

## Table of Contents

### Preface

### Chapter 1: Composite Materials

<b>Mechanical and Thermal Analysis of Nito Fiber Reinforced Composites</b> R.S.B. Sosa and J.C. Millare	3
<b>Asymmetric Four Point Bend Test Method for Interlaminar Shear Strength in Ceramic Matrix Composites</b> P. Jadhav and C. Lande	10
<b>Effects of Irradiation Dose of Sheet-Like Electron Beam and its Cathode Voltage on Impact Strength of Carbon Fiber Reinforced Thermoplastic Polyamide just before Shipping</b> K. Sagawa, H. Kimura, T. Ishiwata, M.C. Faudree, H.T. Uchida and Y. Nishi	16
<b>Microscopic Formation Mechanism and Physical Properties of Mo/Cu Composites with High Densification</b> Q. Li, Z.D. Li, H.F. Xie, L.J. Peng and X.J. Mi	25
<b>Handling Composites at Aircraft Accident Sites: An Evaluation of the Fracture Features in Burnt CFRP after the Application of a Fixant Solution</b> N. Zimmermann, P.H. Wang and K. Pullen	35
<b>A Review of Biodegradable Polymer Blends and Polymer Composite for Flexible Food Packaging Application</b> S. Govindan, M. Ramos and A.M. Al-Jumaily	41

### Chapter 2: Electrochemical Materials in Energy Conversion and Storage

<b>Microstructural Property Investigation of LSM-4Sc4YSZ Novel Composite Electrode Prepared Using All-Alkoxide Sol-Gel and Solid-State Reaction Methods for Solid Oxide Electrochemical Cells</b> P.J.B. Diamansil and R.B.M. Cervera	53
<b>Thin Film Fabrication and Characterization of LSM-YSZ/YSZ Half-Cell for Solid Oxide Electrolysis Cell via Screen-Printing</b> J. Hablado and R.B.M. Cervera	60
<b>Screen-Printing of NiO-ScSZ on YSZ Substrate Using Solid-State Reaction and Glycine-Nitrate Process Precursors for Solid Oxide Electrochemical Cells</b> C.M. Macalisang and R.B.M. Cervera	67
<b>Quasi-Solid State Polymer Electrolytes Based on PVdF-HFP Host Polymer for Sodium-Ion Secondary Batteries</b> M. Menisha, M.A.K.L. Dissanayake and K. Vignarooban	73
<b>Hierarchical Nitrogen Nanoporous Carbons by Surfactant-Assisted Synthesis of Zeolitic-Imidazolate Frameworks for High Performance Supercapacitor</b> A. Khalifa, S. Ebrahim, A. El Said and M.M. Ayad	79

### Chapter 3: Functional Materials

<b>Measuring the Capacity of a Proposed Vibration Isolator Using Auxetics Sheets</b> P. Townsend, J.C. Suárez, I. Mendoza and D. Townsend	87
<b>Comparison of Carrier Deflection between MAG-TFET and MAG-FinFET</b> T. Boonlua, A. Poyai and T. Phetchakul	93

### Chapter 4: Materials for Biomedical Applications

<b>Antibacterial Effect of Experimental Orthodontic Elastomeric Ligature Coated with Zinc Oxide Particles</b> K. Khlongwanitchakul, N. Anuwongnukroh, S. Dechkunakorn, P. Naruphontjirakul, W. Wichai and R.L. Srisatjaluk	103
---	-----

<b>Functionalization of Chitosan-TiO<sub>2</sub> Nanotubes Scaffolds with Fibronectin for Bone Regeneration</b> S.S. Lim, C.L. Chiang, N. Rosli and K.W. Chew	111
--	-----

## **Chapter 5: Applied Biotechnologies**

<b>The Interplay of Brønsted-Lowry and Lewis Acid Sites in Bifunctional Catalyst for the Biomass Conversion to Levulinic Acid</b> N.S.M. Azlan, C.L. Yap, Y.W. Tiong, S. Gan and M.B.A. Rahman	121
---	-----

## **Chapter 6: Additive Manufacturing Technologies**

<b>Tensile Strength Evaluation of FDM 3D-Printed Polymer Using Taguchi Methodology and Range Analysis</b> M.T. Espino, B.J. Tuazon and J.R.C. Dizon	129
--	-----

<b>InkJet-Printed Supercapacitor Electrodes of Graphene-Carboxymethyl Cellulose Biocomposite Ink</b> A.M. Bayoumy, M.A. Ibrahim, A. Osman and A. Abdelmoneim	135
---	-----

<b>High Temperature Heat Treatment and Severe Shot Peening of PBF-LB Manufactured 316L Stainless Steel</b> T. Rautio, M. Jaskari, M. Hietala and A. Järvenpää	141
--	-----

## **Chapter 7: Failure Analysis and Flaw Identification**

<b>A Machine Learning Model for Flaw Identification in Fibre-Reinforced Composites</b> W. Hall, A. Kromik, B. Miller, I. Underhill and Z. Javanbakht	151
---	-----

<b>Failure Analysis of AISI H13 Shafts Used in Twin Screw Extruders during Fluoropolymer Compounding</b> V. Shrinivas and T. Arumugam	157
--	-----

## **Chapter 8: Materials in Road Construction and Buildings**

<b>Stabilization of High Sulfate-Saline Soil with Lime, Ground Granulated Blast Furnace Slag (GGBFS), and Basic Oxygen Furnace Slag (BOFS)</b> F.O. Balogun, A. Abzal, A. Kissambinova, C.S. Shon and J.R. Kim	167
---	-----

<b>Theoretical Background of Self-Healing in Asphalt Concrete</b> S. Inozemtsev	174
--	-----

<b>Developing a Single-Specimen Technique for Low-Temperature R-Curve Determination of Asphalt Concrete Using a Modified Unloading Compliance Method</b> S. Ghafari, F.M. Nejad and H. Kazemi	182
--	-----

<b>Use of Basic Oxygen Furnace Slag (BOFS) in Superpave Mix Design: BOFS Aggregate Properties</b> C.S. Shon, J.R. Kim, A. Kissambinova, S. Sandybay, S. Orazayeva, N. Dossayev and P. Chzhen	188
---	-----

<b>Low-Temperature Fracture Performance of Polymerized Sulfur Modified Asphalt Concrete Mixtures</b> S. Ghafari, F.M. Nejad and H. Kazemi	196
--	-----

<b>Computer Simulation for Energy-Efficient Buildings Integrated with Developed Phase Change Material (PCM)</b> A. Yousefi, W.C. Tang and S. Alghamdi	202
--	-----
