

Table of Contents

Preface

Chapter 1: Green Concrete and Mortar

Fresh State Performance of Concrete with Recycled Glass Powder as Cement Replacement and Nanosilica B.T. Donaires Hurtado, H.M. Retuerto Arce and C.A. Eyzaguirre Acosta	3
Mechanical and Environmental Performance of Concrete with Partial Replacement of Cement by Silica Fume and Scallop Shell Powder in Coastal Areas A. Levano, J. Salinas and C.A. Eyzaguirre Acosta	11
Concrete Industry's Transition from CEMI to CEMII – A Case Study on CO₂ Footprint Reduction for a Self-Compacting Concrete Mix S. Papatzani, A.A. Rosa, P.S. Stefani, G. Pepas and N.A. Stefanis	25
A Global Perspective on the Use of Mine Tailings in Concrete: Developments and Trends through Bibliometric Analysis A. Maali, E. Mohamedelhassan and A. Bediwy	33
Effect of Lightweight Fillers on the Rheological Properties of Lime Grouts M. Vyšvařil, S. Paseka and F. Ptíčen	41
Sustainable Concrete with Recycled Glass and Oyster Shell as Partial Cement Replacements: A Study on Performance and Environmental Impact A. Calderón, J. Pariona and C.E. Acosta Augusto	49
Effect of Recycled Glass Powder and Nano-Silica on the Strength and Permeability of Concrete B.T. Donaires Hurtado, H.M. Retuerto Arce and C.A. Eyzaguirre Acosta	61
Optimization of the Compressive Strength of 280 kg/cm² of Concrete by Partially Replacing Cement with Ground Blast Furnace Slag and Silica Fume J.L. Ayra Espiritu, Y.J. Quispe Curo and C.A. Eyzaguirre Acosta	67
Can Emery Replace CEMII in Masonry Restoration Mortars? S. Papatzani, N.A. Stefanis and A.F. Kloukinioti	79

Chapter 2: Bio-Based Building Materials

Mechanical Evaluation of Adobe Reinforced with Wool and Corn Husk Fibers for Rural Housing A.C.C. Cabanillas, V.C. Espinoza Julcapoma and C.A. Eyzaguirre Acosta	87
Effect of Waste Type and Bio-Resin Addition on Flexural Strength of Constructional Composites: A Full Factorial Experimental Design Study H. Sezgin and I. Yalcin-Enis	99
Optimization of Thermal Insulation and Air Permeability of Recycled Polyamide-Based Fibrous Building Panels through Full Factorial Experimental Design I. Yalçın-Eniş and H. Sezgin	107
A Review of Mycelium-Based Composites as a High Fire-Rated Construction Material A. Akintunde, F. O'Flaherty and O. Ojedokun	113
Study of the Mechanical Behavior of Adobe Stabilized with Crushed Barley Straw R.C. Shedan and F.L. Fernandez Da Silva	121
Comparative Analysis on the Flexural Performance of Concrete Reinforced with Abaca Fiber, Banana Fiber and Ramie Fiber K.D. Marcos, M.G. Calamba, M.J. Alfredo Jr. and M.M.C. Rodriguez	127

Chapter 3: Cost-Effective and Alternative Building Materials

Life Cycle Assessment of Aluminium Alloys for Sustainable Building Materials and Components	
A. Mastropasqua, E.S. Mazzucchelli, P. Rigone and S.H. Zabihi	137
Refractory Bricks Characterization Manufactured from Geopolymers Based on Volcanic Ash	
J. Almirón, R. Churata, P. Huanca-Zuñiga, J. Torres-Almirón, G. Acevedo-Obando and D. Tupayachy-Quispe	145
Assessing GFRP Rebars as a Sustainable Alternative to Steel in Aggressive Environments: Tensile Testing and Material Implications	
G. González-Robles, J. Briones-Bitar, P. Carrión-Mero and L. Moreno-Alcívar	153
Effect of Repair Processing on Energy Absorption of Pre-Crack-Initiated Leather	
H. Katogi	161

Chapter 4: Advanced Functional Materials

Obtaining Activated Carbon by Microwave Activation from the Solid Waste Generated in the Pyrolysis Process of Used Tires	
Y. Loayza-Del Carpio, J. Almirón, M.F. Palomino-Cervantes, Y. Ortiz-Valdivia, G. Acevedo-Obando, R. Rosales-Meza and D. Tupayachy-Quispe	171
Ionic Conductivity and Structural Studies of Poly(Methyl Methacrylate)-Grafted Natural Rubber-Graphene Oxide Integrated with Ammonium Triflate Based Polymer Electrolytes	
H. Shabri, K.I. Khairur Rijal, M.N.A. Azhari, A.D. Hamede, N.S.N.M. Sabri, K. Nazir, N.A. Muhd Zailani and S.Z.Z. Abidin	177
Double Scaling Electrical Transport in $(\text{FeO})_{1-x}/(\text{BaTiO})_x$ Nanoparticle Composite Sinters: Variable Range Hopping and Percolation	
H. Kobori and N. Fukutome	183

Chapter 5: Advanced Approaches to Infrastructure Objects Research and Design

Structural Damage Prediction of a Concrete and Steel Bridge Using Acceleration Signal Processing and Artificial Intelligence Algorithms	
N.X. Diaz, A.W. Ortega and R.M. Delgadillo	193
Welding Procedure Effect on the Hydrogen Diffusion Behavior and Hydrogen Embrittlement Susceptibility of Welded Joint for Hydrogenation Reactor	
G.X. Cheng, W.C. Song, S.Y. Hu, S.W. Tu and H.J. Hu	199
