Preface, Committee

Chapter 1: Numerical Investigation of Heat and Mass Transfer Processes

Numerical Study of MHD Natural Convection in Partially Heated Cubical Cavity Filled with Hybrid Nanofluid A. Bahoum, M. El Hattab and Y. El Hammami	3
Numerical Simulation of Natural Convection in an Inclined Cavity Filled with Ionanofluid M. Benshab, S. Bouchta and M. Feddaoui	13
Rarefied Gas Flow in a Micro Cavity with an Inner Obstacle Using the Lattice Boltzmann Method Y. Bouhouchi, B. Elaaddam, Y.A. Sadiki, Y. El Guennouni, M. Hssikou and J. Baliti	23
Analytical and Numerical Study of Double Diffusion Natural Convection in a Shallow Enclosure with Nanofluids: Impact of the Lewis Number on Heat and Mass Transfers B. El Hadoui and M. Kaddiri	35
Validation of Lattice Boltzmann Method in Two and Three Dimensions K. Choukrallah, N. Abouricha, M. Achak and M. El Alami	47
Lattice Boltzmann Method Simulations of Laminar Mixed Convection in an Inclined Lid-Driven Cavity Discretely Heated and Filled with Nanofluid A. Daiz, A. Bahlaoui, I. Arroub, S. Belhouideg, A. Raji and M. Hasnaoui	57
Lattice Boltzmann Simulation for Combined Natural and Forced Convection in a Lid-Driven Square Enclosure with an Inner Heat Sink D. Abdelhak, A. Bahlaoui, I. Arroub, S. Belhouideg, A. Raji and M. Hasnaoui	69
Numerical Study of Mixed Convection Flows around Large-Scale Heat Sinks: Application to Data Center Cooling F.Z. Laktaoui Amine, M. El Alami and E. Semma	81
Simulation of Natural Convection in a Triangular Cavity Using the Multi-Relaxation Time Lattice Boltzmann Method: Impact of Heated Chip Position Y. Ighris, M. Qaffou, J. Baliti, A. Moussaoui, Y. El Guennouni and M. Hssikou	91
Natural Air Convection Using LBM in a Cavity Heated Linearly M. Qaffou, Y. Ighris, Z. Abbassi, Y. Elguennouni, M. Hssikou and J. Baliti	103
Theoretical Analysis and Numerical Simulation of Thermosolutal Mixed Convection in a Vertically Oriented Rectangular Enclosure M. Rahmoun, T. Makayssi, B. El Hadoui and M. Lamsaadi	115

Chapter 2: Thermal Efficiency and Sustainable Technologies in Construction

Energy and Thermal Performance Analysis of a Residential Building with Alpha Fibers Based Materials in the Atlantic Climate of Morocco J. Elbrymy, M. Boumhaout, S. Oukach, H. Hamdi, M. Belhous and M. El Hattab	131
Mechanical and Thermal Characterization of Compact Clay Blocks Stabilized with Wood Ash or Ground Waste from Traditional Potteries S. Bajji, A. Saba and Y. Naimi	141

Chapter 3: Advanced Materials and Technology

Metal Foam and Nanoparticles Reinforced PCM for Electronic Components Thermal Management I. Afaynou, H. Faraji, K. Choukairy, M. Bourich and M. El Alami	151
--	-----

An Overview on Green Hydrogen Production from Renewable Energies and Perspectives for Morocco	
Y. Kamel, R. Nechad and A. El Marjani	163
<i>In Situ</i> Synthesis of Composite Cordierite-Mullite Ceramics from Ghassoul, Kaolin and Andalusite: Impact of Sintering Temperature	
F.E. Idbenjadi, A. Benhammou, M. Mouiyab, A. Abourriche, Y. El Hafiane, Y. Abouliatim, L. Nibou and B. Tanouti	179

Chapter 4: Plasma Technology

Influence of Two Superthermal Electrons on the Dusty Plasma Sheath with Dynamic Dust Charge	
Z. Eljabiri, O. El Ghani and I. Driouch	191
Reconfiguration of a Metallic Dipole Antenna Using Plasma Parabolic Reflectors	
A. El Jaouhari, A. Missaoui, M. Rochdi and M. El Kaouini	199
Magnetized Plasma Sheath Formation Criterion and Floating Electric Potential in the Presence of Non-Extensive Electrons and Ionization Source	
O. Jdaini, A. Missaoui, M. EL Bojaddaini, M. El Kaouini and H. Chatei	209

Chapter 5: Mechatronics

Temperature Sensors Based on One-Dimensional Superconducting Photonic Crystal	
S. Sabsi, F.Z. Harroui, O. El Abouti, T. Mrabti and E.H. El Boudouti	219
Impact of Satellite Orientation and Orbit Inclination on Thermal Transfers in a 1U LEO CubeSat	
F. Tribak, O. Bendaou and F. Ben Nejma	227
Investigation on the Performance of Lithium-Ion Battery Thermal Management	
M. Es-Satte, H. Faraji, K. Choukairy and M. Bourich	243
