

Table of Contents

Preface

Chapter 1: Composite Materials

Mechanical and Thermal Analysis of Nito Fiber Reinforced Composites R.S.B. Sosa and J.C. Millare	3
Asymmetric Four Point Bend Test Method for Interlaminar Shear Strength in Ceramic Matrix Composites P. Jadhav and C. Lande	10
Effects of Irradiation Dose of Sheet-Like Electron Beam and its Cathode Voltage on Impact Strength of Carbon Fiber Reinforced Thermoplastic Polyamide just before Shipping K. Sagawa, H. Kimura, T. Ishiwata, M.C. Faudree, H.T. Uchida and Y. Nishi	16
Microscopic Formation Mechanism and Physical Properties of Mo/Cu Composites with High Densification Q. Li, Z.D. Li, H.F. Xie, L.J. Peng and X.J. Mi	25
Handling Composites at Aircraft Accident Sites: An Evaluation of the Fracture Features in Burnt CFRP after the Application of a Fixant Solution N. Zimmermann, P.H. Wang and K. Pullen	35
A Review of Biodegradable Polymer Blends and Polymer Composite for Flexible Food Packaging Application S. Govindan, M. Ramos and A.M. Al-Jumaily	41

Chapter 2: Electrochemical Materials in Energy Conversion and Storage

Microstructural Property Investigation of LSM-4Sc4YSZ Novel Composite Electrode Prepared Using All-Alkoxide Sol-Gel and Solid-State Reaction Methods for Solid Oxide Electrochemical Cells P.J.B. Diamansil and R.B.M. Cervera	53
Thin Film Fabrication and Characterization of LSM-YSZ/YSZ Half-Cell for Solid Oxide Electrolysis Cell via Screen-Printing J. Hablado and R.B.M. Cervera	60
Screen-Printing of NiO-ScSZ on YSZ Substrate Using Solid-State Reaction and Glycine-Nitrate Process Precursors for Solid Oxide Electrochemical Cells C.M. Macalisang and R.B.M. Cervera	67
Quasi-Solid State Polymer Electrolytes Based on PVdF-HFP Host Polymer for Sodium-Ion Secondary Batteries M. Menisha, M.A.K.L. Dissanayake and K. Vignarooban	73
Hierarchical Nitrogen Nanoporous Carbons by Surfactant-Assisted Synthesis of Zeolitic-Imidazolate Frameworks for High Performance Supercapacitor A. Khalifa, S. Ebrahim, A. El Said and M.M. Ayad	79

Chapter 3: Functional Materials

Measuring the Capacity of a Proposed Vibration Isolator Using Auxetics Sheets P. Townsend, J.C. Suárez, I. Mendoza and D. Townsend	87
Comparison of Carrier Deflection between MAG-TFET and MAG-FinFET T. Boonlua, A. Poyai and T. Phetchakul	93

Chapter 4: Materials for Biomedical Applications

Antibacterial Effect of Experimental Orthodontic Elastomeric Ligature Coated with Zinc Oxide Particles K. Khlongwanitchakul, N. Anuwongnukroh, S. Dechkunakorn, P. Naruphontjirakul, W. Wichai and R.L. Srisatjaluk	103
Functionalization of Chitosan-TiO₂ Nanotubes Scaffolds with Fibronectin for Bone Regeneration S.S. Lim, C.L. Chiang, N. Rosli and K.W. Chew	111

Chapter 5: Applied Biotechnologies

The Interplay of Brønsted-Lowry and Lewis Acid Sites in Bifunctional Catalyst for the Biomass Conversion to Levulinic Acid N.S.M. Azlan, C.L. Yap, Y.W. Tiong, S. Gan and M.B.A. Rahman	121
---	-----

Chapter 6: Additive Manufacturing Technologies

Tensile Strength Evaluation of FDM 3D-Printed Polymer Using Taguchi Methodology and Range Analysis M.T. Espino, B.J. Tuazon and J.R.C. Dizon	129
InkJet-Printed Supercapacitor Electrodes of Graphene-Carboxymethyl Cellulose Biocomposite Ink A.M. Bayoumy, M.A. Ibrahim, A. Osman and A. Abdelmoneim	135
High Temperature Heat Treatment and Severe Shot Peening of PBF-LB Manufactured 316L Stainless Steel T. Rautio, M. Jaskari, M. Hietala and A. Järvenpää	141

Chapter 7: Failure Analysis and Flaw Identification

A Machine Learning Model for Flaw Identification in Fibre-Reinforced Composites W. Hall, A. Kromik, B. Miller, I. Underhill and Z. Javanbakht	151
Failure Analysis of AISI H13 Shafts Used in Twin Screw Extruders during Fluoropolymer Compounding V. Shrinivas and T. Arumugam	157

Chapter 8: Materials in Road Construction and Buildings

Stabilization of High Sulfate-Saline Soil with Lime, Ground Granulated Blast Furnace Slag (GGBFS), and Basic Oxygen Furnace Slag (BOFS) F.O. Balogun, A. Abzal, A. Kissambinova, C.S. Shon and J.R. Kim	167
Theoretical Background of Self-Healing in Asphalt Concrete S. Inozemtsev	174
Developing a Single-Specimen Technique for Low-Temperature R-Curve Determination of Asphalt Concrete Using a Modified Unloading Compliance Method S. Ghafari, F.M. Nejad and H. Kazemi	182
Use of Basic Oxygen Furnace Slag (BOFS) in Superpave Mix Design: BOFS Aggregate Properties C.S. Shon, J.R. Kim, A. Kissambinova, S. Sandybay, S. Orazayeva, N. Dossayev and P. Chzhen	188
Low-Temperature Fracture Performance of Polymerized Sulfur Modified Asphalt Concrete Mixtures S. Ghafari, F.M. Nejad and H. Kazemi	196
Computer Simulation for Energy-Efficient Buildings Integrated with Developed Phase Change Material (PCM) A. Yousefi, W.C. Tang and S. Alghamdi	202
