

Table of Contents

Preface

Towards Innovation in Superplasticity, A Brief Review on the Project	
T. Sakuma	3
An Examination of Flow Processes in High Strain Rate Superplasticity	
T.G. Langdon	13
Nature of Superplastic Deformation	
O.A. Kaibyshev	21
Analysis of Tensile Superplasticity in Nanomaterials	
R.S. Mishra, S. McFadden and A.K. Mukherjee	31
Enhanced Superplasticity of Ultrafine-Grained Alloys Processed by Severe Plastic Deformation	
R. Valiev and R.K. Islamgaliev	39
Nano-Grain Formation in a Fully Ferritic SUS 316L Austenitic Stainless Steel Produced by HS-PM Process	
H. Fujiwara and K. Ameyama	47
Superplasticity of ($\alpha+\gamma$) Duplex Stainless Steel with Elongated Secondary Phase	
T. Furuhara, K. Hikita and T. Maki	53
Microstructural Evolution for Superplasticity Using Equal-Channel Angular Pressing	
M. Nemoto, Z. Horita, M. Furukawa and T.G. Langdon	59
Superplastic Behavior of Magnesium Alloy Processed by ECAE	
M. Mabuchi, M. Nakamura, K. Ameyama, H. Iwasaki and K. Higashi	67
Low Temperature Superplasticity of Ultra-Fine Grained 5083 Aluminium Alloy Produced by Accumulative Roll-Bonding	
N. Tsuji, K. Shiotsuki, H. Utsunomiya and Y. Saito	73
Formation of Microcrystalline Structures and Superplastic Properties of Nickel Based Alloys	
V. Valitov, F.Z. Utyashev and S.K. Mukhtarov	79
Superplastic Properties of Rapidly Solidified Mg-Al-Zn Alloys	
J. Kaneko, M. Sugamata and N. Hisata	85
Superplasticity of Ultrafine-Grained Aluminium Alloys Processed by Equal-Channel Angular Pressing	
Z. Horita, S. Komura, P.B. Berbon, A. Utsunomiya, M. Furukawa, M. Nemoto and T.G. Langdon	91
Optimization of Microstrucutre for Superplasticity Using Equal-Channel Angular Pressing	
M. Furukawa, K. Ohishi, S. Komura, A. Yamashita, Z. Horita, M. Nemoto and T.G. Langdon	97
Effect of Cold Pre-Rolling on Superplasticity of Nonrecrystallized 7075 Aluminium Alloy	
X.Y. Yang, H. Miura and T. Sakai	103
Microstructure and Superplastic Properties in an ECAE Al-4Mg-0.5Sc Alloy Processed at Elevated Temperatures	
T. Mukai, T.G. Nieh, H. Watanabe and K. Higashi	109
Grain Refining during Heavy Deformation in Fe-C Alloys with ($\alpha+\theta$) Two-Phase Structure	
H. Hidaka, T. Suzaki, Y. Kimura and S. Takaki	115
Superplasticity of Sintered Titanium Alloy with Martensitic Structure	
K. Okazaki, T. Tsuchiyama, N. Nakamura and S. Takaki	121
Microstructure Change during Superplastic Deformation in ($\alpha+\gamma$) Duplex Stainless Steel	
T. Yamazaki, Y. Mizuno, T. Furuhara and T. Maki	127
Microstructure Control for Superplasticity of an Ultra-High Carbon Steel	
E. Sato, S. Furimoto, T. Furuhara, K. Tsuzaki and T. Maki	133
Atom-Scale Characterization of Ordered Alloys with Atom-Probe Field-Ion Microscope	
M. Yamamoto	139
Superplastic Deformation Mechanisms of Monolithic Intermetallics	
W.-. Kim, Y. Sato, S. Semboshi, S. Hanada and H. Kokawa	147
Microstructural Evolution during Superplastic Deformation in Large-Grained Iron Aluminides	
D.L. Lin and Y. Liu	155

