. Blasco Puchades and E. Gordo Odériz	199
<b>Powder Metallurgy Technologies for Low-Cost Titanium-Based Laminated Armor</b>	
S.V. Prikhodko, P.E. Markovsky, D.G. Savvakina, O.M. Ivasishin, O. Stasiuk and D. Oryshych	209
<b>Sintered Titanium Sponge Using Stop-Controlled SPS Technology</b>	
T. Hutsch, J. Trapp and T. Weißgärber	217