High-Temperature Deformation in Ti-62.5at.%Al Single Crystals Containing Small Al₂Ti-Type Precipitates	163
Y. Umakoshi, T. Nakano and K. Ashida	
Recent Advances in Superplastic Intermetallics with Emphasis on Titanium and Iron Aluminides	169
T.G. Nieh and J. Wadsworth	
Modelling Heterogeneous Microstructures, Inhomogeneous Deformation and Failure in Superplasticity	177
F.P.E. Dunne and T.W. Kim	
Superplasticity Assisted by Stress-Induced Phase Transformation in Ti-5.5Al-1Fe Alloy	183
J. Koike, Y. Shimoyama, T. Okamura and K. Maruyama	
Superplastic Deformation without Relative Grain Translation?	189
P.L. Blackwell and P.S. Bate	
Low-Temperature Superplasticity of Submicrocrystalline Intermetallics	195
R.M. Imayev, G.A. Salishchev, M.R. Shagiev, V.M. Imayev, N.K. Gabdullin, A.V. Kuznetsov, O.N. Senkov and F.H. Froes	
Superplasticity in Titanium Aluminides Containing Chromium	201
K. Niinobe, Y. Tomota, T. Tsujimoto and M. Nobuki	
Now and Future in High-Strain-Rate Superplasticity	209
K. Higashi and M. Mabuchi	
Theoretical Investigation of High Strain Rate Superplasticity	217
V.N. Perevezentsev, K. Higashi and J.V. Svirina	
Recent Research and Development Activities on Superplasticity in Taiwan	225
J.C. Huang and T.H. Chuang	
Deformation and Microstructural Development in a 2124Al/SiC_pMMC during High Strain Rate Superplasticity	233
G.H. Zahid, R.I. Todd and P.B. Prangnell	
Threshold Stress in High Strain Rate Superplasticity of Powder Metallurgy Aluminum Alloys and Composites	241
D.W. Kum and W.J. Kim	
Temperature Dependence of Tensile Elongation in a Mechanically Milled, P/M Al-Mg-Cu Alloy	249
T. Hasegawa and K. Okazaki	
Effect of Deformation Temperature on High Strain Rate Superplastic Properties in PM 2024Al-Fe-Ni Alloys	255
K. Matsuki, T. Aida and J. Kusui	
Phenomenology and Application of Low Temperature and High Strain Rate Superplasticity in Aluminium Alloy 1420	261
M.V. Markushev and M.Y. Murashkin	
Superplastic Deformation of Aluminum Systems at 500-650 °C with or without Presence of Liquid Phase	267
C.S. Liauo, B.Y. Lou, C.Y. Chen, J.C. Huang, P.W. Kao and W.H. Huang	
Role of Subgrain Formation in High Strain Rate Superplasticity of Al-Mg Alloy	273
W.J. Kim	
High Strain Rate Superplasticity in Magnesium Matrix Composites Containing 15-20 vol. % AlN Particulate	279
A.-. Ma, T. Imura, M. Takagi, Y. Nishida, J.H. Jiang, T. Imai, S.W. Lim and J.Q. Jiang	
High Strain Rate Superplasticity in 10vol.% SiC Particulate Reinforced AZ31 Magnesium Alloys	285
A.-. Ma, J.Q. Jiang, J.H. Jiang, Y.-. Sun, Y. Nishida, T. Imai, P.-. Chen, T. Imura and M. Takagi	
The Thickness of Liquid Phase during Superplastic Deformation in the Vicinity of Solidus Temperature for a 7475 Aluminum Alloy	291
Y. Takayama, T. Tozawa and H. Kato	
Observation of High-Strain-Rate Superplasticity in ZK60 and SiCp/ZK60 Composite	297
H. Watanabe, T. Mukai, T.G. Nieh and K. Higashi	
Low Temperature Superplastic Behavior in ZK60 Magnesium Alloy	303
H. Watanabe, T. Mukai and K. Higashi	
High Strain Superplastic Forming of a New Al-Mg Alloy	309
H. Uchida, M. Asano and H. Yoshida	

Superplasticity of Ceramic Particulate Reinforced Magnesium Alloy Composite Made by a Vortex Method	315
T. Imai, S.W. Lim, D. Jiang, Y. Nishida and T. Imura	
Superplasticity of a SiC_p/Al-10wt% Ti Composite at High Strain Rates	321
H. Kim, W.T. Kim and D.W. Kum	
High Strain Rate Superplasticity of a Powder Metallurgy Pure Aluminum 1N90	327
S. Kojima, D. Jiang, J. Mao and T. Imai	
Microstructural Dynamics during High-Strain-Rate Superplastic Flow in PM 7475 Alloy	333
T. Hirata, T. Mukai, N. Saito, M. Kohzu, S. Tanabe and K. Higashi	
Rheological Behavior of Superplastic Nanocrystalline and Amorphous Materials	341
O.M. Smirnov	
Superplasticity in Pd₄₀Ni₄₀P₂₀ Metallic Glass	349
Y. Kawamura, T. Nakamura and K.B. Kim	
Low-Temperature Homogeneous Deformation in Amorphous Alloys Induced under Electropulsing	355
H. Mizubayashi and T. Okamoto	
Superplastic Behavior and Microstructure in Amorphous La₅₅Al₂₅Ni₂₀ Alloy	361
T. Ohkubo, T. Hiroshima, S. Ochiai, Y. Hirotsu, W. Fujitani, Y. Umakoshi and K.B. Kim	
Ni Tracer Diffusion in Bulk Metallic Glass Zr₅₅Al₁₀Cu₂₅	367
H. Nakajima, K. Nonaka, T. Kojima, T. Zhang and K.B. Kim	
Superplastic Forming of Zr₆₅Al₁₀Ni₁₀Cu₁₅ Metallic Glass	373
Y. Kawamura and K.B. Kim	
Superplasticity in La₅₅Al₂₀Ni₂₅ Metallic Glass	379
T. Nakamura, Y. Kawamura and K.B. Kim	
The Role of Interfaces in the High Temperature Deformation and Failure of Polycrystalline Alumina	387
A.H. Chokshi	
Stress Relaxation and Brittle-Ductile Transition in Superplastic Ceramics	395
T. Rouxel	
Investigation of Superplasticity in 3Y-TZP by Stress Relaxation	403
J.R. Seidensticker and S.M. Wiederhorn	
Mechanics of Superplastic Deformations at Atomic Scale	411
N. Chandra	
Grain Boundary Engineering for Superplasticity	421
T. Watanabe	
Cavity Damage Accumulation in Alumina Doped with Zirconia or Magnesia	431
K. Hiraga, K. Nakano, T. Suzuki and Y. Sakka	
An Amorphous Ceramic Fiber with Large Viscous Flow Deformation at 1193 K	437
Y. Waku, H. Ohtsubo and K.B. Kim	
Superplastic Deformation of Cubic Zirconia Ceramics with Intergranular Phases	443
A.A. Sharif, P.H. Imamura and M.L. Mecartney	
High Strain Rate Superplasticity in Ceramics	451
M. Oka, N. Tabuchi and T. Takashi	
Alumina Segregation at Grain Boundaries in Superplastic Y-TZP	459
E. Sato, H. Morioka, K. Kuribayashi and D. Sundararaman	
Liquid Phase Sintering of Y-TZP with CuO and Y₂Cu₂O₅ Dopants	465
M. Hayakawa, T. Inoue, J.H. Pee, T. Onda, H. Suematsu and H. Yamauchi	
Effect of Divalent Elements on the Grain Growth of TZP	471
T. Onda, K. Okazaki, H. Suematsu, H. Yamauchi and M. Hayakawa	
Improvement of Mechanical Properties after Superplastic Deformation of Silicon Nitride	477
T. Nishimura, G.D. Zhan, M. Mitomo and H. Sato	
Superplastic Characteristics of TZP Containing Various Amounts of SiO₂	483
N. Furushiro, W. Fujitani, K. Oda and Y. Umakoshi	
Superplastic Tensile Ductility in a Zirconia-Dispersed Alumina Produced by Colloidal Processing	489
T. Suzuki, Y. Sakka, K. Nakano and K. Hiraga	
High Temperature Compressive Deformation Behavior of Superplastic B, C-SiC	495
Y. Shinoda, T. Nagano, H. Gu and F. Wakai	

High Temperature Deformation of Precursor Derived Si-C-N Ceramics	501
S. Ishihara, F. Aldinger and F. Wakai	
Tensile Ductility of Liquid-Phase Sintered β-Silicon Carbide at Elevated Temperature	507
T. Nagano, H. Gu, Y. Shinoda, G.D. Zhan, M. Mitomo and F. Wakai	
High Temperature Deformation of Mullite-Zirconia Ceramics Consolidated from Rapidly Solidified Powder	513
H. Ito, K. Lucas, K. Takagi, K. Morino and I. Nakamoto	
Effect of Boron and Carbon Addition on High Temperature Deformation Behavior of β-Silicon Carbide	519
K. Kawahara, S. Tsurekawa and H. Nakashima	
TEM In-Situ Observation of SiO_2 Doped TZP at High Temperatures	525
Y. Ikuhara, Y. Nagai, T. Yamamoto and T. Sakuma	
Superplasticity in Zirconia and Yttria Stabilized Zirconia Mixed Powders	531
K. Sasaki, Y. Ikuhara and T. Sakuma	
Superplasticity in Multi-Phase Alumina-Based Composites	537
A. Foucault, Y. Takigawa, Y. Ikuhara and T. Sakuma	
Superplasticity in GeO_2-Doped TZP	543
J. Mimurada, T. Kondo, Y. Takigawa, Y. Ikuhara and T. Sakuma	
The Influence of the Threshold Stress in the Superplastic Flow of YSZP	549
M. Jiménez-Melendo and A. Domínguez-Rodríguez	
Direct Atomistic Observation of Grain Boundary Sliding I. Gold	555
T. Kizuka, M. Mizutani, S. Deguchi and M. Naruse	
Direct Atomistic Observation of Grain Boundary Sliding II. Silicon Including Boundary Glass Phase	561
T. Kizuka, K. Hosoki, S. Deguchi and M. Naruse	
Boundary Structure of $\text{Y}-\text{ZrO}_2$ Grains as Derived from High-Resolution Electron Microscopy	567
A. Kumao, N. Nakamura, H. Endoh, Y. Okamoto and M. Suzuki	
Grain Boundary Geometry of Superplastic Silicon Carbide Ceramic	573
H. Miyazaki, S. Shimizu, T. Iseki, K. Yasuda, T. Yano and M. Mitomo	
Grain Boundary Character Distribution Control of Al-Mg Alloys by Hot Extrusion	579
N. Saito, M. Mabuchi, M. Nakanishi, M. Nakamura and K. Higashi	
Effect of Magnetic Field on Sintering of Iron Powder Compact	585
T. Matsuzaki, T. Sasaki, S. Tsurekawa and T. Watanabe	
Effect of Grain Boundary Microstructure on Superplastic Deformation of Al-Li-Cu-Mg-Zr Alloy	591
S. Kobayashi, T. Yoshimura, S. Tsurekawa and T. Watanabe	
Atomic Structure and Electron Structure of Fine Grained Diamond Boundaries	597
H. Ichinose, M. Nakanose and M. Khoyama	
Grain Boundary Energy and Atomic Structure in Alumina Bicrystals	601
T. Watanabe, H. Yoshida, T. Saito, T. Yamamoto, Y. Ikuhara and T. Sakuma	
Initiation and Early Stages of Cavity Growth during Superplastic and Hot Deformation	609
A.K. Ghosh, D.H. Bae and S.L. Semiatin	
Modelling of Superplastic Forming Using the Finite Element Method	617
R.S. Sadeghi and Z. Pursell	
Superplastic Forging Analysis by the Multi-Level Modeling	621
T. Aizawa	
Multiaxial Experiments and Constitutive Modeling of Superplasticity	631
E. Tanaka, S. Murakami, H. Takasaki and H. Iwasaki	
Microstructure Evolution in 5083 Al-Mg Alloy Exhibiting Low Temperature Superplasticity at 250°C	639
I.C. Hsiao and J.C. Huang	
The Role of Liquid Phase in Cavitation and Fracture in High-Strain-Rate Superplastic $\text{Si}_3\text{N}_4/\text{Al}$ Alloy Composite	645
H. Iwasaki, M. Mabuchi and K. Higashi	
Mechanism of Internal Stress Superplasticity Based on Thermally-Activated Kinetics	651
K. Kitazono, E. Sato and K. Kuribayashi	

Finite Element Method Simulation of Grain Boundary Sliding: Its Purposes, Models and Applications in Fine-Grain Superplasticity	657
M. Tokuda and R. Hu	
Crack-Like Cavitation in a 0.3 wt% SiO₂-Doped Tetragonal Zirconia	663
K. Morita, Y. Sakka and K. Hiraga	
Anisotropic Feature of Fracture Toughness in Superplastically Deformed 3Y-TZP	669
Y. Motohashi, M. Nemoto, K. Funami and T. Sakuma	
Effect of Deformation Schedule on Cavitation in Superplastic 7475 Al Alloy	675
H. Iwasaki, T. Mori and K. Higashi	
A Comparative Study of Cavitation Characteristics in Si₃N_{4w}/Al-Mg-Si Composite	681
H. Iwasaki, T. Mori, M. Mabuchi and K. Higashi	
Effect of Grain Boundary Microstructures of Brittle Fracture in Polycrystalline Molybdenum	687
S. Tsurekawa, S. Kokubun and T. Watanabe	
Simple Evaluation of Superplastic Characteristic by Tensile Test Using R-Type Specimen	693
M. Hirohashi and M. Nishizawa	
Cavitation in Coarse-Grained Al-4.5Mg Alloys Exhibiting Superplastic-Like Behavior	699
H. Hosokawa, H. Iwasaki, T. Mori, M. Mabuchi, T. Tagata and K. Higashi	
Positron Annihilation Study of the Cavitation in 5083 Superplastic Aluminum Alloy	705
H. Araki, E. Fujita, S. Nakata and Y. Shirai	
A Technique to Study the Granular Flow during Superplastic Deformation	711
J.D. Muñoz-Andrade, A. Mendoza-Allende, G. Torres-Villaseñor and J.A. Montemayor-Aldrete	
Forming of Ceramics at Elevated Temperatures	719
R. Janßen, R. Kauermann and N. Claussen	
Superplasticity of YTZP: Application to the Joining of Ceramics	727
A. Domínguez-Rodríguez and M. Jiménez-Melendo	
An Analytical Model of the Superplastic Bulge Forming of Sheet Metal	735
T. Usugi, N. Akkus, M. Kawahara and H. Nishimura	
Different Friction Coefficients at Different Positions of Superplastically Formed Parts	741
T.-. Chen, J.C. Huang, Y.M. Hwang and T.D. Wang	
On Superplastic Forming of Pure Titanium for Constructing Dental Implants	747
A. Kamiya, A. Watazu, T. Nonami, T. Sonoda, T. Kameyama and K. Naganuma	
Superplastic Forming of Corrosion Resistant CuZnSn Alloys	753
R. Matsubara, N. Ashie, K. Nakamura and S. Miura	
Influence of Preforming on the Final Thickness Distribution of the Superplastically Deformed Domes	759
N. Akkus, K. Suzuki, M. Kawahara and H. Nishimura	
Mathematical Modeling of Superplastic Forming of a Long Rectangular Box Section	765
R.A. Vasin, F.U. Enikeev and R.V. Safiullin	
Fabrication of High-Performance Aluminum Components Using High Strain Rate Superplasticity	771
N. Kuroishi	
The Numerical Analysis on Superplastic Forming under Plane Strain for 7475 Al-Alloy	777
N. Suzuki, M. Kohzu, S. Tanabe and K. Higashi	
Superplastic Aluminum Forming - Expanding Its Techno-Economic Niche	785
A.J. Barnes	
Development of Superplastic-Aluminum-Alloy Piston Formed with Controlled Forging Technology	797
H. Yamagata	
Superplastic Forming Manufacturing Technology Moves Towards the Twenty-First Century	805
D.G. Sanders	
Influence of Lubrication on Aluminum Superplastic Forming	813
K. Osada and K. Shirakawa	
Products Development of Superplastic 5083 Alloy 'ALNOVI-1'	819
Y. Onishi	
New Type Aluminum Alloys with Higher Strength	825
J. Nagahora, K. Kita and K. Ohtera	

Superplastic Forming of Aerospace Metallic Materials

T. Tsuzuku

831

High-Strain-Rate Superplasticity of Al-Si Alloy Produced by Powder Metallurgical Processing

N. Kuroishi, S. Tsuboi, S. Fujino, Y. Shiomi and K. Matsuki
